## BUSINESS DESCRIPTION

The company specializes in the development and sale of modules and plugins designed for E-commerce platforms. Their products enhance and extend the functionality of online stores, providing valuable solutions to optimize and customize the E-commerce experience.

## HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

To achieve success in developing the public application, the Stellar Soft team implemented the following key strategies and actions:

- **Comprehensive Integration.** The team focused on creating a robust integration between Shopify and Amazon. This involved developing features that facilitate the smooth sending of products to Amazon and the direct receipt of orders within the Shopify platform.
- **Location-Agnostic Product Handling.** The application was designed to handle products irrespective of their assigned location. This flexibility is crucial for businesses dealing with diverse inventory locations.
- **Real-Time Updates.** The architecture of the app was carefully crafted to provide real-time updates. This ensures that sales information is communicated promptly to both sellers and customers, contributing to a more efficient and responsive business operation.
- **Seamless User Experience.** The team prioritized the development of an intuitive and user-friendly interface. This ensures that both sellers and customers can navigate the application effortlessly, fostering a positive and productive user experience.
- **Efficient Order Management.** The direct receipt of orders from Amazon within the Shopify platform streamlines the order management process. Sellers can efficiently handle orders without the need for constant switching between platforms.

By combining technical expertise, a user-centric approach, and effective collaboration, the Stellar Soft team succeeded in developing a powerful public application that seamlessly connects Shopify with Amazon, offering an enhanced experience for both sellers and customers.

## BUSINESS DESCRIPTION

The company specializes in the development and sale of modules and plugins designed for E-commerce platforms. Their products enhance and extend the functionality of online stores, providing valuable solutions to optimize and customize the E-commerce experience.

## HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

The team at Stellar Soft successfully developed a module that enhances the PickUp in-store option, extending it seamlessly from Shopify to Amazon. Here are the key aspects of their accomplishment:

- **Cross-Platform Integration.** The module allows the activation and expansion of the PickUp in-store option, connecting seamlessly from Shopify to Amazon. This integration enables sellers to send an unlimited number of products for sale on Amazon and manage Amazon orders directly through the Shopify platform.
- **Efficient Order Management.** Sellers can efficiently update inventory, fulfill orders, and process refunds directly within the app. This centralized approach simplifies the Click&Collect process, enabling users to manage it effortlessly in one place without additional efforts.
- **Real-Time Content Loading.** The team implemented an easy-to-use app architecture that enables the real-time loading of all content. This means that users can see new orders without the need for page reloads, contributing to a smoother and more responsive user experience.
- **Code Efficiency.** The code efficiency implemented in the module ensures that all orders come through quickly, and inventory is updated immediately. This efficiency is crucial to avoid overselling and to keep accurate track of product stock.
- **Avoiding Overhead.** By managing the Click&Collect process in one place, the module minimizes the overhead associated with order processing and inventory management. This streamlining is beneficial for sellers dealing with a high volume of orders.

Overall, the module developed by Stellar Soft provides a comprehensive solution for sellers looking to integrate and manage the PickUp in-store option seamlessly across Shopify and Amazon. The emphasis on real-time updates, code efficiency, and centralized management contributes to the success of this solution.

AFTERCART

PRIVATE APP / PUBLIC APP:

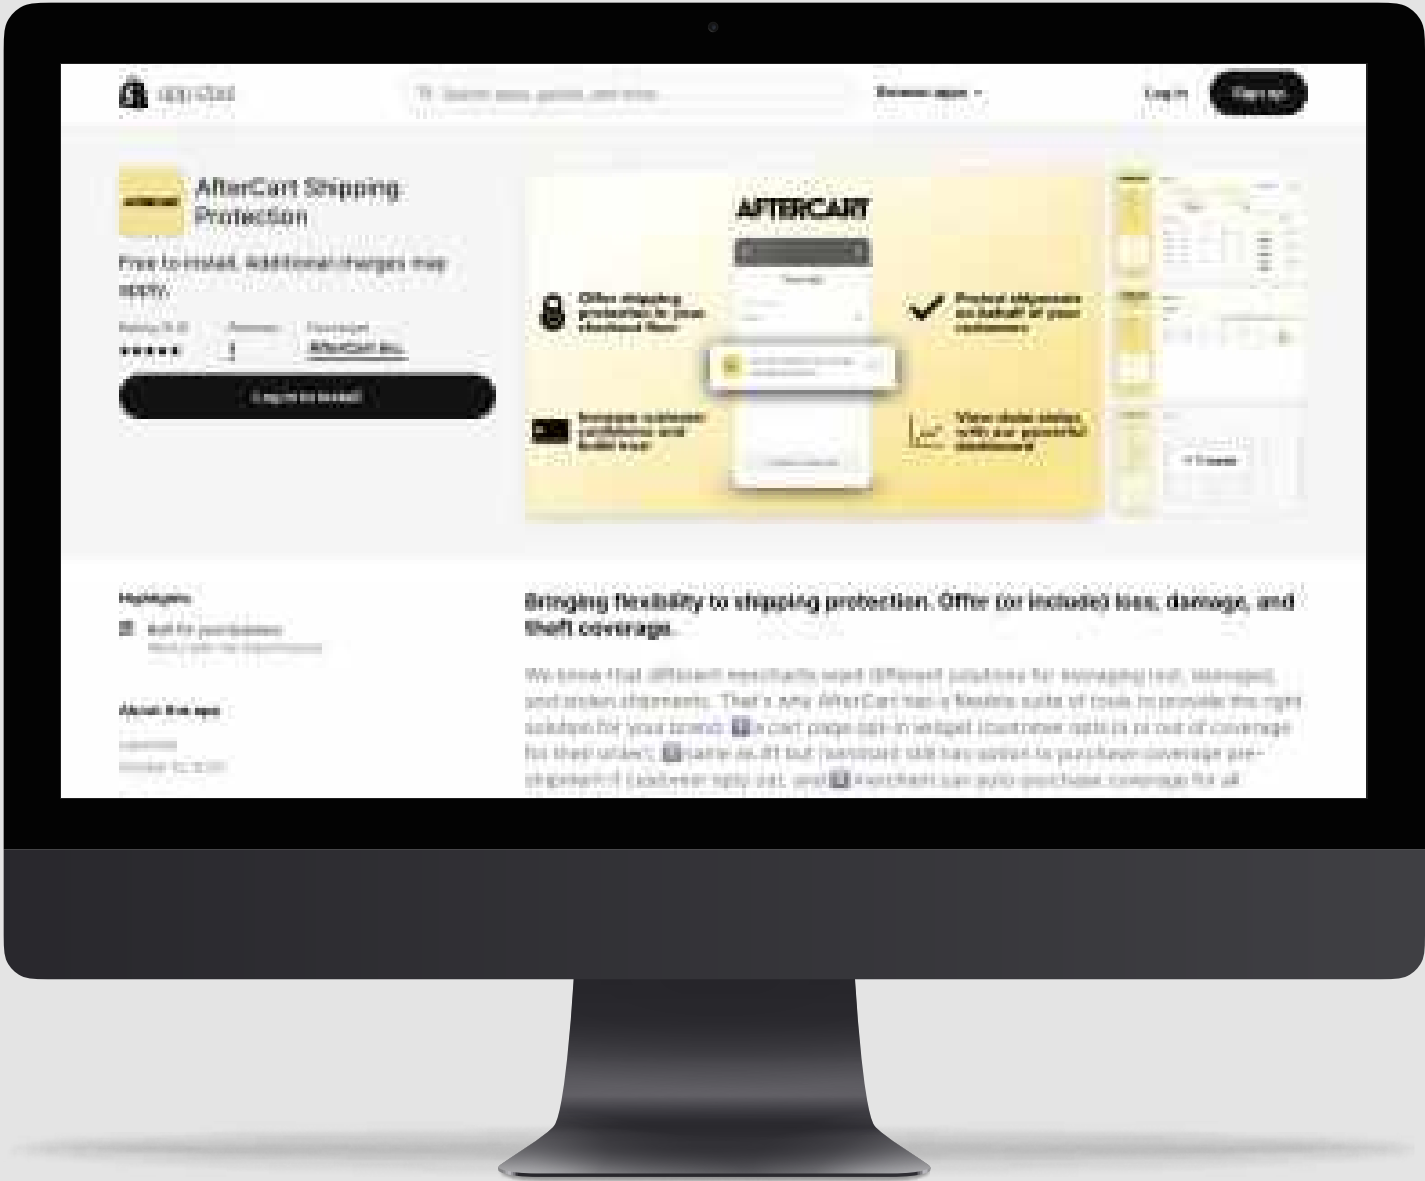

PUBLIC APP

FIND THE APP IN SHOPIFY STORE:

[APPS.SHOPIFY.COM/AFTERCART](https://apps.shopify.com/aftercart)

Scan to download this application!

BUSINESS DESCRIPTION

The app offers shipping protection in your cart, purchase coverage for orders any time prior to fulfillment, or set rules to auto-protect orders above a certain value. Coverage starts at just 2% of cart value with a minimum of \$0.98/shipment.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

The application was already live when our collaboration with the client began, and since then, we have implemented several enhancements:

- Optimizing Shipping Protection Products.** Modified the system so that each time shipping protection is applied, it generates a new product in Shopify. Addressed an issue where these products were initially created as 'Physical products,' impacting shipping costs. Improved the process to create such products as 'Digital products' by default, ensuring accurate shipping cost calculations.
- Widget Installation Improvement.** Investigated challenges with the widget installation for some merchants. Identified strict conditions in the logic created by previous developers. Proposed a comprehensive improvement to the client, but due to resource constraints, opted for a manual resolution for affected merchants.
- Ongoing Frontend Widget Fixes.** Provided tailored fixes for the frontend widget, addressing specific issues for each merchant using the app. Resolved issues related to toggle functionality responsible for applying protection.
- Upcoming Feature.** Auto Archiving Shipping Protection Products. Planned development of functionality to automatically archive shipping protection products in the merchant's Shopify dashboard with each order.

Our commitment is not just to rectify existing issues but also to proactively enhance the application for an improved user experience and seamless functionality across various merchant scenarios.

# HEY HOLY

BUSINESS DESCRIPTION

Revolutionizing dog nutrition. Every dog breed has individual needs and genetic predispositions. Hey Holy have developed a food tailored to the requirements of each breed.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

Stellar Soft team has developed the private referral program that involved the implementation of various features:

- **Custom Referral Program Design.** Developed a private referral program with a bespoke design that seamlessly integrates with the overall website aesthetics.
- **Field Validation and Data Recording.** Validated fields to ensure accurate and truthful data. Recorded data in both the database and a spreadsheet for comprehensive tracking.
- **Data Accuracy Checks.** Implemented checks to ensure the correctness and truthfulness of the filled data. Enabled customers to receive gifts when their referred friends become new buyers.
- **Referral Letter Sending.** Integrated the SendGrid service for the efficient sending of referral letters to customers.
- **Fraud Notification Mechanism.** Implemented a fraud notification system within the app. Detected orders with identical addresses in the entire order database. Automated the process of sending email notifications to administrators with relevant information and order identifiers.

These features collectively enhance the referral program's functionality, providing a secure and reliable mechanism for customer referrals and order verification.

PRIVATE APP

BUSINESS DESCRIPTION

Online and physical store with homemade Italian pastries with global delivery, innovative online ordering, and a commitment to authentic flavors.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

The Stellar Soft team has crafted a specialized custom app seamlessly integrated into the checkout process. Here's how it enhances the user experience:

- **Gift Message Feature.** Developed a custom app embedded in the checkout. Enables customers to leave personalized gift messages during the order process.
- **Automated Message Delivery.** The system automatically triggers a WebHook mechanism. This WebHook ensures that the gift messages are promptly dispatched to specific email addresses. This automated process occurs after the order is successfully paid for and fulfilled.

This tailored solution not only adds a thoughtful touch to the customer experience but also reflects our commitment to providing innovative features that enhance the functionality of the platform.

## BUSINESS DESCRIPTION

Cymbiotika is a brand of supplements with premium, quality ingredients.

## HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

Stellar Soft successfully developed a robust quiz application, showcasing proficiency in various aspects of application development. Key accomplishments include:

- **Quiz Data Management.** Implemented a system for efficiently retrieving and managing quiz data, ensuring a seamless user experience during the quiz-taking process.
- **Recommended Product Integration.** Established a mechanism for sending quiz responses to generate personalized product recommendations, enhancing user engagement and satisfaction.
- **Browser's Local Storage Utilization.** Leveraged the browser's local storage to optimize performance and store relevant data, contributing to a smoother and more responsive user experience.
- **A/B Testing with Quiz Groups.** Implemented a dynamic allocation system for quizzes into groups, enabling effective A/B testing to assess and refine the application's effectiveness.
- **Database Integration for Quiz Data.** Developed functionality for the systematic entry of quiz responses into the database, ensuring efficient data storage and retrieval for further analysis.
- **Webhook Integration for Order Tracking.** Implemented webhook tracking to monitor and capture data from new orders in real-time. Successfully added this order data to the application's database for comprehensive order management.
- **Real-Time Cart Tracking.** Established a tracking mechanism for additions to users' shopping carts.  
Implemented seamless data entry into the database, enabling effective tracking and analysis of user interactions with the application.

These achievements collectively demonstrate the company's expertise in developing a feature-rich quiz application with a strong focus on data management, personalization, and real-time tracking for a more engaging and responsive user experience.

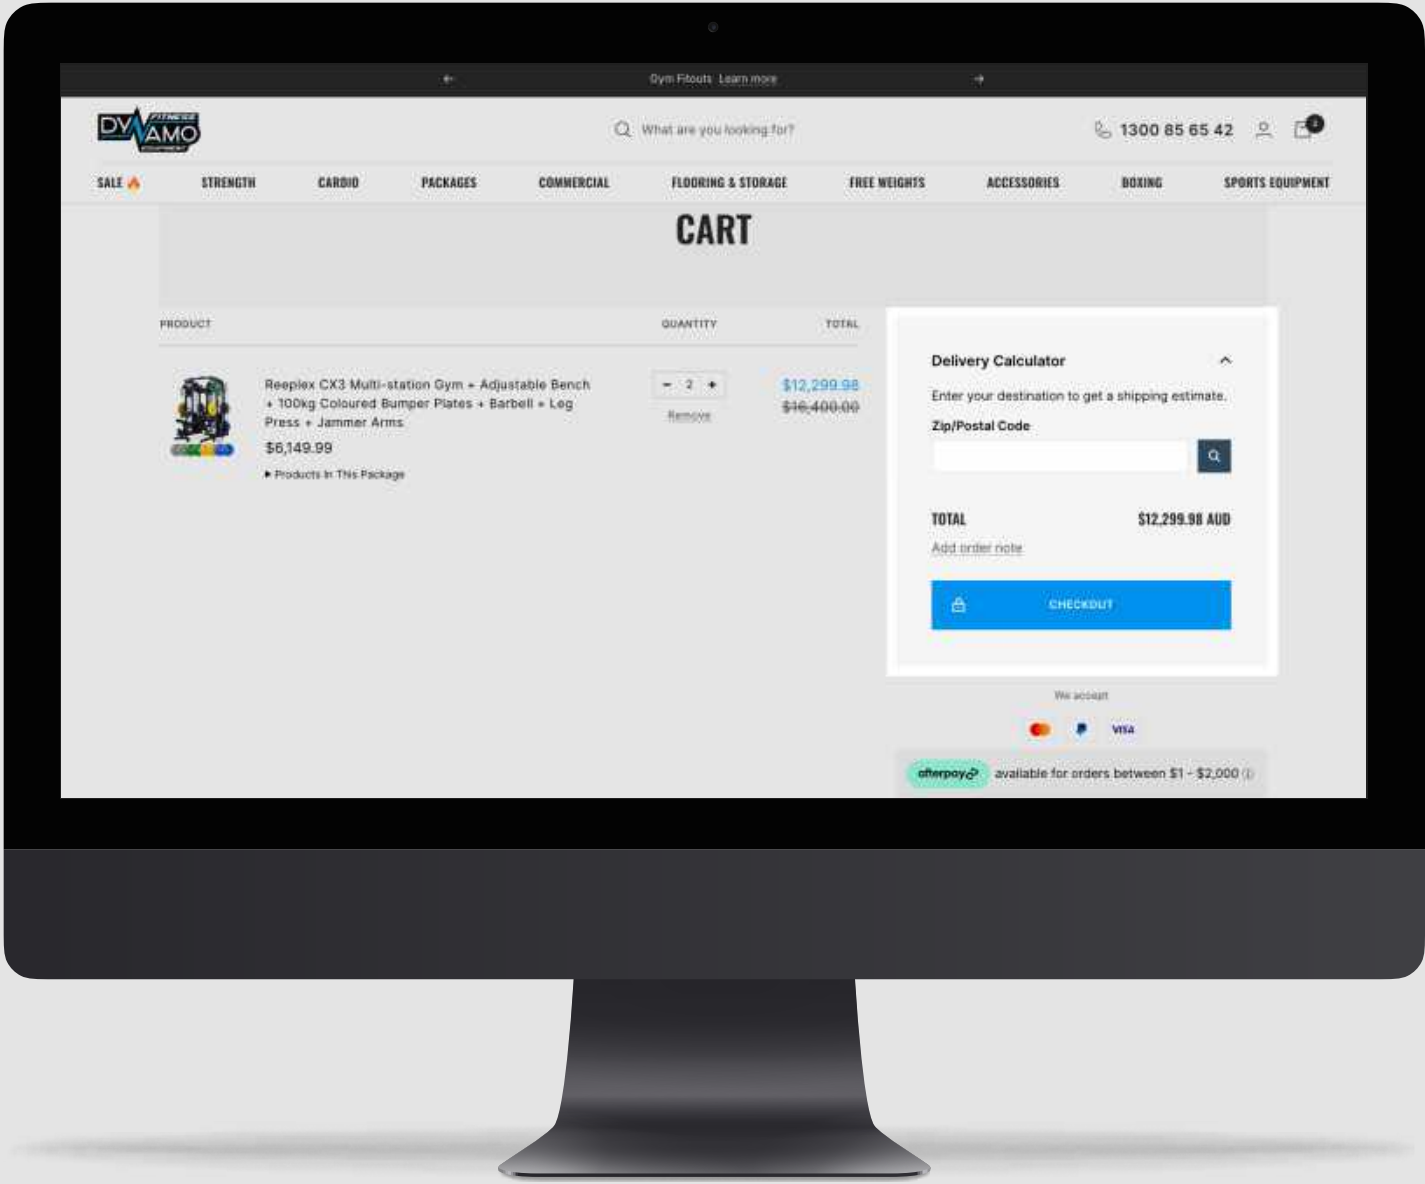

# DYNAMO FITNESS

## BUSINESS DESCRIPTION

This Australian-based store specializes in providing top-quality gym equipment, catering to fitness enthusiasts and professionals alike. With a diverse range of products, they offer everything from strength training apparatus to cardio equipment, ensuring customers have access to premium fitness solutions.

## HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

Our team successfully developed a customized shipping calculation solution that empowers sellers with flexible options and efficient cost management. Here are the key achievements:

- **Tailored Shipping Configuration.** The solution allows sellers to configure shipping options according to their specific needs. Sellers can choose from options such as free shipping or location-based rates, and they can customize pricing to align with their business strategy.
- **Empowering Sellers.** By providing sellers with the ability to configure shipping options, the application empowers them to make strategic decisions that suit their business model. This flexibility is crucial in adapting to various customer demands and market conditions.
- **Economical Shipping Cost.** The application evaluates shipping costs from a variety of carriers and presents users with the most economical options. This feature ensures that sellers can offer competitive shipping rates to customers, enhancing the overall shopping experience.
- **User-Friendly Configuration.** The solution is designed to be user-friendly, allowing sellers to easily configure shipping options without unnecessary complexity. This simplicity is vital for efficient use and management of the application.

Overall, the tailored shipping calculation solution developed by Stellar Soft addresses the specific needs of sellers, providing them with the tools to configure shipping options according to their preferences. The emphasis on customization, cost efficiency, and user-friendliness contributes to the success of this application.
