Ad Media Cards

Virtual Payment Solution for Media Buyers and Marketers

We partnered with Ad Media Cards to create a streamlined virtual payment solution, empowering digital media buyers and affiliate marketers to efficiently manage transactions and campaigns.

Industry: Fintech

Team size: 3

Country: USA

Collaboration:
September 2023 – Present

Tech Stack

- **React** for dynamic user interfaces
- **Next.js** for fast loading and server-side rendering
- **Redux Toolkit** for efficient state management
- **TypeScript** for improved code reliability
- **Tailwind CSS** for fast and responsive styling

The platform was built on a robust tech stack, providing high performance, scalability, and a seamless user experience.

Screens of platform

• Ad Media Cards

Value Delivered

Key achievements of the platform included:

- Accelerated Card Issuance:** Virtual card creation was streamlined, allowing users quick access within minutes, enhancing transaction speed by 50%.
- Improved Financial Management:** Users gained better control over campaign budgets, leading to a 30% reduction in financial overspending.
- Secure Transactions:** Transaction security and compliance controls improved, reducing fraud by 20%.

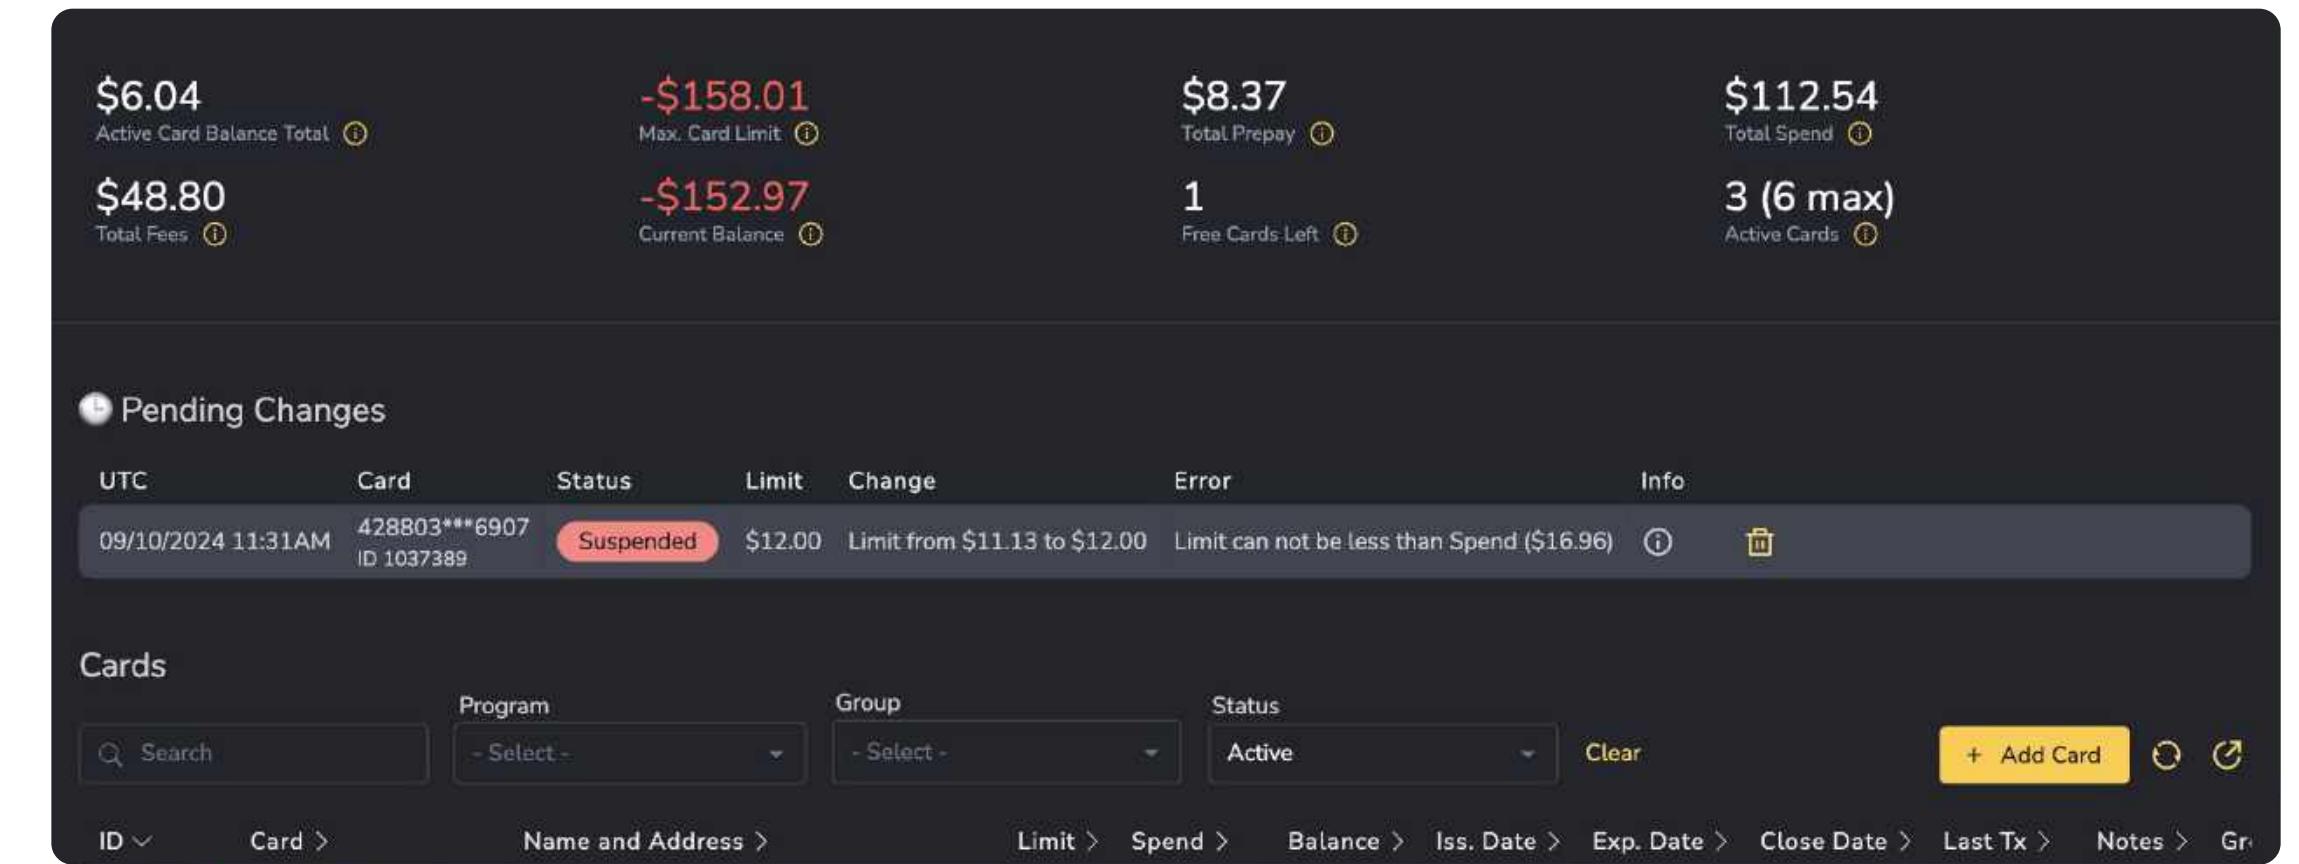

The screenshot shows the 'Funding' section of the platform. It displays two main connection boxes: one for 'ETH, USDT, USDC (ERC-20)' with a transaction ID of `0x9d63e4a3ded331a330706c30318864770393d2c` and another for 'USDT, USDC (TRC-20)' with a transaction ID of `TXuTdBjUf81heKgofCKrgXghMNXKpykxL`. Below these are two smaller boxes: one for 'Bitcoin' with a QR code and a long address starting with `bc1quqwxlf0uvwtc992q7l4zvwjcc43k6sq675fx3r`, and another for 'Claim Crypto'.

Solution Overview

We built a responsive and intuitive platform tailored to meet the demands of marketers, with the following features:

- Client and Admin Interfaces:** Easy navigation for both users and administrators, providing real-time tracking and control over transactions.
- Customizable Funding:** Flexible funding options that empowered marketers to manage budgets efficiently.
- Compliance and Security:** Advanced user management capabilities ensuring regulatory compliance across the platform.

The screenshot shows the 'Pending Changes' and 'Cards' sections of the platform. In the 'Pending Changes' section, there is a single entry for a card with ID `428803***6907` and ID `1037389`, which is currently 'Suspended'. The 'Cards' section includes search and filter fields for 'Program', 'Group', and 'Status', along with buttons for 'Add Card' and 'Clear'.

Broker Research Platform

Brokerage SaaS Platform

We collaborated with a US-based consulting firm to develop a SaaS platform that tracks, evaluates, and manages broker services, tailored to meet EU financial market regulations.

Industry: Fintech

Team size: 10

Country: USA

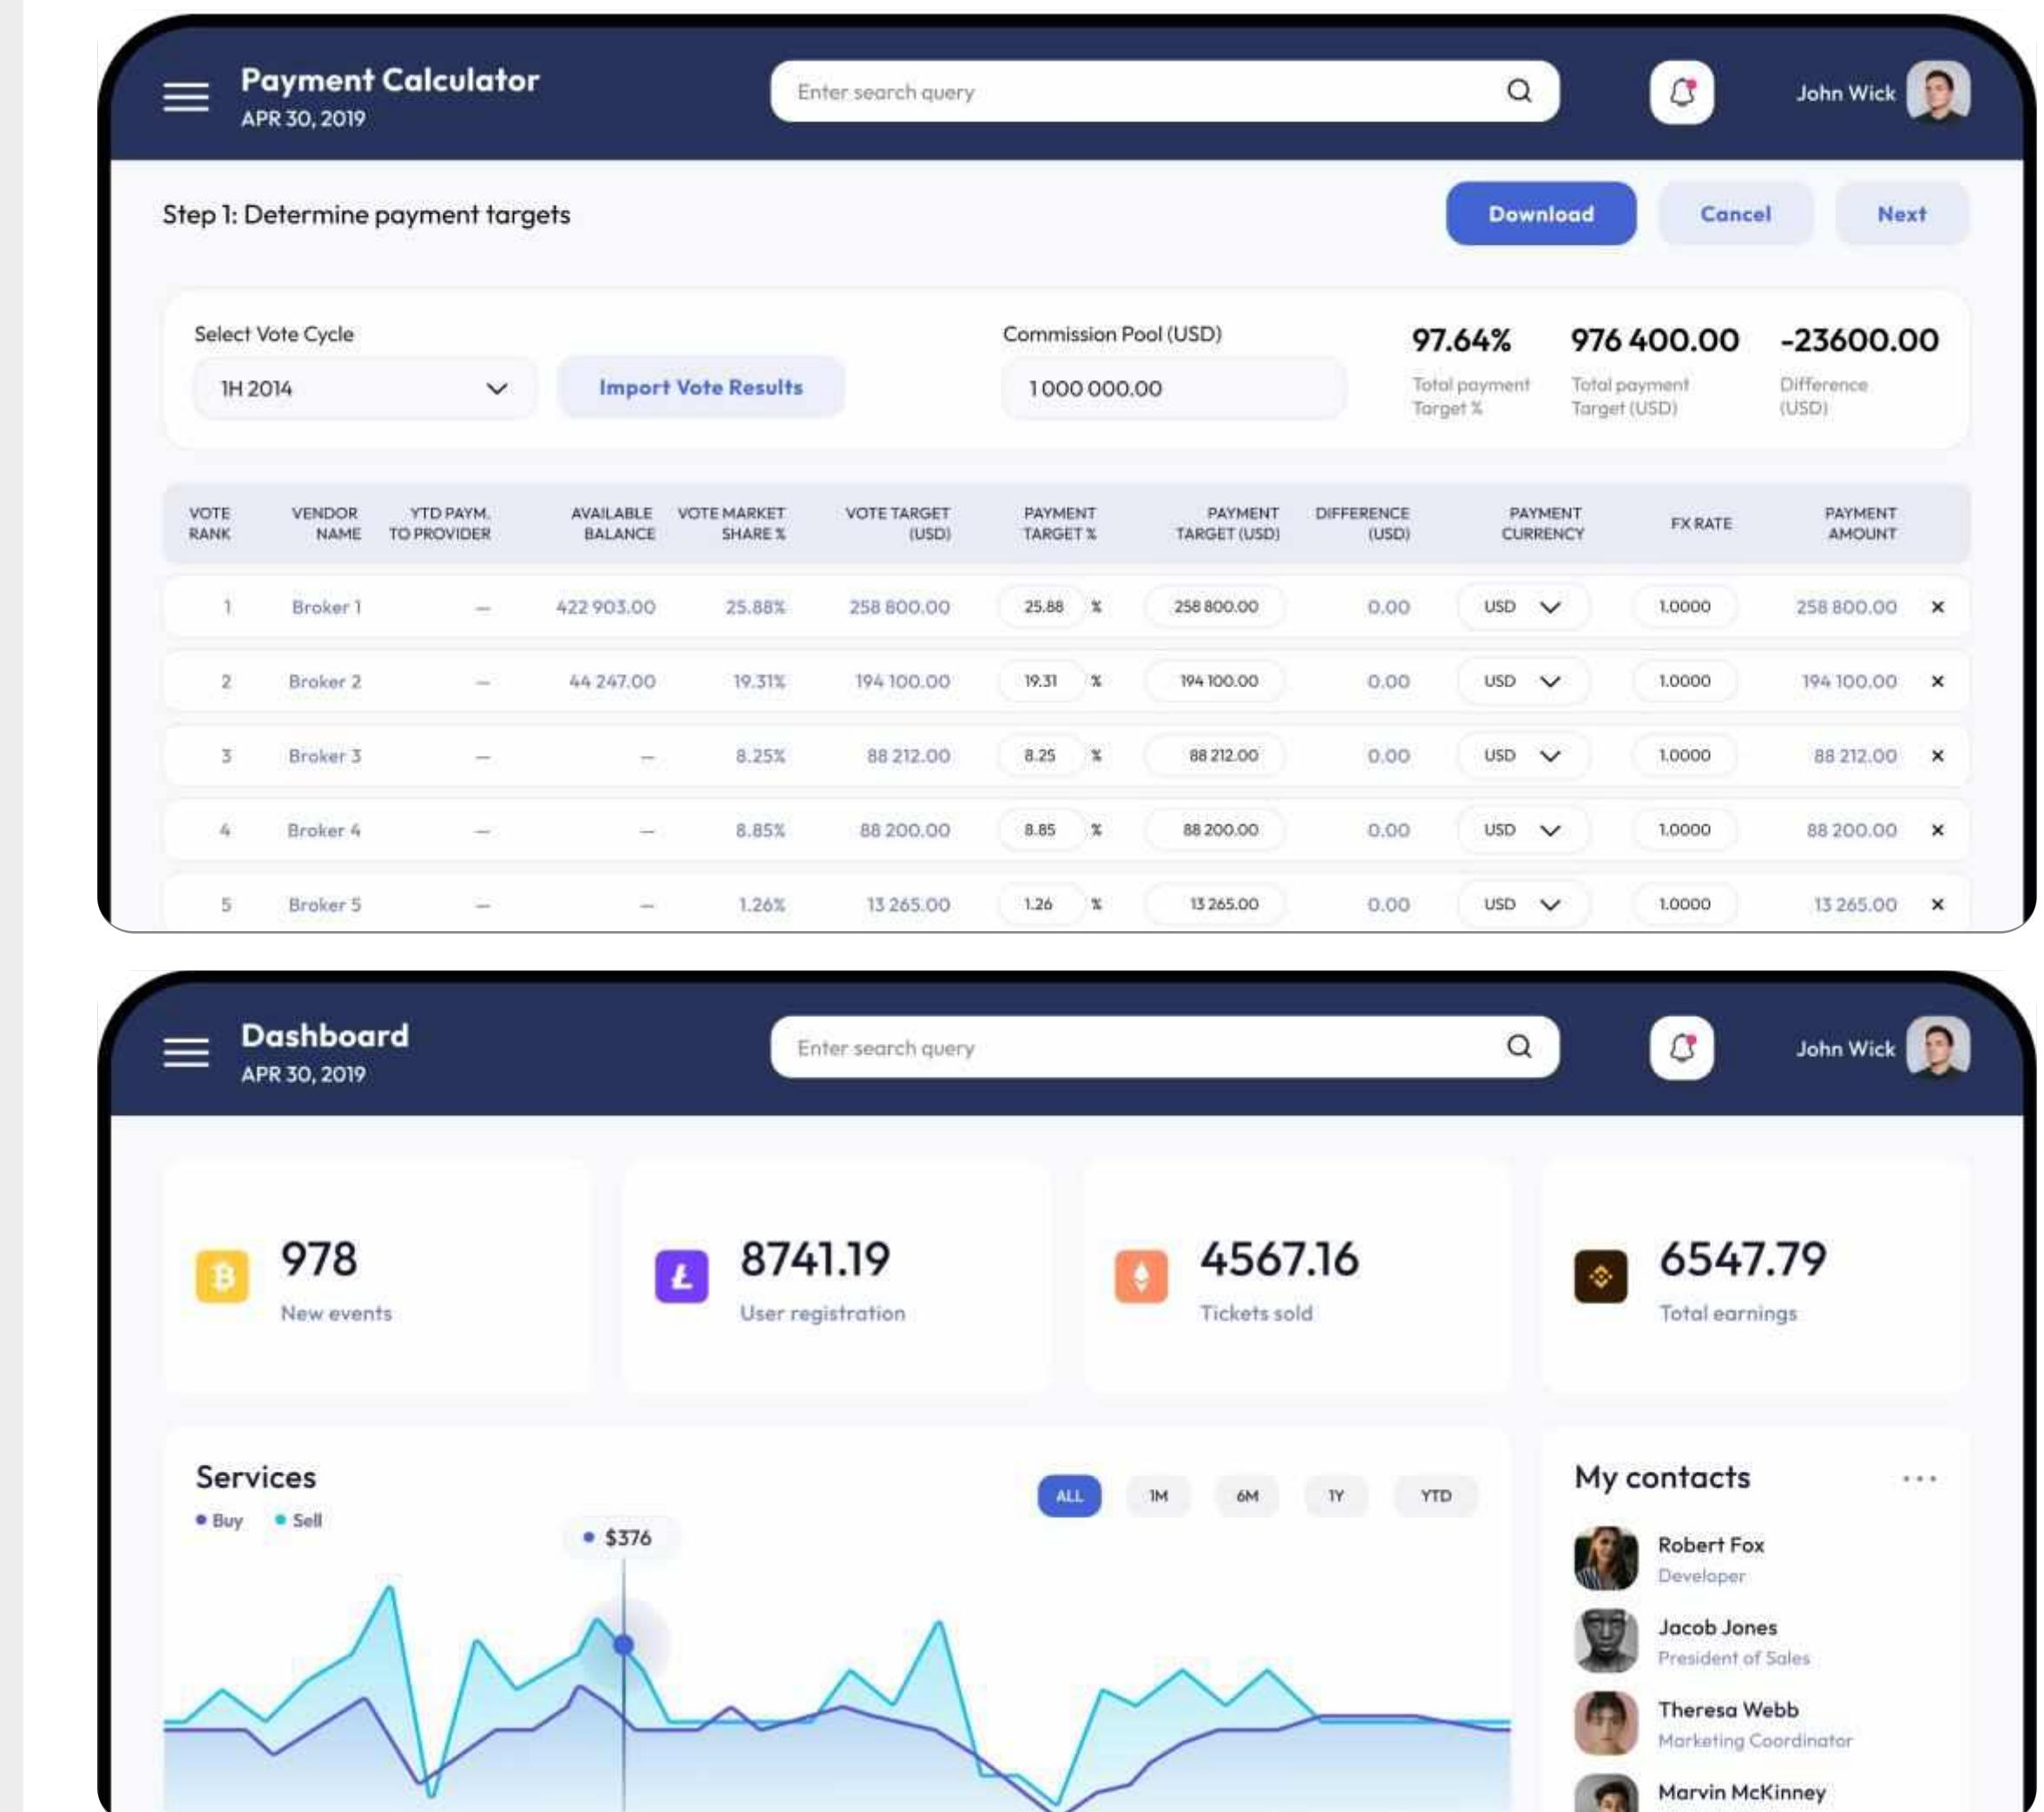

Collaboration:
January 2021 – December 2023

Tech Stack

- Angular for dynamic and responsive frontend interfaces
- Java for secure backend logic and data handling
- Swift 5 for advanced financial data visualization
- AWS for scalable infrastructure

The platform offers a flexible, scalable solution for financial institutions to manage broker research and evaluation efficiently.

The screenshots illustrate the platform's key features:

- Payment Calculator:** A tool for determining payment targets. It shows a summary table with a total payment target of 976 400.00 USD at 97.64% completion, and a detailed table for 5 brokers across various metrics like Available Balance, Vote Market Share %, and Payment Target %.
- Dashboard:** A central hub displaying key performance indicators (KPIs) such as 978 New events, 8741.19 User registration, 4567.16 Tickets sold, and 6547.79 Total earnings. It also includes a Services chart showing Buy and Sell trends over time, and a My contacts section listing team members with their roles.

Screens of platform

Value Delivered

The platform achieved the following:

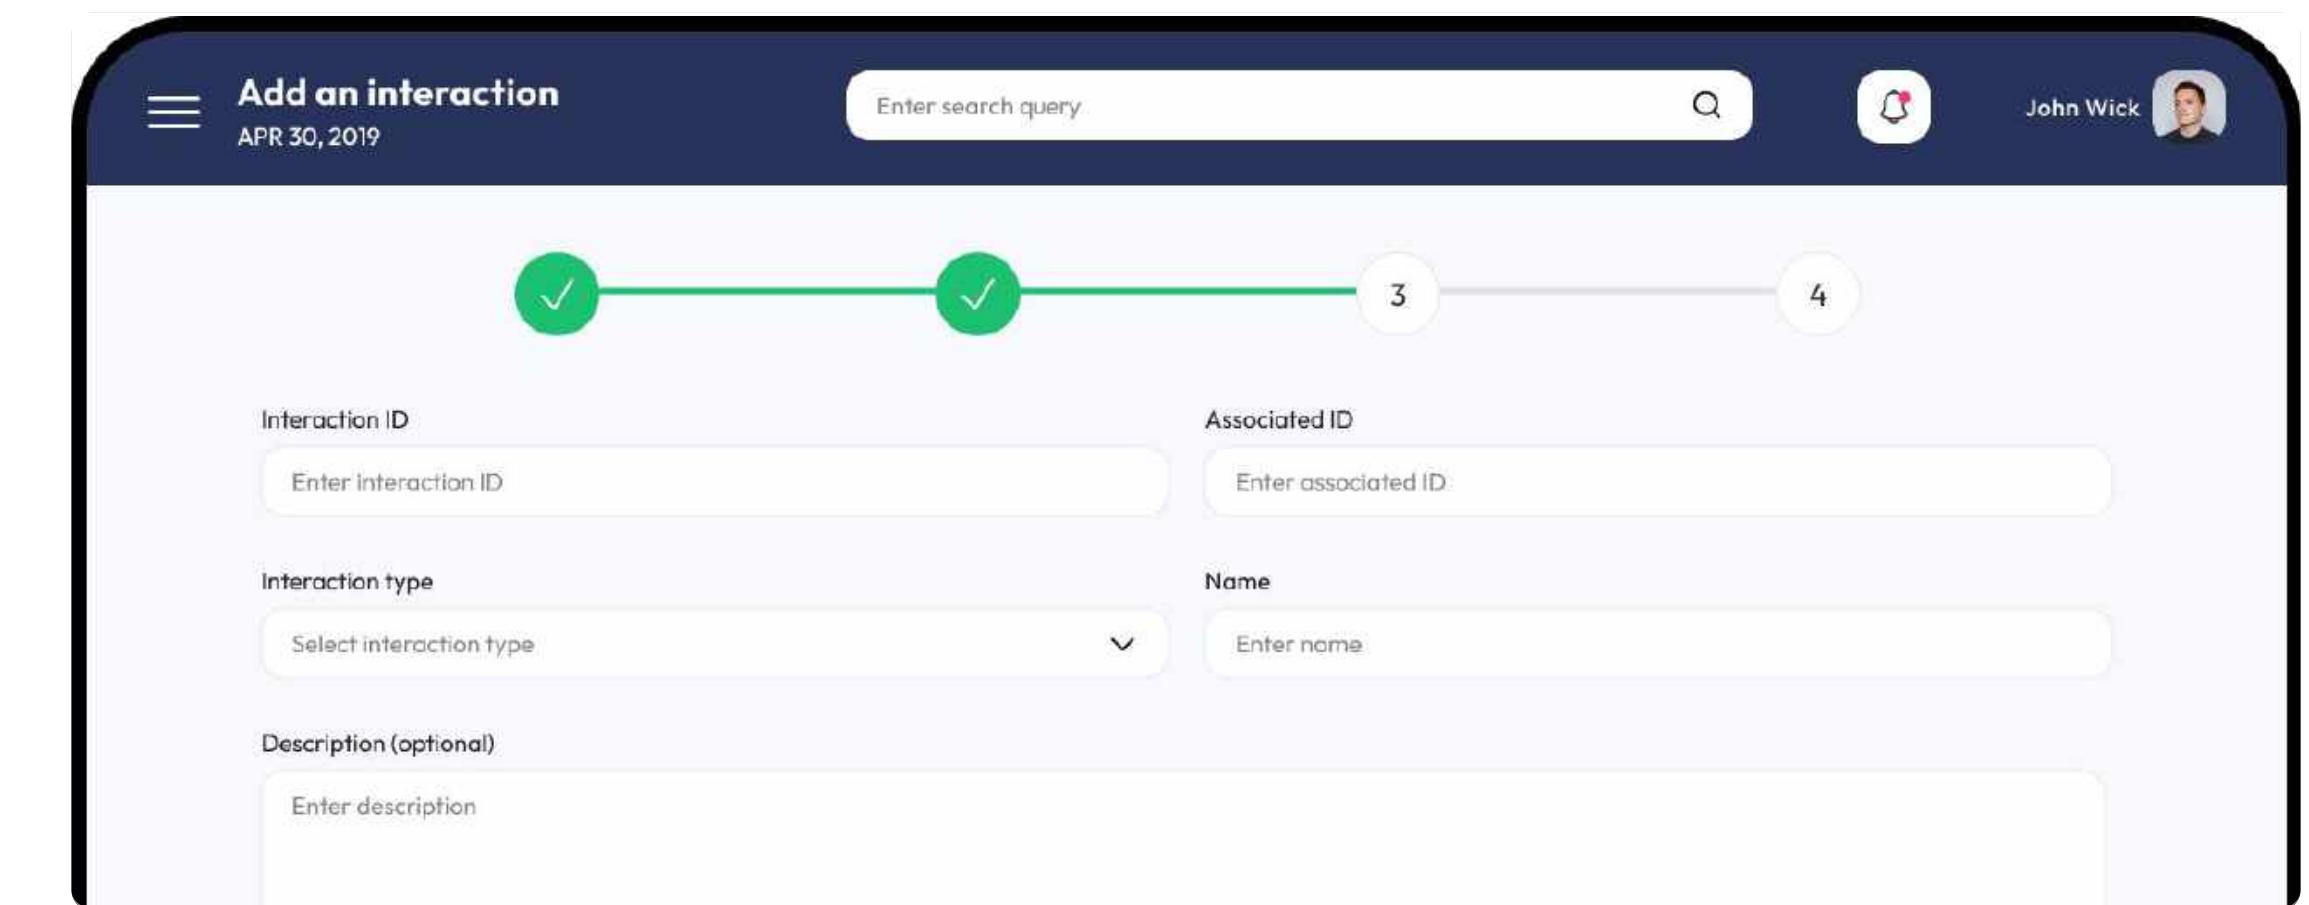

- **Efficient Broker Evaluation:** Streamlined brokerage research process, reducing manual effort by 40%.
- **Compliance Adherence:** Ensured full compliance with EU regulations, enabling the client's expansion into the European market.
- **Enhanced Collaboration:** Improved communication between asset managers and brokers, leading to a 25% improvement in decision-making speed.

Solution Overview

The platform incorporated several modules, each designed for specific tasks:

- **Broker Evaluation:** Tools for voting, event tracking, and commission management to evaluate broker services.
- **Service Provider Portal:** Streamlined communication and information exchange between brokers and researchers.
- **Compliance Features:** Built-in compliance checks and reporting features that supported regulatory standards.

The figure shows a screenshot of the 'Add an interaction' form. At the top, it says 'Add an interaction' and 'APR 30, 2019'. There is a search bar with 'Enter search query' and a user profile for 'John Wick'. The form has four green circular progress indicators connected by a horizontal line, with the numbers '3' and '4' at the end of the line. Below the indicators are fields for 'Interaction ID' (with placeholder 'Enter interaction ID'), 'Associated ID' (with placeholder 'Enter associated ID'), 'Interaction type' (a dropdown menu), 'Name' (placeholder 'Enter name'), and 'Description (optional)' (placeholder 'Enter description').
