

Stellar Soft Presentation

■ Staff Augmentation

Augment your engineering team with our Software Developers, QAs, UX / UI Designers, Automation Testers, Product Owners, and ScrumMasters.

This could be anything from one Software Engineer to as many as you need.

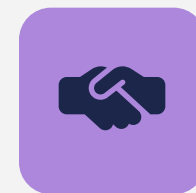

■ A seamless extension of your dev team

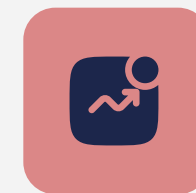

Our developers are rigorously screened, continuously trained, coached, and mentored so you can be sure each person working on your team is top-notch.

Low team member turn-over and ongoing training to foster professional growth.

Facilitated onboarding of team members to accelerate integration to your team.

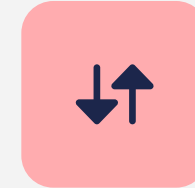

Ongoing team performance monitoring.

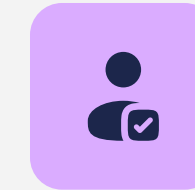

High levels of cybersecurity and data protection standards, customized to meet each client's needs.

Benefits of working with us

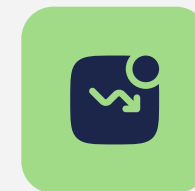

Add capacity to your engineering team with vetted, bilingual software engineers in Mexico and Latin America.

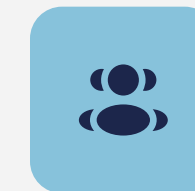

Flexibility to increase or decrease the team size as needed

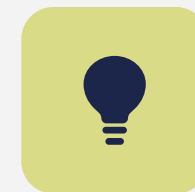

Quick and easy recruitment process

Less administrative overhead

Ability to quickly assemble teams of engineers with the required skills

Access to committed, quick learners and talented engineers that are easy to work with

- Graphic Design

Web Development

- PHP Laravel
- JavaScript (React.js, Node.js, Vue.js, Angular.js)
- Java
- Typescript

ECommerce & CMS Development

- WordPress / WooCommerce
- Shopify / Shopify Plus

How to get started with Stellar Soft

We have a straightforward and easy process to get your project off the ground.

[Schedule a call](#) 

1

Tell us your needs

We discuss your software development needs to understand your goals, and then match you with the top nearshore software engineers suited for your project.

2

Select your team

As you interview the candidates we select for you, together we create a plan to onboard them efficiently so they can hit the ground running.

3

Kick-off

We organize a kick-off meeting to introduce the new engineers to your software, team, processes, and objectives to establish their initial tasks.

4

Rapid integration

We work together to ensure the seamless integration of your new engineers into your team, your culture, and your development flow.

5

Performance Management

We conduct regular check-ins and interventions throughout the engagement to ensure alignment with the plan, and that performance is continuously improving.

Our Clients

Stellar Soft partners with businesses of all sizes across various industries. Our top-notch software solutions have created a strong portfolio of satisfied clients.

- **Kudos received by our team**

Thanks to VJ Soft OÜ's efforts, the platform was successfully launched and is now being utilized by merchants looking to add a subscription service to their stores. The team was highly efficient, and internal stakeholders were impressed with the vendor's transparency and adaptability.

Will Mitchell

CTO at Rebills

VJ Soft OÜ has successfully customized and optimized the e-commerce sites. Their team impresses the client with their reliability, responsiveness, Shopify knowledge, and excellent project management skills. They also maintain a positive working relationship with the client and communicate well.

Davide Sanvito

Executive at Ante Litteram AB

Thanks to VJ Soft OÜ's efforts, the platform was successfully launched and is now being utilized by merchants looking to add a subscription service to their stores. The team was highly efficient, and internal stakeholders were impressed with the vendor's transparency and adaptability.

Grant Ganley

CEO & Founder at Closer Look Enterprises

■ Is Staff Augmentation for you?

More cost-effective than in-house hiring.

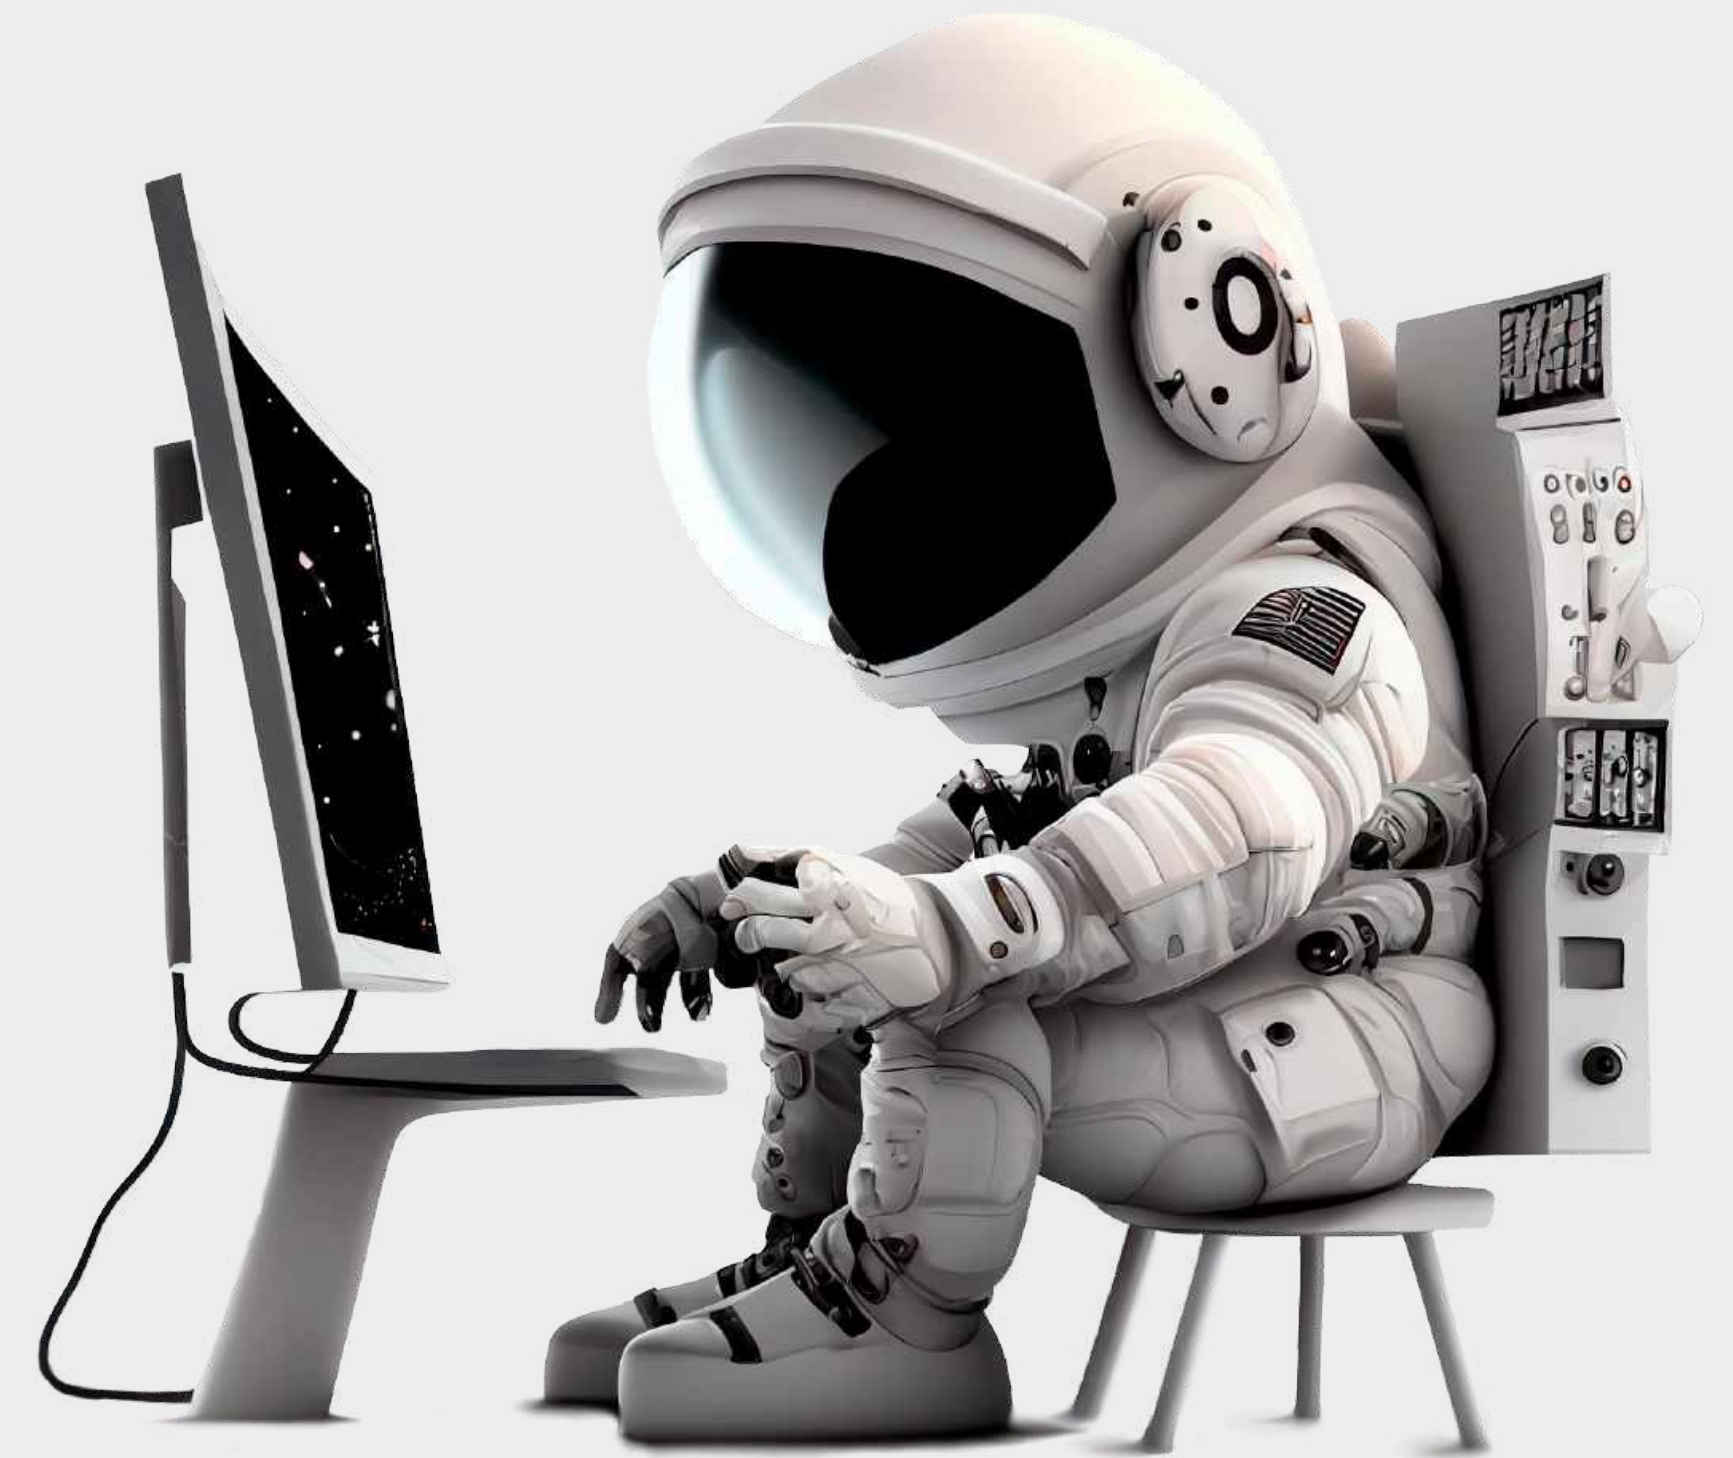

Yes, with staff augmentation, you can eliminate costs associated with recruitment, employee benefits, health insurance, training, 401K, office supplies, and more. It is also more flexible as you can easily scale your headcount up or down based on workload demands.

Access to a broader talent pool.

A staff augmentation approach also enables you to hire developers in countries with lower costs of living which is often more cost-effective than hiring locally or in cities with a high cost of living.

Add capacity and retain control.

Staff augmentation is better when you want to quickly boost the capacity of your existing engineering teams while staying in control of the deliverables and development process.
