UK-based online pharmacy

Chemist4You

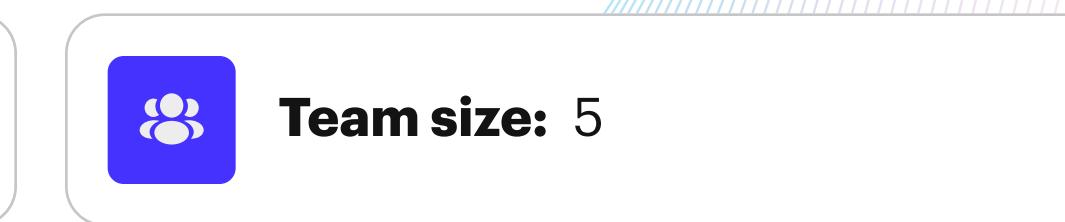

Chemist4U, a leading online pharmacy based in the UK, sought to modernize its e-commerce platform to enhance customer experience, streamline operations, and maintain competitiveness in the rapidly growing online healthcare market. Their existing website faced challenges with page speed, outdated Magento version, and limited flexibility in their front-end design.

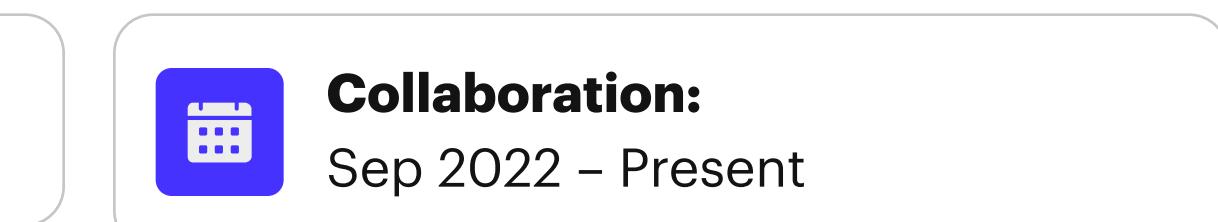

Industry: Healthcare

Country: United Kingdom

Team size: 5

Collaboration:
Sep 2022 – Present

The screenshot shows the Chemist4U website's acne consultation page. At the top, there's a navigation bar with links like 'Shop', 'NHS Prescriptions', 'Online Clinic', 'Weight Loss', 'Offers', 'Help', and a phone number '01695 474 433'. Below the navigation is a banner with the text 'Excellent 4.8 out of 5 Trustpilot'. The main content features a large illustration of a woman with acne on her face. The word 'Acne' is prominently displayed. Text below the illustration explains that acne can make you feel self-conscious and that prescription treatments like creams and antibiotics help. Buttons for 'Start Acne Consultation' and 'View Treatments' are visible. A note at the bottom states that the final treatment will be decided by prescribers based on answers provided.

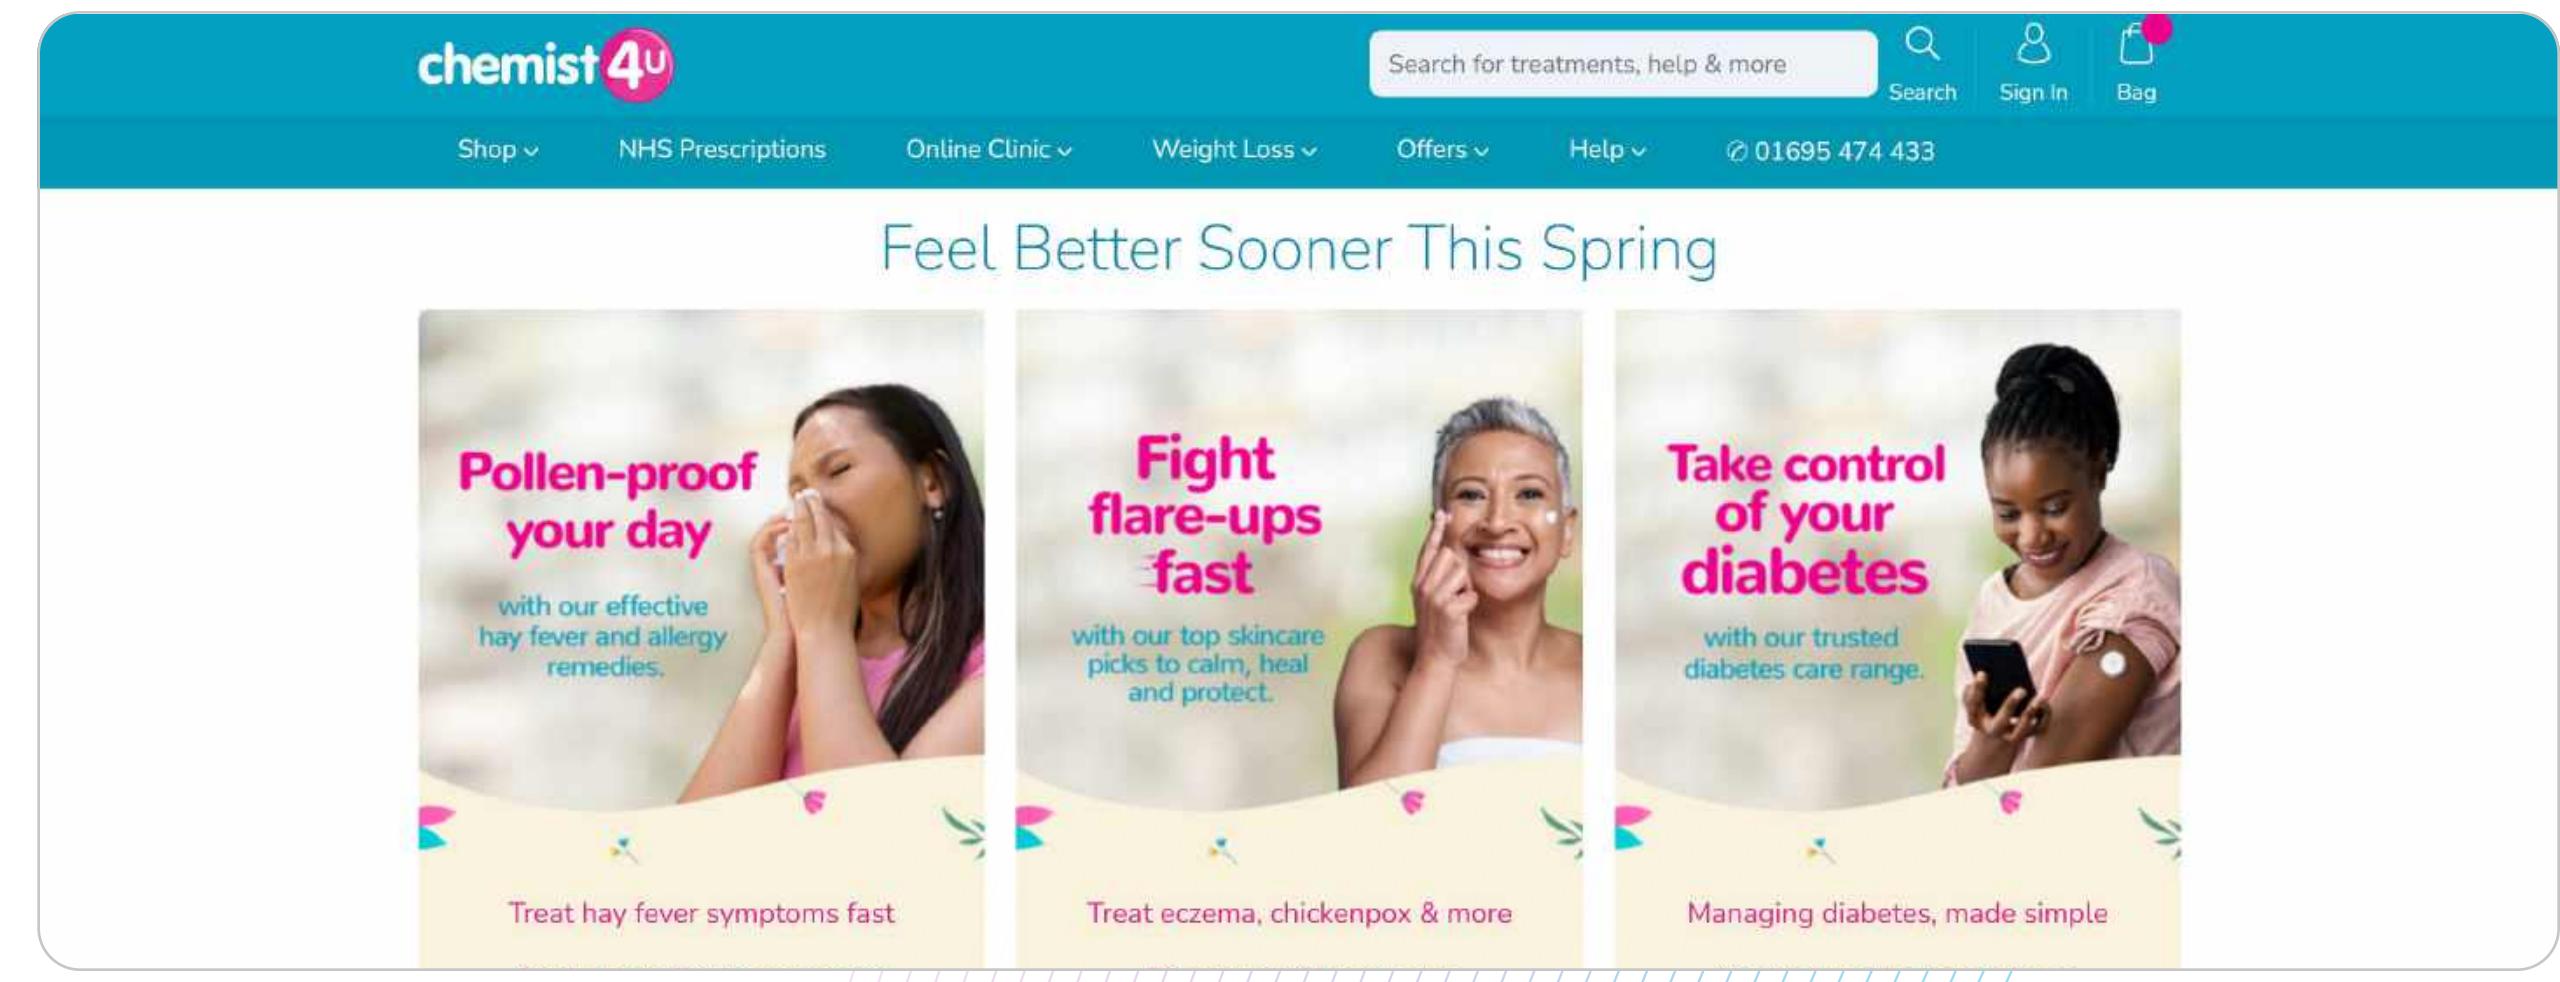

The screenshot shows a step in the Chemist4U consultation process. The top bar has a pink banner with a gift icon and the text 'Save up to 60% on Christmas Gift Sets Shop Now'. Below this, a navigation bar includes 'Your Details', 'Consultation' (which is highlighted with a pink circle), 'Your Treatment', and 'Checkout'. The main content asks if the user suffers from symptoms of indigestion or acid reflux. It lists symptoms such as a burning feeling in the chest, hoarse voice, bad breath, bloating, and nausea. Two radio buttons are shown: 'Yes' (unchecked) and 'No' (checked). A note at the bottom says 'Your answer indicates that you aren't experiencing symptoms of acid reflux.'

Chemist4You

Business Context

Chemist4U, a leading online pharmacy based in the UK, sought to modernize its e-commerce platform to enhance customer experience, streamline operations, and maintain competitiveness in the rapidly growing online healthcare market. Their existing website faced challenges with page speed, outdated Magento version, and limited flexibility in their front-end design.

Discover how we worked with Chemist4U, a popular online pharmacy from the UK, to make their operations faster and more customer-friendly. We improved their systems and online services to help them deliver orders quicker, manage products better, and make customers happier. This helped Chemist4U become even stronger and more competitive in the online pharmacy business.

The screenshot shows the Chemist4U website homepage. At the top, there is a navigation bar with links for Shop, NHS Prescriptions, Online Clinic, Weight Loss, Offers, Help, and a phone number (01695 474 433). A search bar and user icons (Sign In, Bag) are also present. Below the navigation, a main banner features three promotional cards: "Pollen-proof your day" (hay fever/allergy remedies), "Fight flare-ups fast" (top skincare picks for eczema, chickenpox), and "Take control of your diabetes" (trusted diabetes care range). Each card includes a small image of a person and a sub-benefit statement. Below this, a section titled "Discreet Packaging" discusses fast delivery and privacy, listing three benefits: "No logos", "No mention of pharmacy", and "No description of the contents". It also states that products are sensitive and respects customer privacy. To the right, there is a large image of a hand holding a pink ribbon over a stack of delivery boxes. At the bottom, a "Ask a Pharmacist" section features a "We're here to help" message and a portrait of James O., CEO & Superintendent Pharmacist.

Chemist4You

Value Delivered

01 Comprehensive website transformation

Our team carried out a full-scale update of the website platform, including a complete migration to Hyvä Themes for improved performance, maintainability, and a modern frontend experience.

02 Improved customer experience

Modern UI elements provided a more intuitive and engaging user experience.

03 Enhanced site performance

Faster page load times contributed to better overall functionality, with all key performance indicators—Largest Contentful Paint (LCP), First Input Delay (FID), Cumulative Layout Shift (CLS), and Speed Index—now brought into the green zone according to Google PageSpeed Insights.

04 Upgraded security and functionality

Implemented the latest Magento updates to ensure greater reliability and feature improvements.

Chemist4You

Tech stack

The following technologies were employed to create a robust and scalable e-commerce solution:

Magento 2 Open-Source for powerful e-commerce capabilities

PHP for backend logic and performance

MySQL for structured and efficient data management

Hyva theme implementation with complex adjustments
(like step engine for consultation questions)

Tailwind CSS for responsive and modern UI design

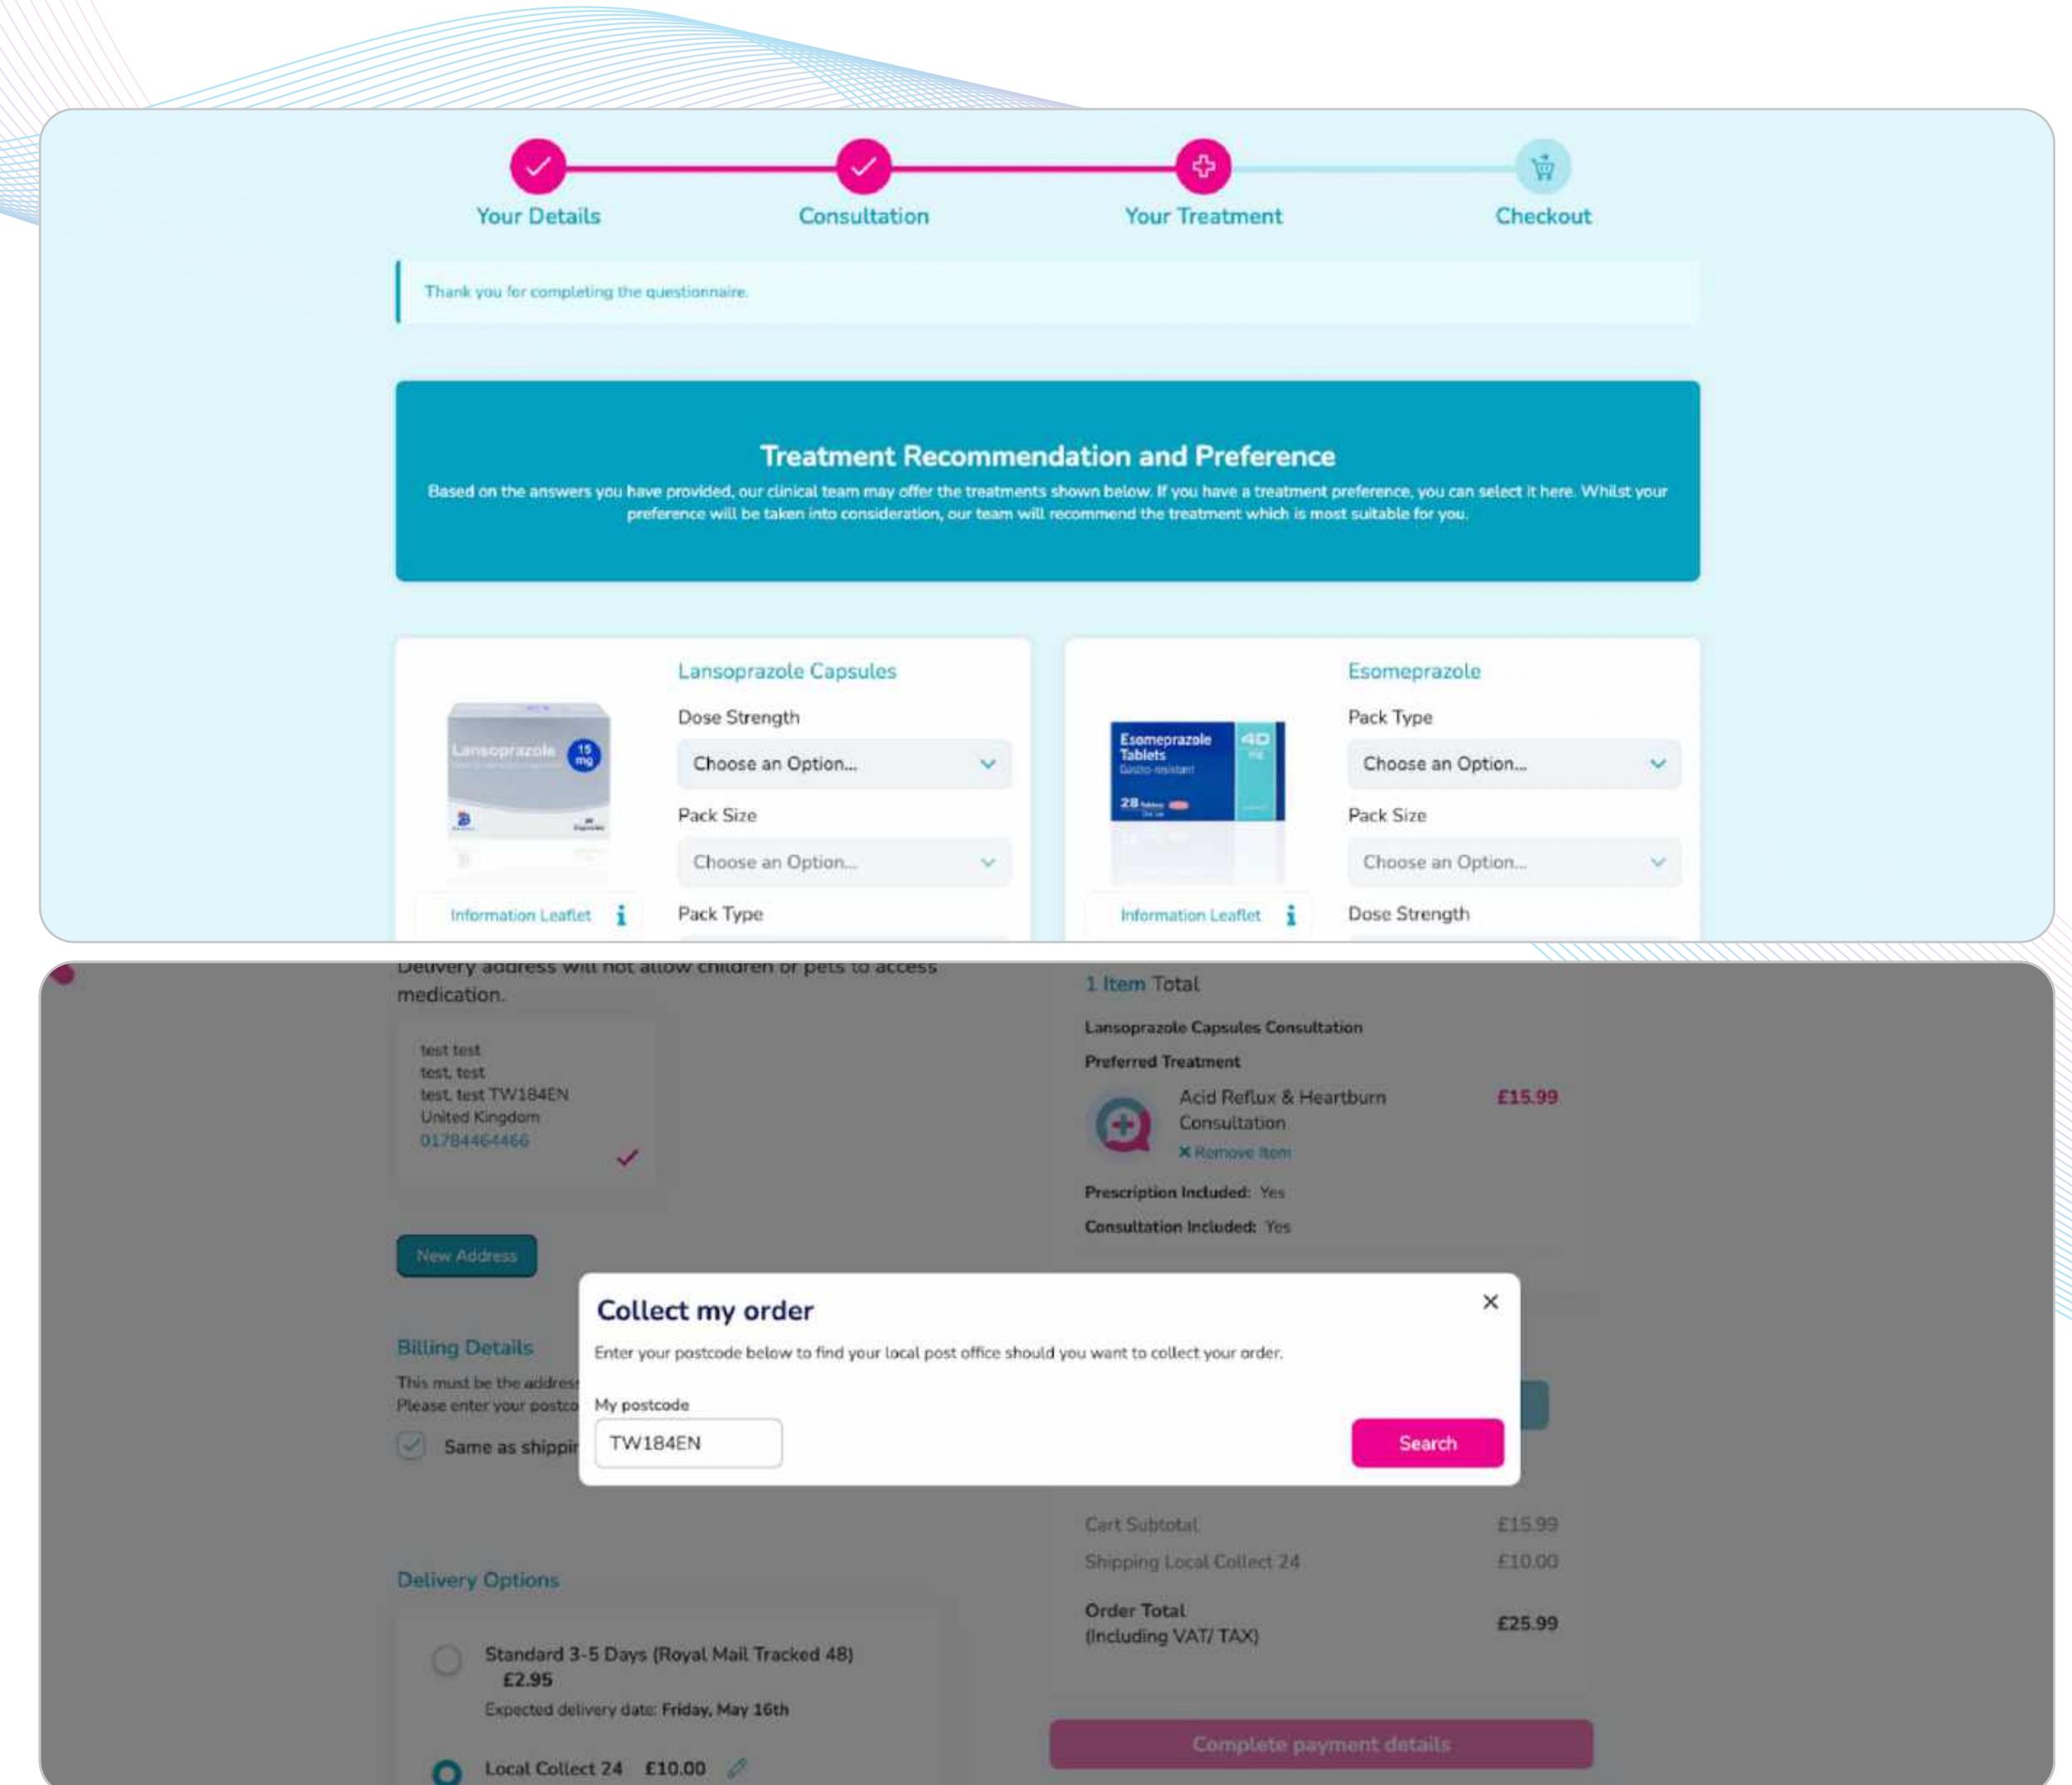

Vanilla JS and AlpineJS for interactive and dynamic front-end experiences

Chemist4You

Solution Overview

By successfully executing this comprehensive digital transformation, Chemist4U is now well-equipped to effectively serve its customers and sustain long-term growth within the competitive online pharmacy market. Our ongoing partnership ensures continuous innovation, adaptability, and robust technological infrastructure:

- **Developed a fully custom front-end theme** inspired by the client's existing live site, optimized for usability and aesthetics;
- **Integrated advanced functionalities using AlpineJS and TailwindCSS,** ensuring a seamless and responsive user interface;
- **Redesigned critical pages** to enhance customer navigation and improve overall usability;
- **Significantly optimized page loading speed,** enhancing site performance and user experience;
- **Provided ongoing technical support,** ensuring continuous, smooth operation;
- **Performed a comprehensive upgrade to Magento 2.4.7-p1,** including updates for essential third-party modules such as Amasty, Checkout.com, and Mageplaza, thereby boosting site reliability, security, and compatibility.

Swiss Online Wine Retailer

Spanien Wein

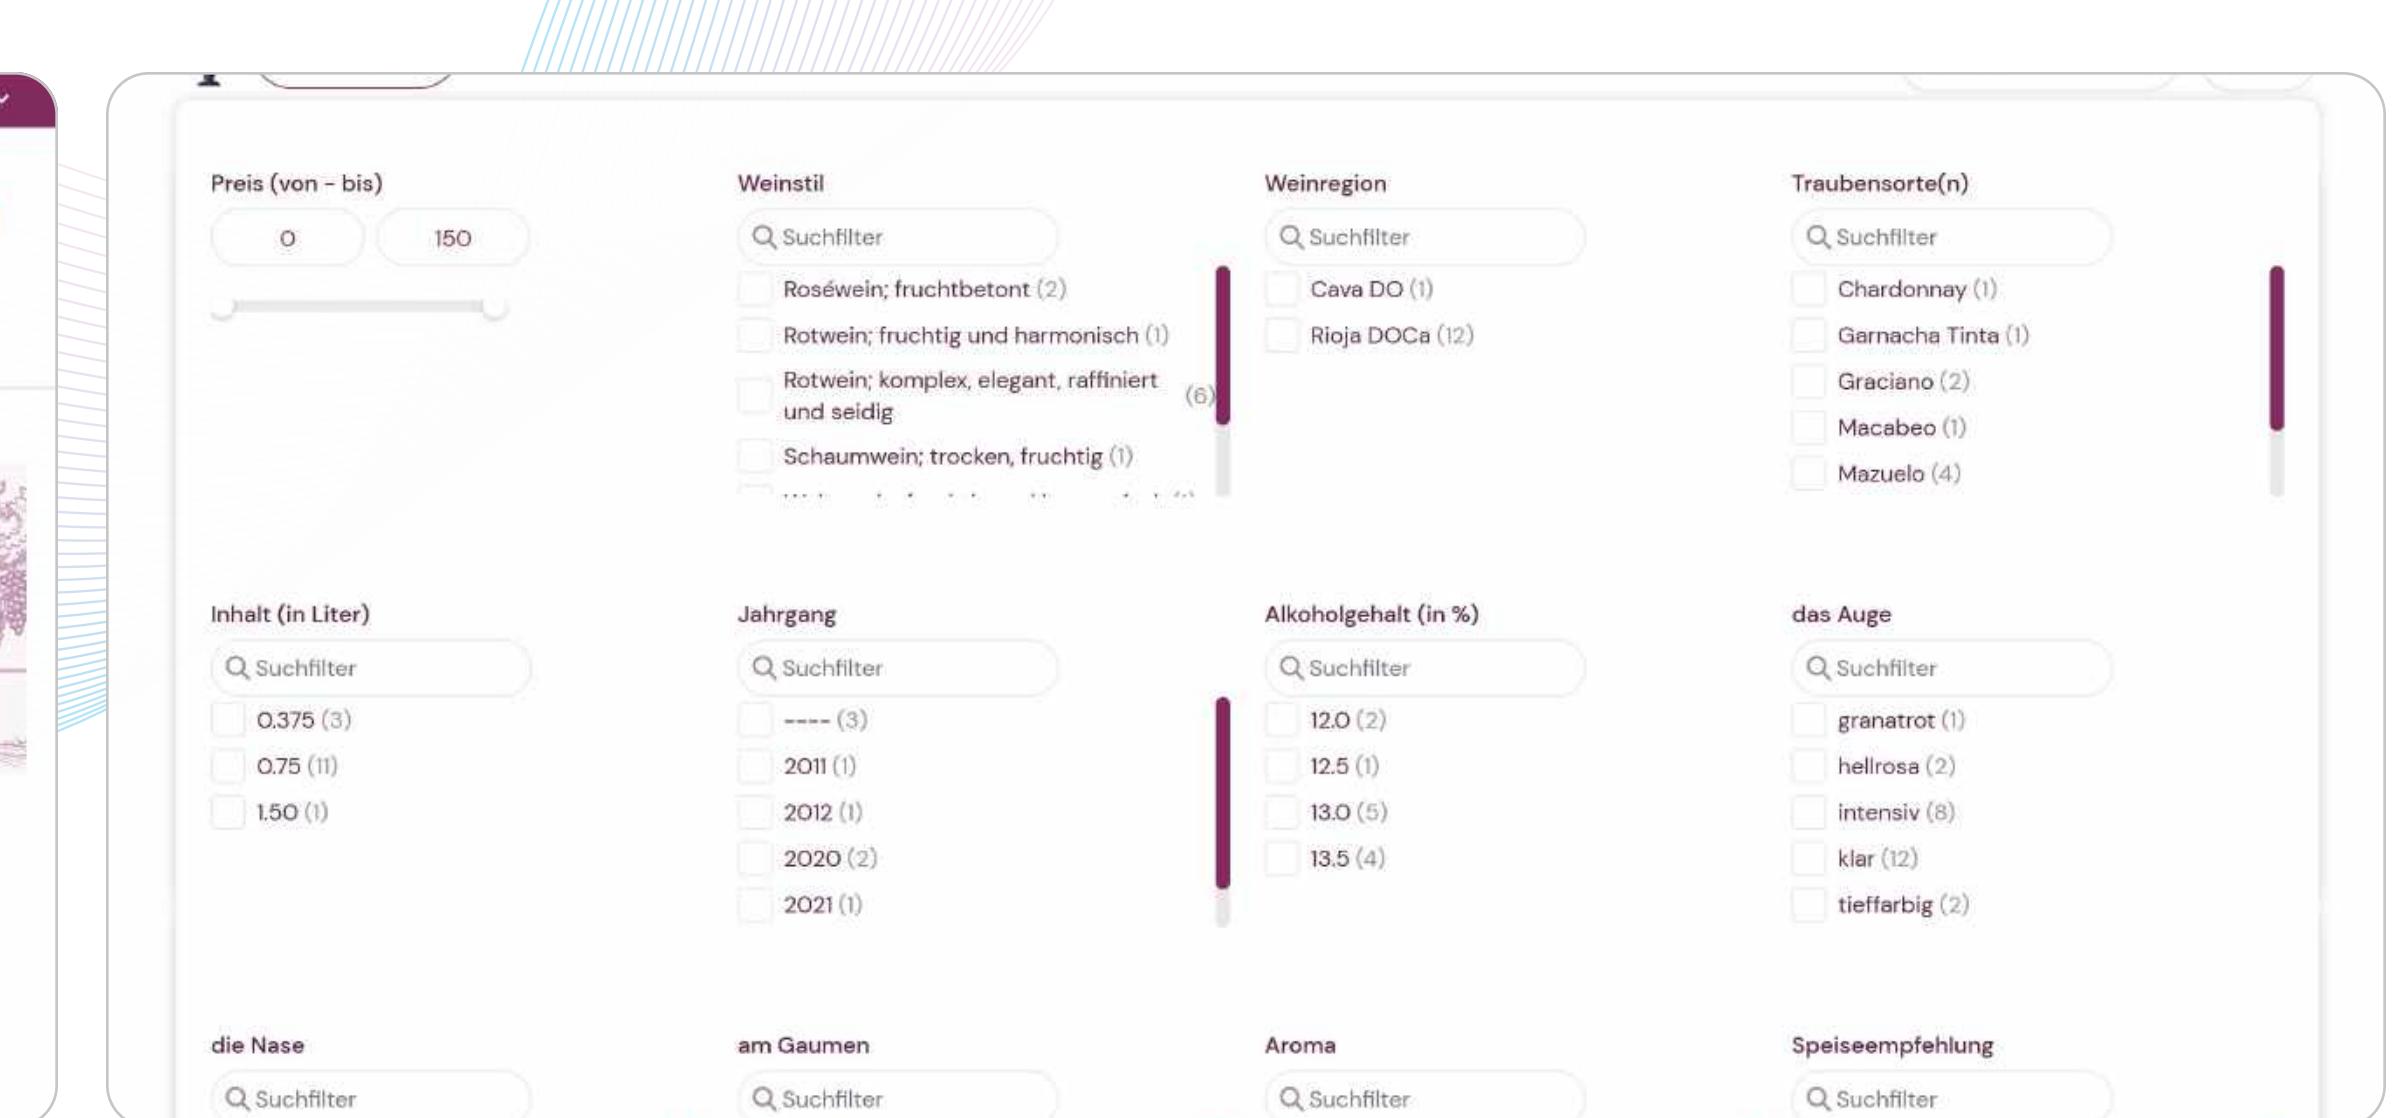

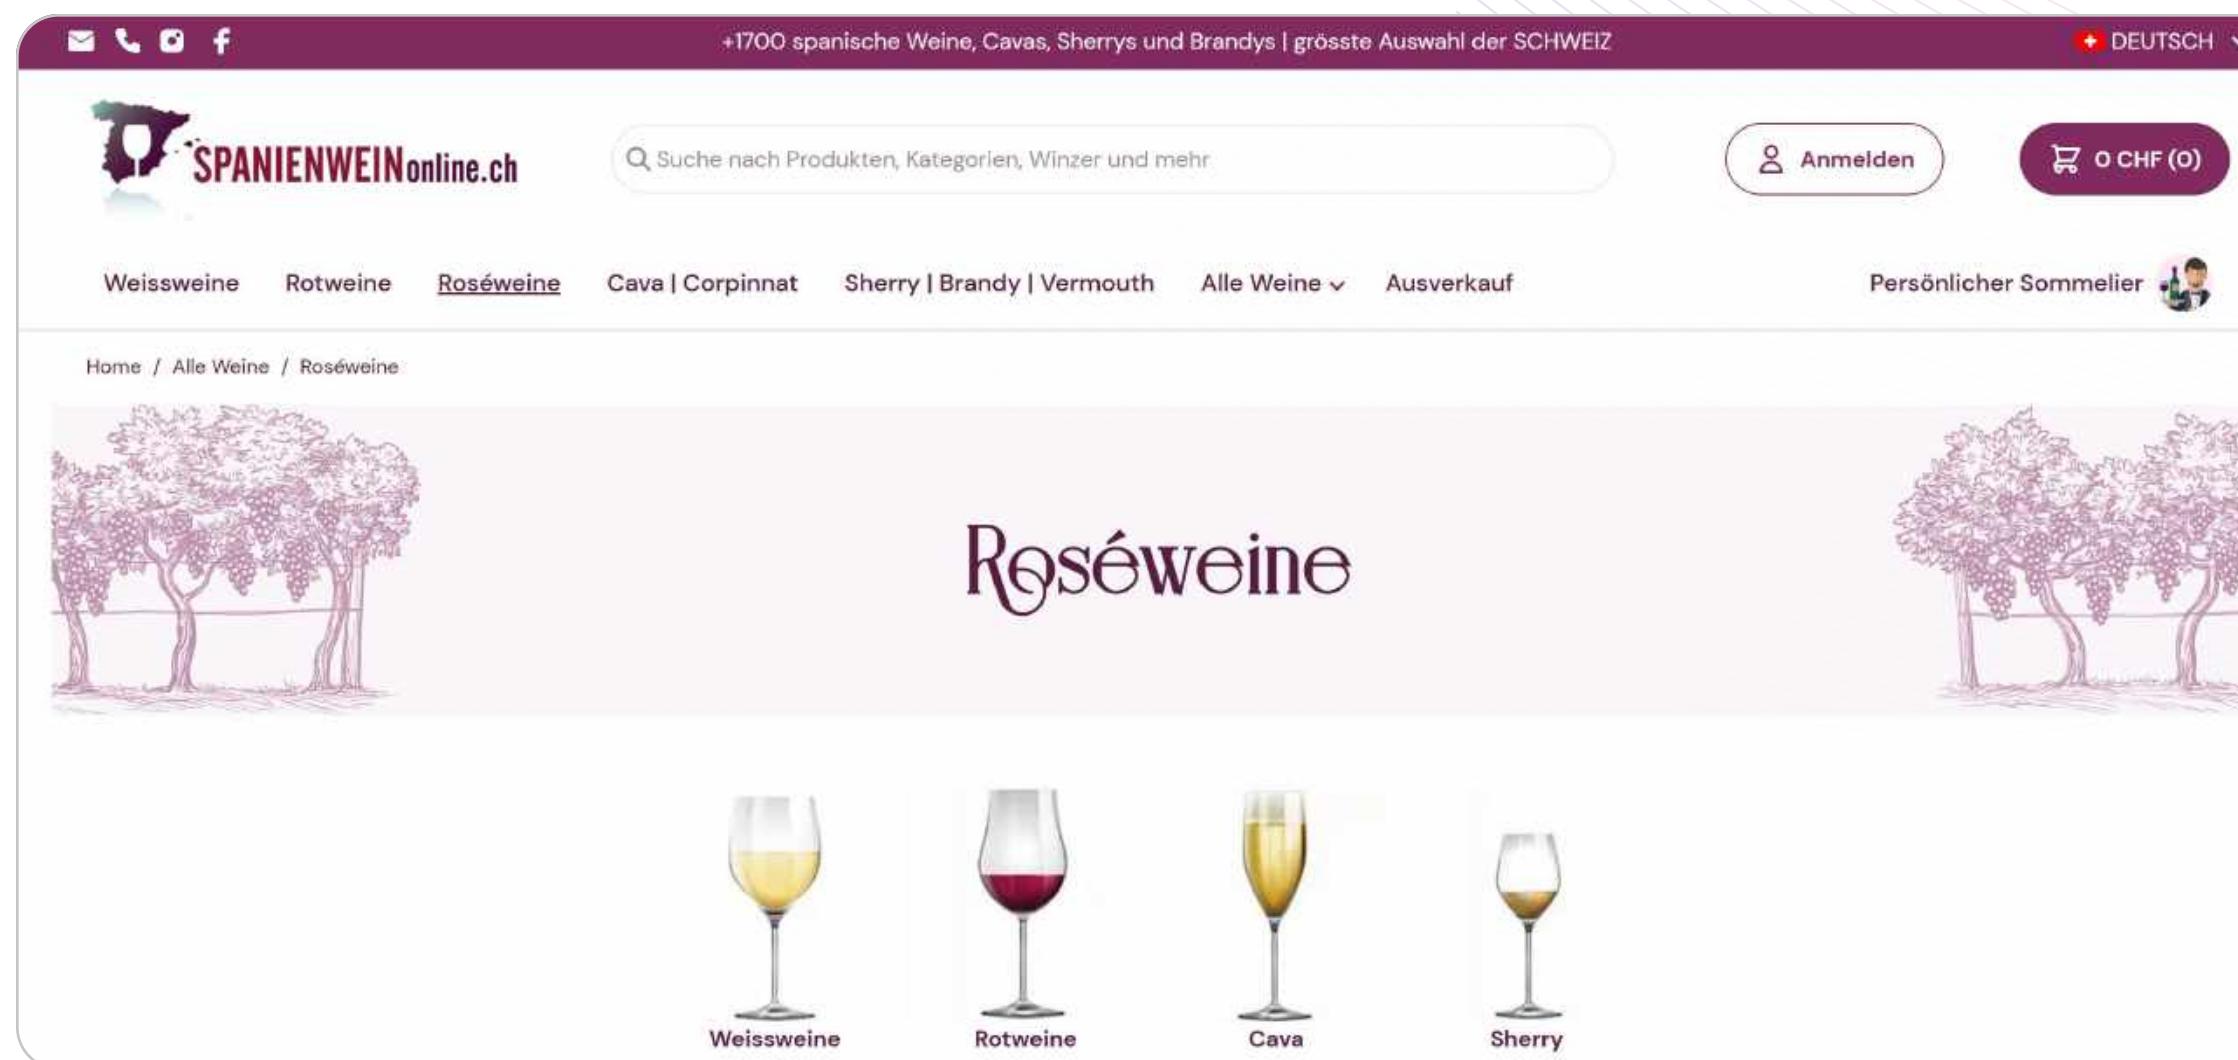

Spanien Wein sells high-quality Spanish wines directly to customers in Switzerland. They aim to give customers an easy and pleasant online shopping experience, introducing them to the rich tradition of Spanish wine.

 **Industry:** eCommerce, Alcohol

 **Country:** Switzerland

 **Team size:** 5

 **Collaboration:** March 2023 – Present

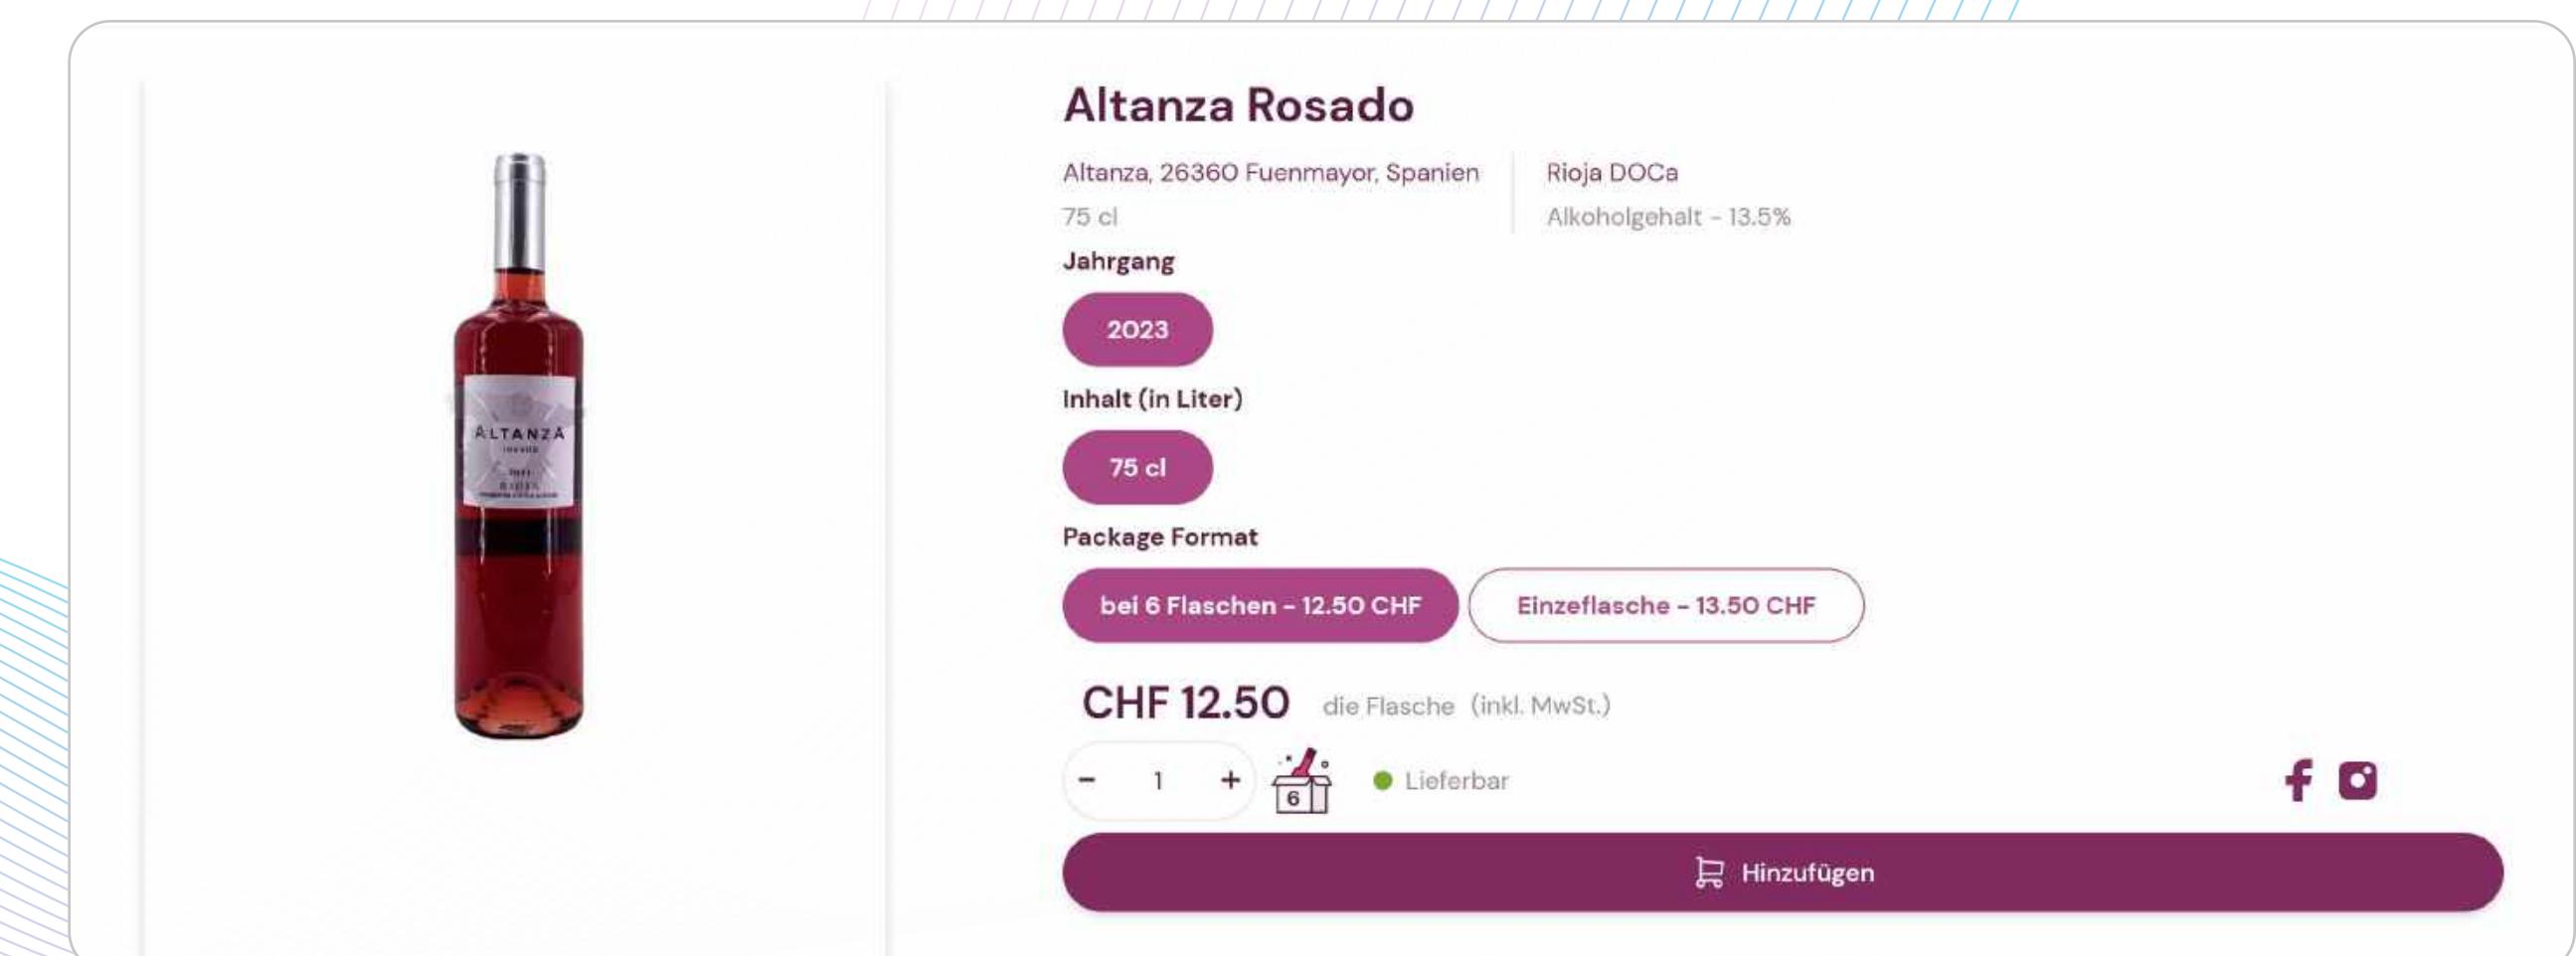

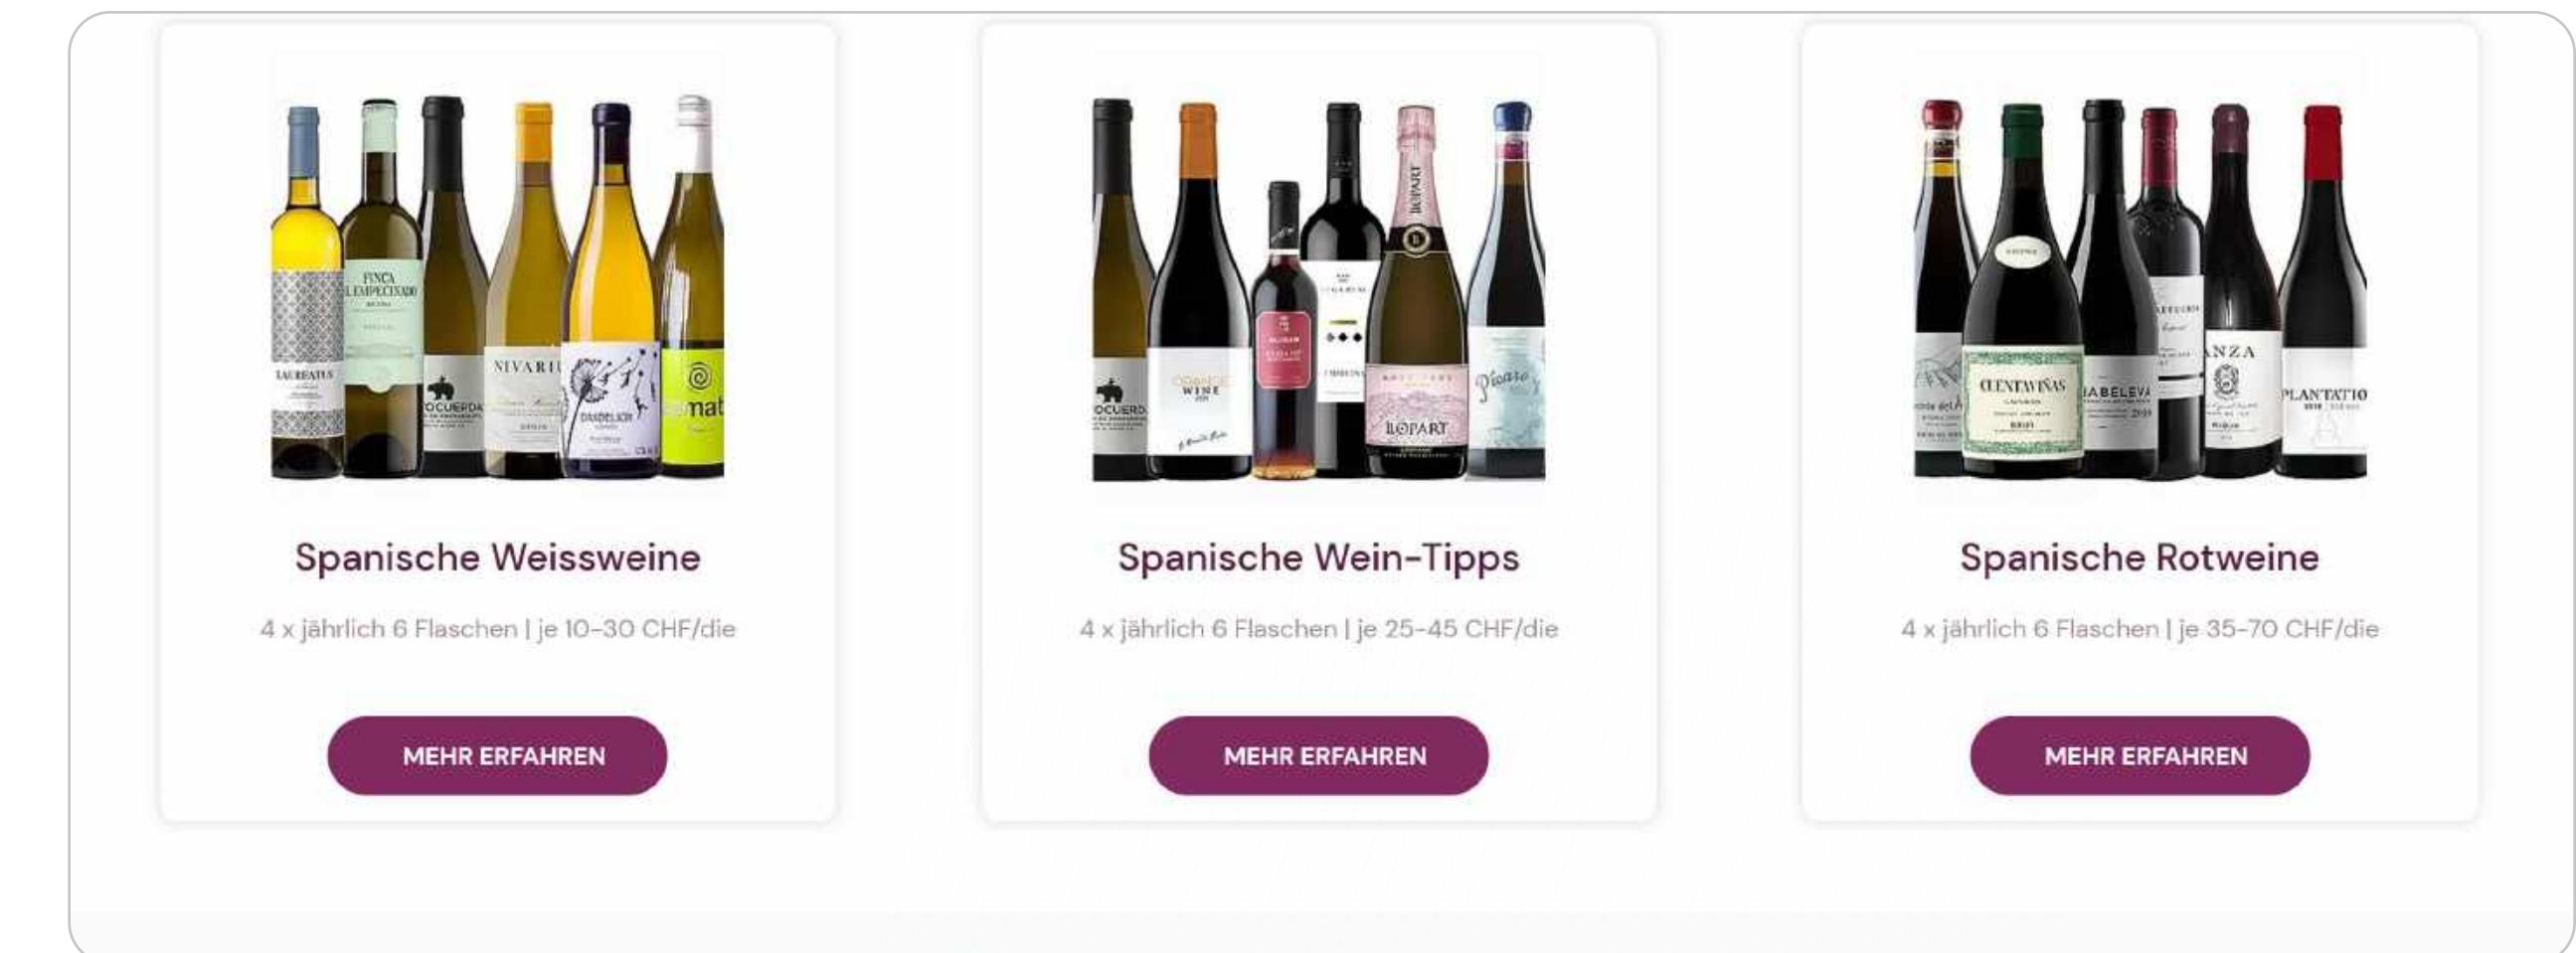

[Spanien Wein](#)

Business Context

Spanien Wein wanted to make their online store better by improving how customers find and buy wines on their website. They needed better product search options, faster website performance, and an easier way for customers to shop and find what they want.

Let us introduce our work with Spanien Wein, an online wine shop based in Switzerland, specializing in Spanish wines. Together, we improved their website to make shopping easier, faster, and more enjoyable. Our continuous support helps Spanien Wein keep their customers happy and grow their business.

Spanien Wein

Value Delivered

01 Faster Website Performance

We improved the loading speed of the Spanien Wein website, making browsing quicker and smoother. The project included a full redesign from scratch and a complete rebuild on Hyvä Themes, resulting in a faster and more intuitive user experience. As a result of the improved UX and performance, the new site achieved a 36% higher conversion rate compared to the previous version.

02 Better User Experience

Enhanced navigation and filters made it easier for customers to find the wines they're looking for.

03 Higher Sales and Satisfaction

These upgrades led to increased wine sales and greater customer satisfaction.

Spanien Wein

Tech stack

The following technologies were employed to create a robust and scalable e-commerce solution:

Magento 2 Open-Source for strong online store functionality

PHP 8.1 for secure, fast website performance

MySQL for organizing website data efficiently

Hyva additional modules (JIT) and plugins to use Pagebuilder features with Tailwind CSS

Implementation from scratch using Hyva theme with Tailwind CSS for a modern and responsive website

Alpine JS for interactive and easy-to-use features. Extended core functionality like Product Listing filters and added data blocks to PDP

Spanien Wein

Solution Overview

Thanks to our teamwork, Spanien Wein now has a successful online store that attracts more customers and helps their business grow steadily:

- We carefully studied Spanien Wein's website and talked to them to **identify their main challenges**;
- We created **an easy-to-use website design** to help customers quickly find wines they want;
- **We improved product search and filtering** to make shopping simple and efficient;
- **We made the website faster**, which means customers spend less time waiting and more time shopping;
- **We set clear goals to track progress**, like better sales results and happier customers.

The screenshot displays the Spanien Wein online store interface. At the top left, a blue button labeled "Spanien Wein" is visible. The main area features a "Warenkorb" (Shopping Cart) summary and a grid of wine products.

Antique and Vintage Furniture Retailer

The Old Cinema

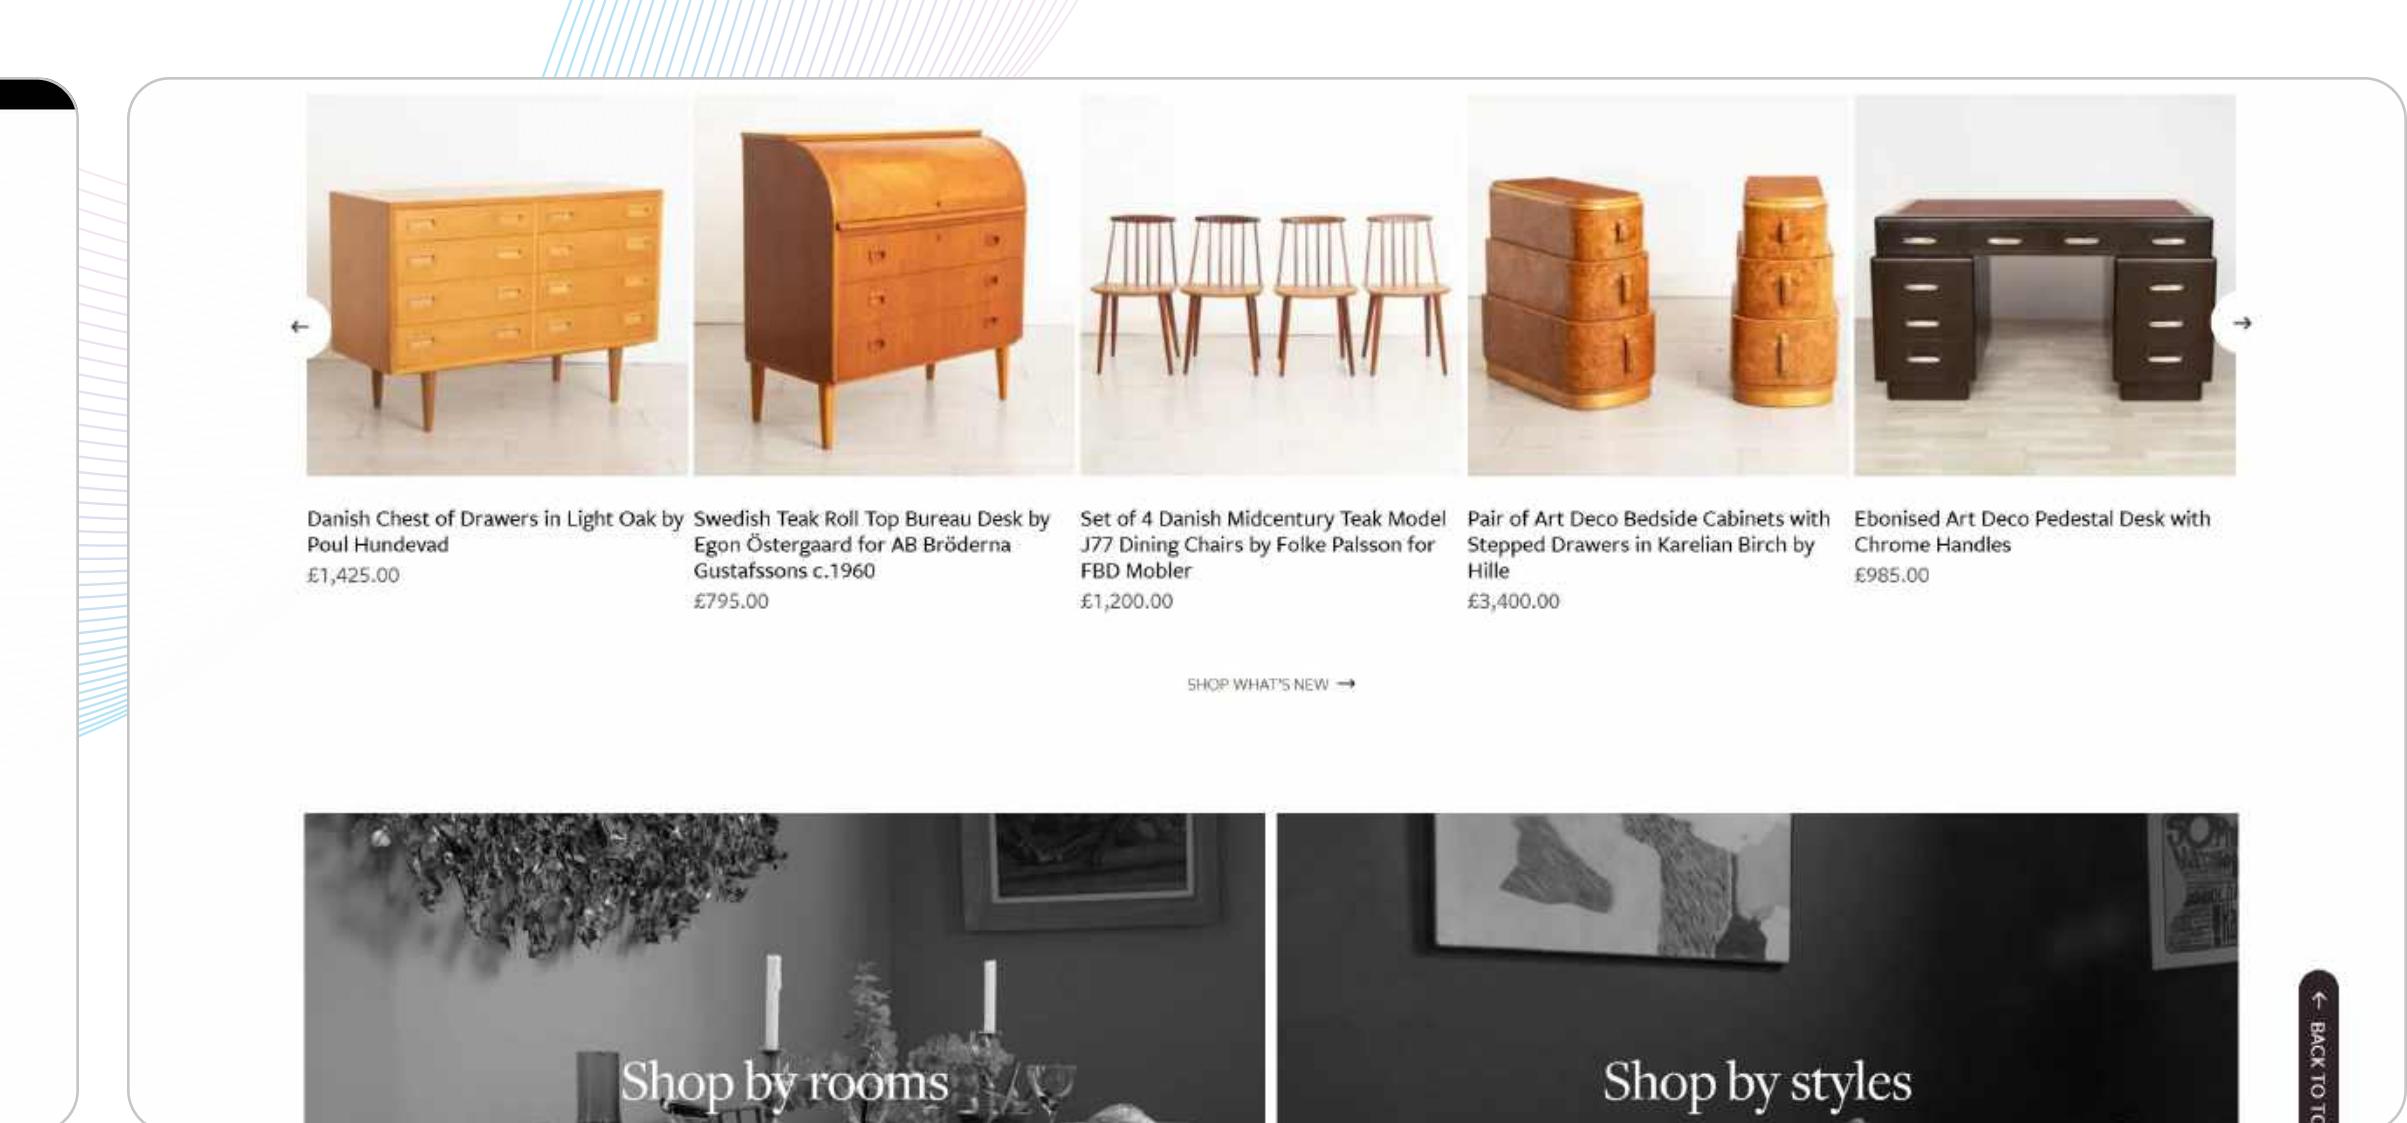

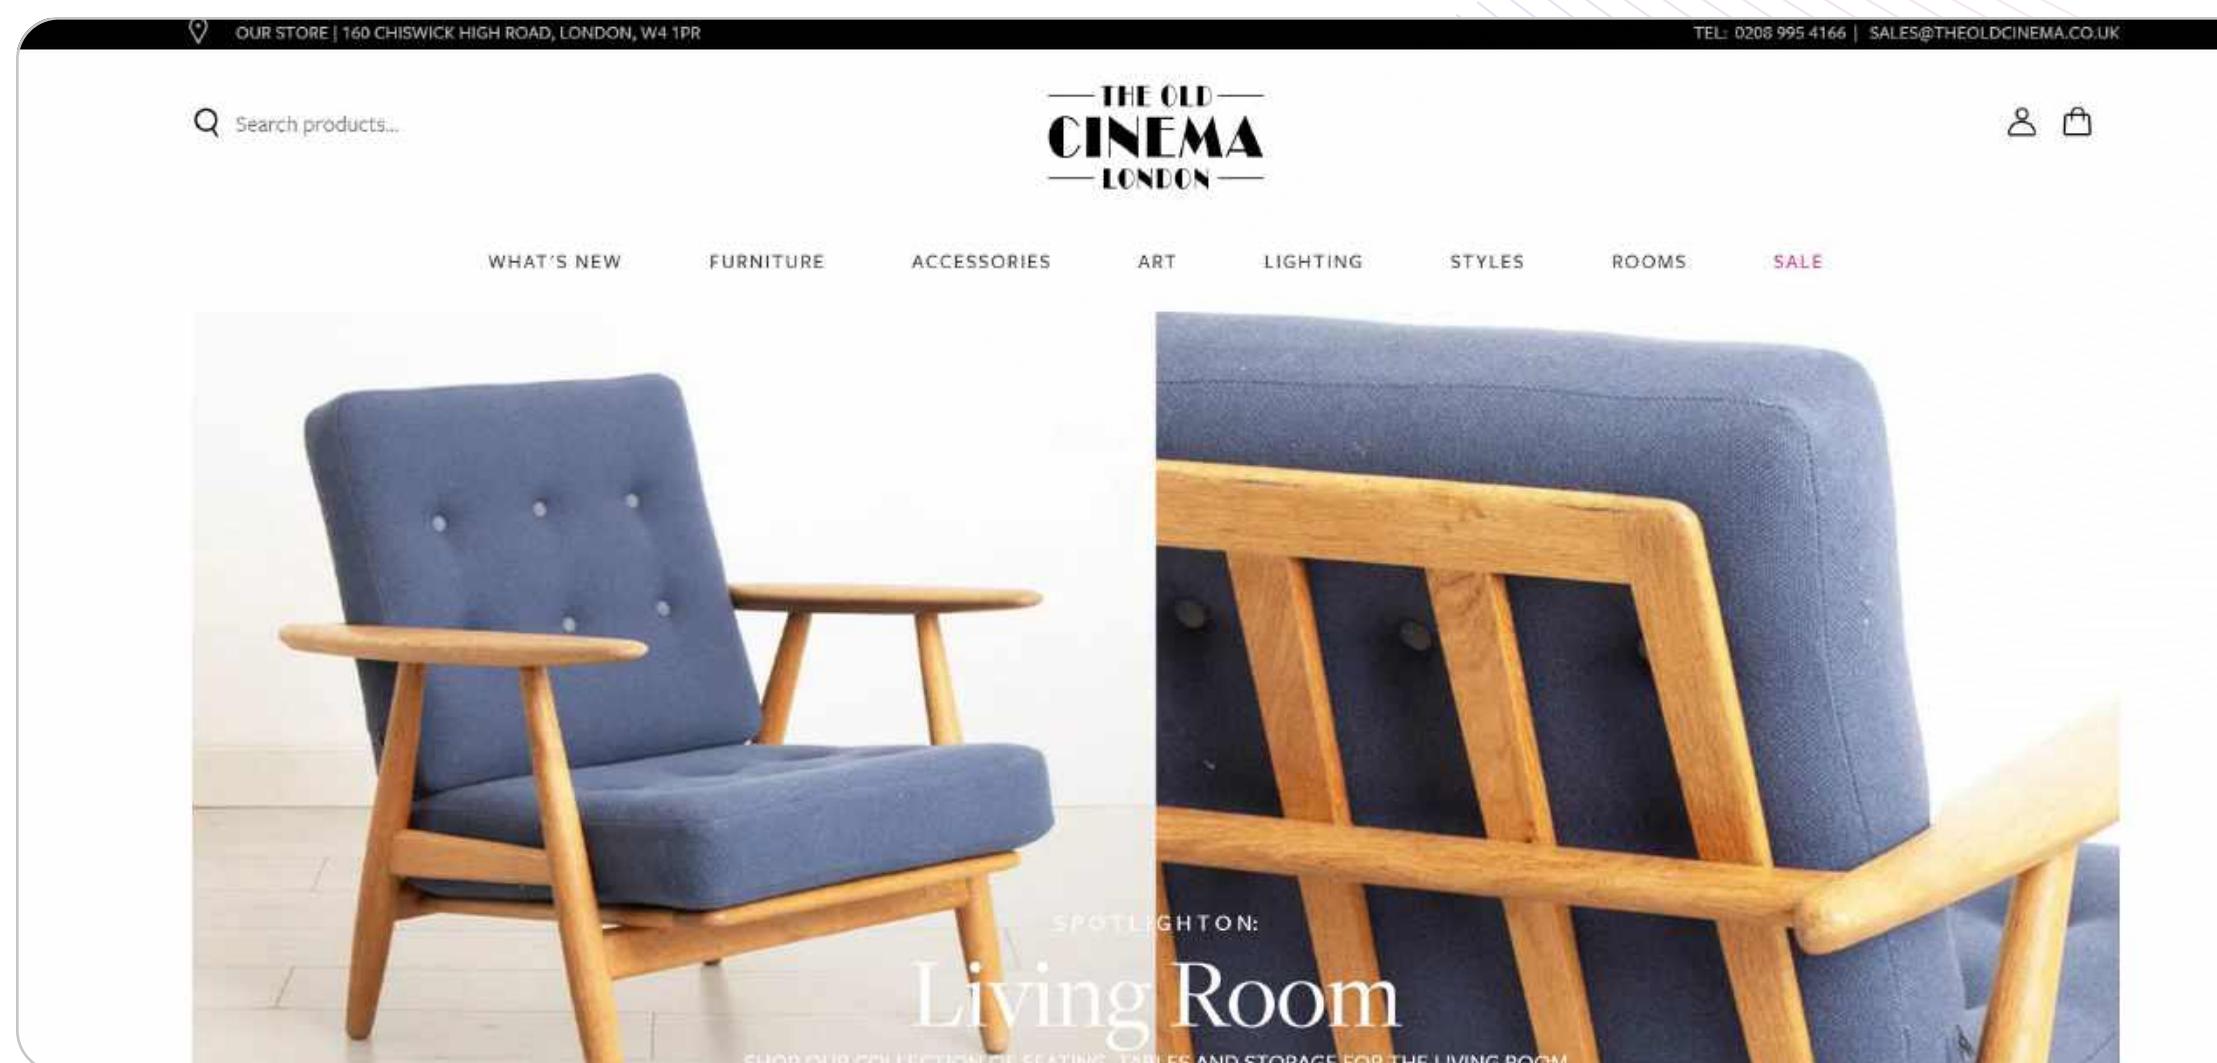

The Old Cinema is a renowned retailer offering an exceptional collection of antique and vintage furniture. They focus on curating unique and high-quality pieces, delivering a distinctive shopping experience to customers looking for rare and beautiful home furnishings.

 **Industry:** eCommerce, Furniture

 **Country:** United Kingdom

 **Team size:** 5

 **Collaboration:** Dec 2017 - Present

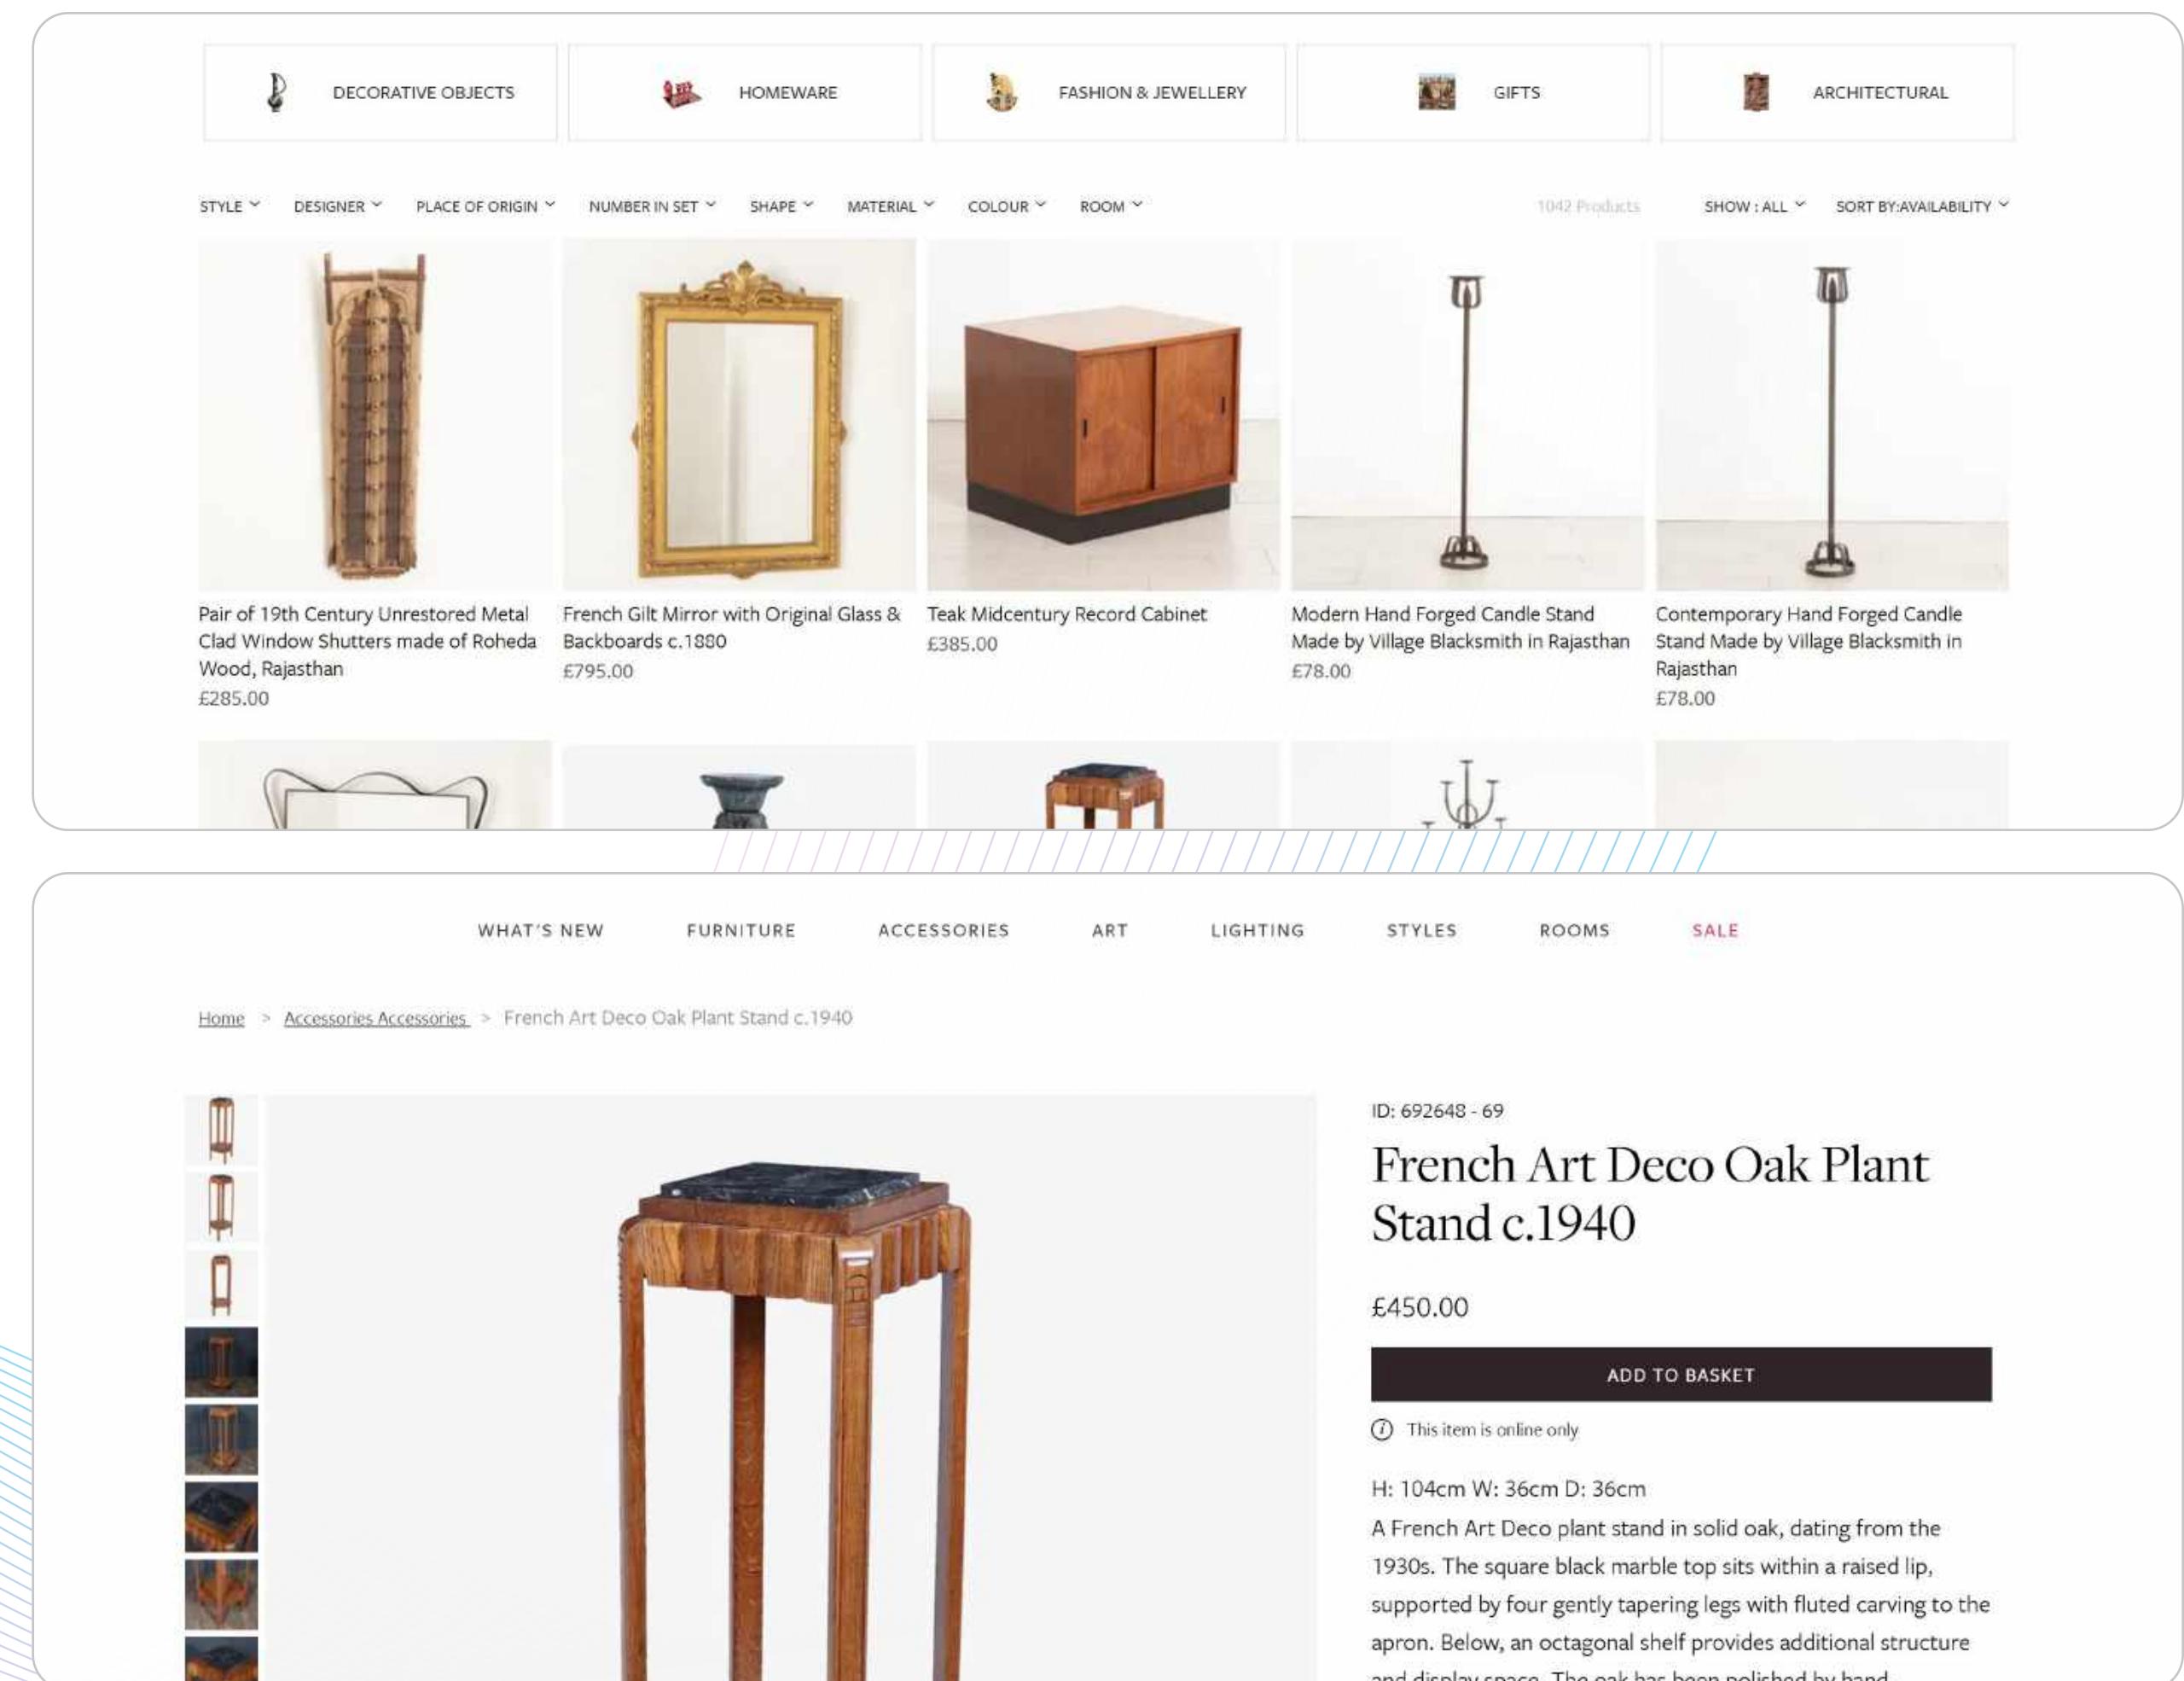

The Old Cinema

Business Context

The Old Cinema aimed to elevate their online presence and strengthen their sales capabilities by upgrading their existing Magento website. Key objectives included enhancing product visibility, simplifying navigation and search functionalities, accelerating website performance, and ensuring reliable, continuous operation to support their sales team's efforts.

Discover our comprehensive collaboration with The Old Cinema, a distinguished online retailer specializing in antique and vintage furniture based in the United Kingdom. We successfully transformed their Magento-based e-commerce platform into a powerful and effective sales tool, significantly improving the user experience, enhancing performance, and supporting their sales team with an efficient and responsive system.

The Old Cinema

Value Delivered

01 Enhanced Online Shopping Experience

Beyond frontend and performance upgrades, we delivered a custom Retail Metrics Dashboard and Dynamic Admin Analytics Suite, giving the client real-time visibility into sales, orders, and customer behavior. As a result, order processing time decreased by 22%, ROAS improved by 18% through smarter SKU targeting, inventory decisions became more accurate thanks to daily sales insights, and internal reporting efforts were reduced by over 10 hours per week.

02 Empowered Sales Team

With a more responsive and stable platform, The Old Cinema's sales team can now engage with customers more effectively and close sales faster, improving overall productivity.

03 Optimized Platform Performance

The website now features faster loading times, intuitive product navigation, and reliable performance — all of which contribute to higher customer satisfaction and increased sales.

The Old Cinema

Tech stack

The following technologies were employed to create a robust and scalable e-commerce solution:

Magento 2 for robust and scalable e-commerce functionality

PHP 8.1 for optimized and stable backend performance. Strictly followed PSR standards during implementation

MySQL as a database for efficient, reliable data management

Used Luma theme with native tech stack HTML, CSS, and Less for modern, responsive, and aesthetically pleasing front-end development

REST APIs for seamless system integration and improved overall website performance

The Old Cinema

Solution Overview

Through our collaborative efforts, The Old Cinema now operates an advanced, user-friendly e-commerce platform, effectively supporting their sales team, enhancing customer engagement, and promoting sustained business growth:

- Conducted thorough analysis and identified areas requiring enhancement,** focusing on user navigation and sales workflow optimization;
- Enhanced site functionalities** with advanced product filtering and search capabilities, facilitating quick product discovery and seamless transactions;
- Implemented substantial performance optimizations,** significantly reducing page load times and improving website responsiveness;
- Delivered ongoing, proactive technical support,** ensuring uninterrupted operations and reliability;
- Established clear performance indicators,** focusing on sales growth, customer retention, and operational efficiency.

The screenshot displays two pages of The Old Cinema's e-commerce site:

US-based Pool Supply Franchise

Pinch A Penny

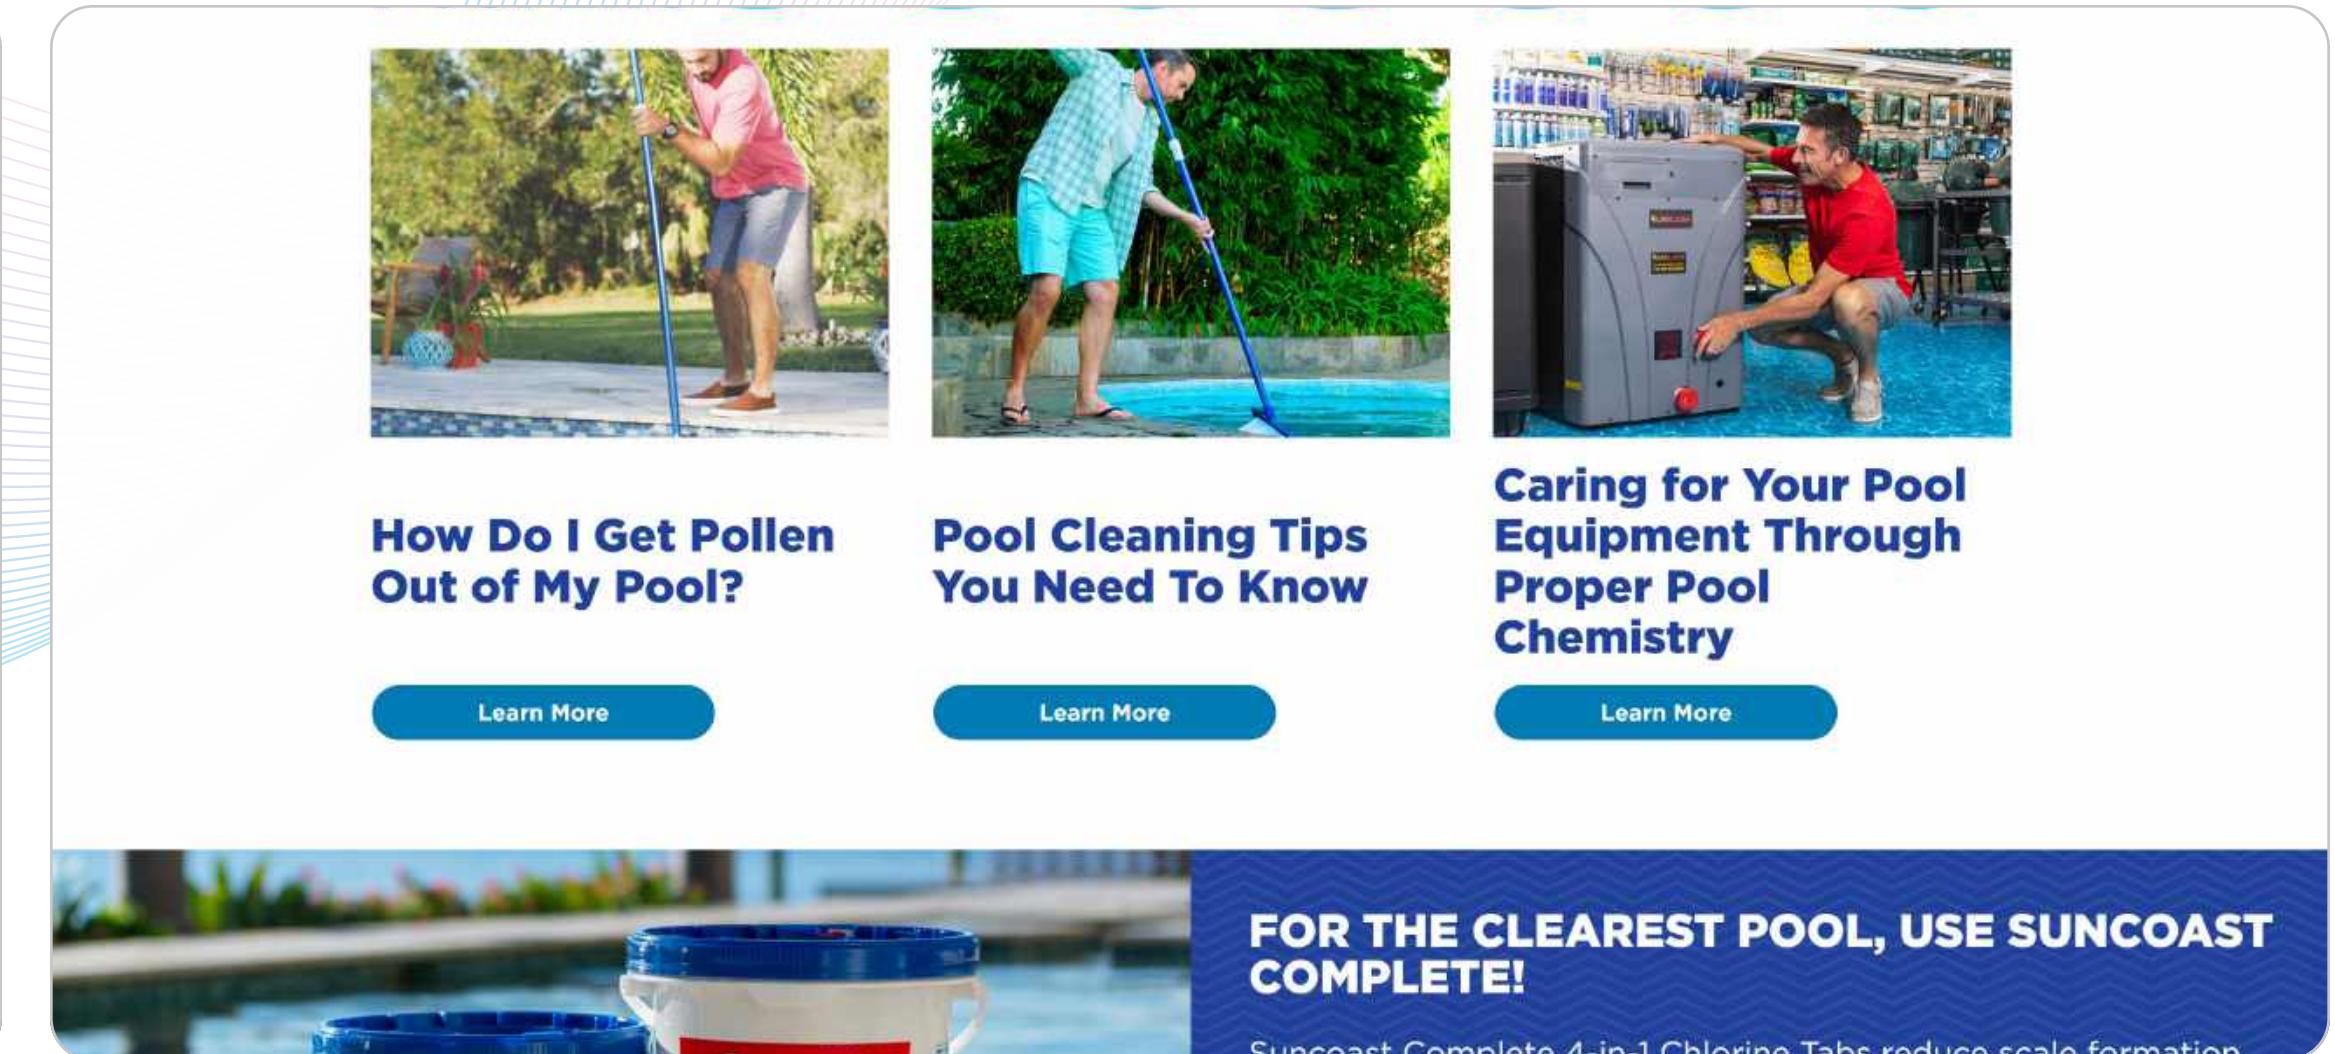

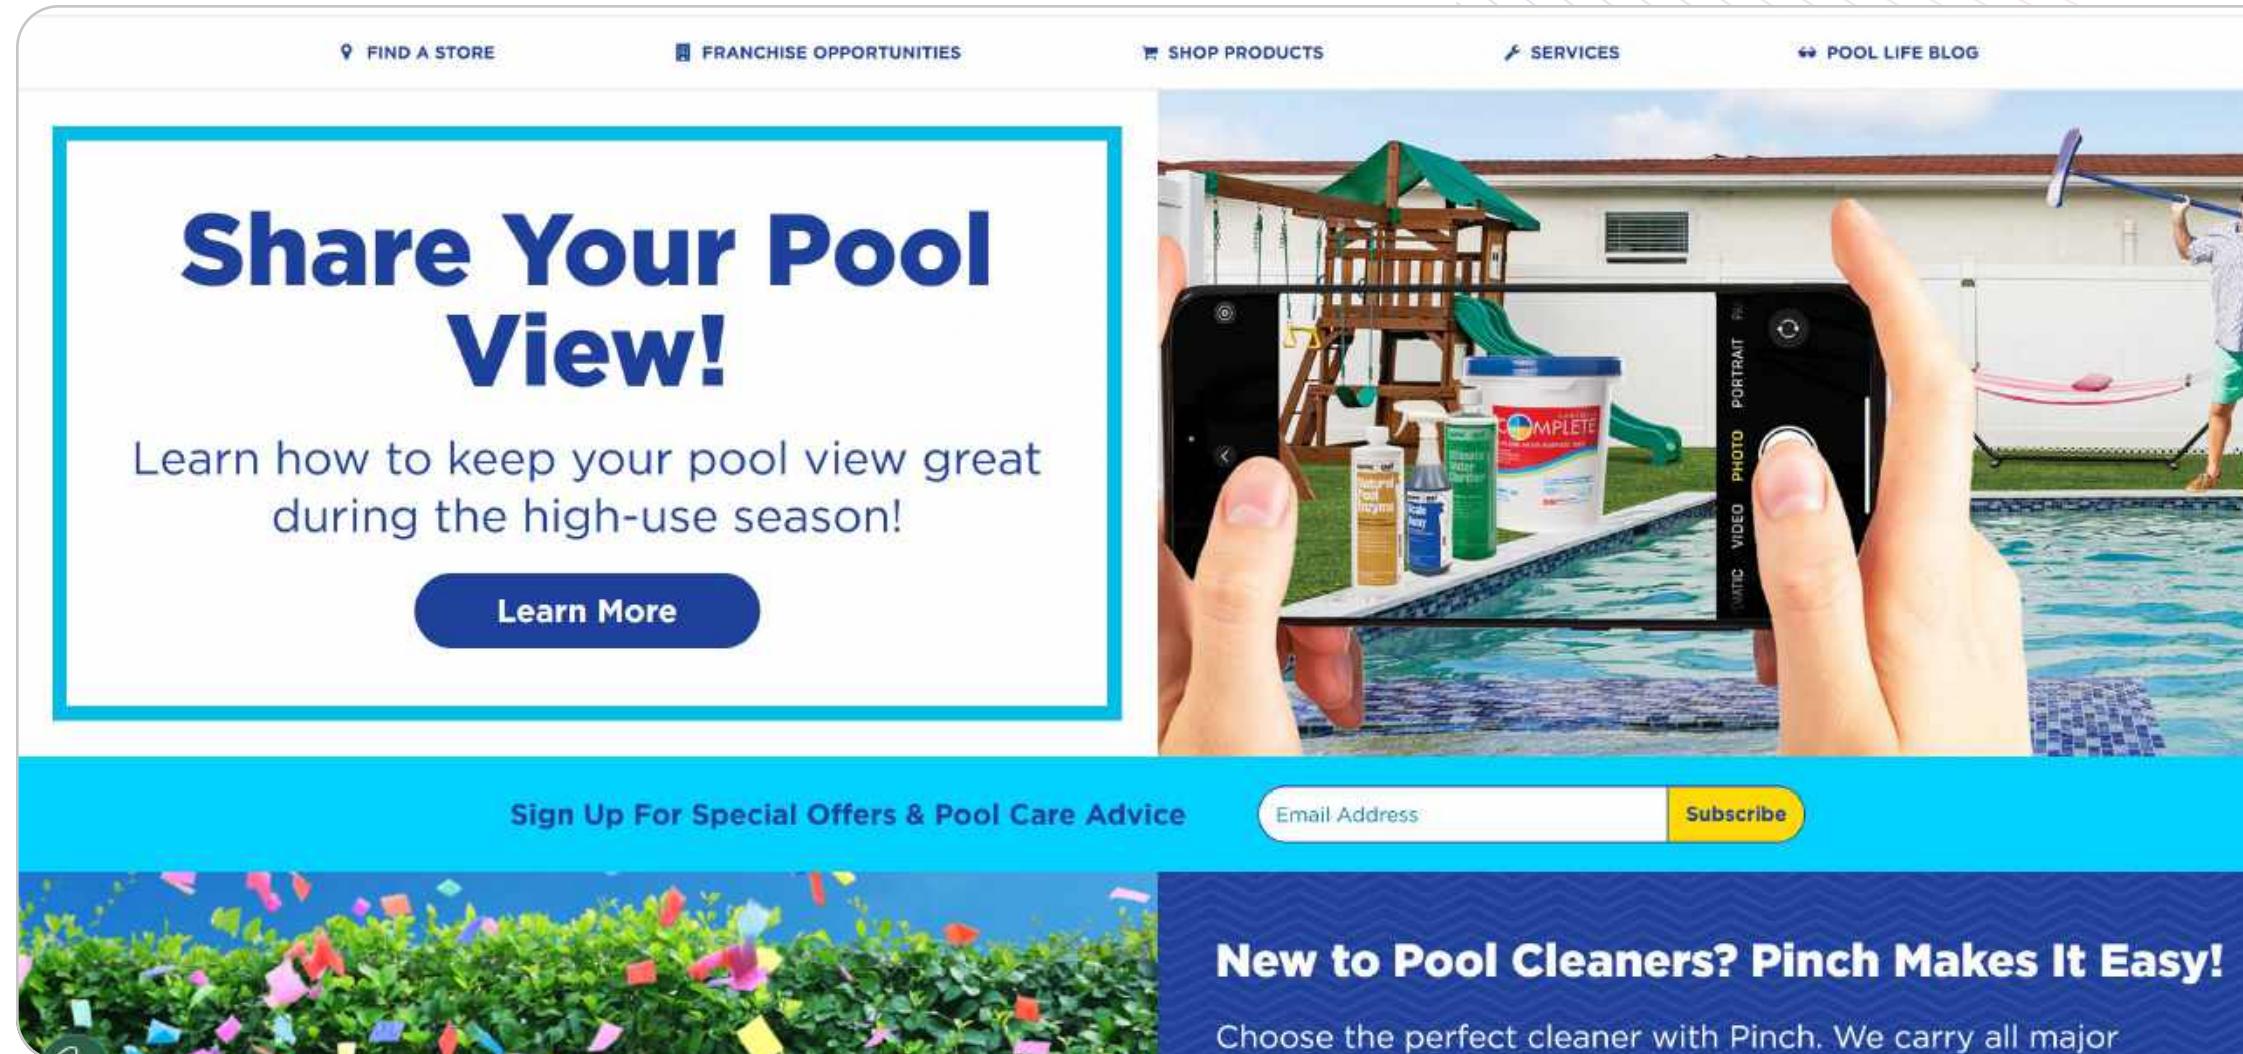

Pinch A Penny is a large pool supply and service franchise with over 250 store locations across the United States. They offer pool chemicals, equipment, parts, and maintenance services through a strong retail presence and a growing online platform. As a franchise business, their operations required tailored solutions for inventory visibility, location-level management, and scalable eCommerce capabilities.

 **Industry:** Retail, Home & Garden

 **Country:** United States

 **Team size:** 4

 **Collaboration:** April 2019 – Present

Pinch A Penny

Business Context

Pinch A Penny approached us to unify their online retail presence while enabling individual franchise stores to operate semi-independently within a centralized system. They needed to upgrade from their legacy setup, which involved multiple systems including Shopify, and move to a scalable Adobe Commerce (Magento Enterprise) infrastructure that could support cross-location inventory management, payments, and mobile integration.

Learn how we helped Pinch A Penny, a leading pool supply and service franchise in the US, modernize its multi-location eCommerce operations and streamline franchisee workflows. By upgrading their Adobe Commerce platform, developing custom integrations with mobile apps and payments, and creating a private B2B buying experience for franchise owners, we enabled smarter inventory control, faster order processing, and a smoother customer experience across the board.

The screenshot displays two pages from the Pinch A Penny website built on Adobe Commerce:

- Suncoast All In One Algaecide Product Page:** Shows a white plastic jug of Suncoast All In One Algaecide. The product ID is 00910372, the price is \$69.99 for 1/2 Gallon, and there is a quantity selector set to 1. A blue "Add to Cart" button is visible. The page includes navigation links for FIND A STORE, FRANCHISE OPPORTUNITIES, SHOP PRODUCTS, SERVICES, and POOL LIFE BLOG.
- Pumps & Motors Category Page:** Shows a grid of four different pump models. At the top right of the grid, there is a dropdown menu labeled "Items Per Page: 12". The page also includes navigation links for Home, Pool & Spa Equipment, and Pumps & Motors.

Pinch A Penny

Value Delivered

01

Franchise-Ready Architecture

Built a scalable Adobe Commerce solution that centralized operations while allowing each franchise control over payments, inventory, and user access.

02

Efficiency & Collaboration

Improved order accuracy, sped up transactions, and strengthened collaboration between HQ and franchisees.

03

Better User Experience

Rebuilt the storefront for a smoother, more engaging customer journey.

Pinch A Penny

Tech stack

The project utilized a robust and modular tech stack including:

Adobe Commerce (Magento Enterprise) for advanced multi-store eCommerce capabilities

PHP & MySQL for backend and data handling

Knockout.js & JavaScript for dynamic front-end interactions

AWS for scalable and secure cloud hosting

Custom REST API development for seamless integration with third-party systems and mobile apps

Pinch A Penny

Solution Overview

By delivering a fully integrated, franchise-ready eCommerce platform, we empowered Pinch A Penny to better serve its franchise network and end customers — with speed, precision, and flexibility. Our collaboration continues with ongoing support and strategic improvements:

- **Upgraded Adobe Commerce to the Enterprise version** and deployed it on a custom AWS setup for enhanced performance, scalability, and reliability;
- Developed a secure B2B portal, store-specific inventory tools, tailored payment options, and a custom “Find a Store” page — **all optimized for franchise operations**;
- **Redesigned the storefront from the ground up** to deliver a responsive, user-friendly shopping experience across devices;
- **Integrated mobile apps via custom APIs**, implemented location-specific payment gateways, and provided ongoing maintenance to ensure platform stability.

The screenshot displays two main sections of the Pinch A Penny website:

- Shopping Cart:** Shows a single item: Suncoast All In One Algaecide (00910372) at \$69.99 for 1/2 Gallon. The cart total is \$69.99. It includes a summary section with subtotal (\$69.99), estimated tax, and shipping/taxes information. There is also a discount code input field and a "Proceed to Checkout" button.
- Pool Cleaning & Maintenance:** Features a large image of a man cleaning a swimming pool. Below the image are "Pool Cleaning Options" with numbered steps: 1. WATER TESTING (described as a seven-point water test) and 6. FILTER CLEANING (described as servicing all types of filters). A yellow "GET A QUOTE" button is visible on the right.

US-Based Workwear Brand

Kinco

Kinco® is a US-based brand known for high-quality, durable gloves and protective workwear. With a loyal customer base across retail, industrial, and B2B channels, Kinco needed a powerful eCommerce platform to match their growing digital ambitions and support both direct and wholesale transactions.

Industry: Retail, Apparel

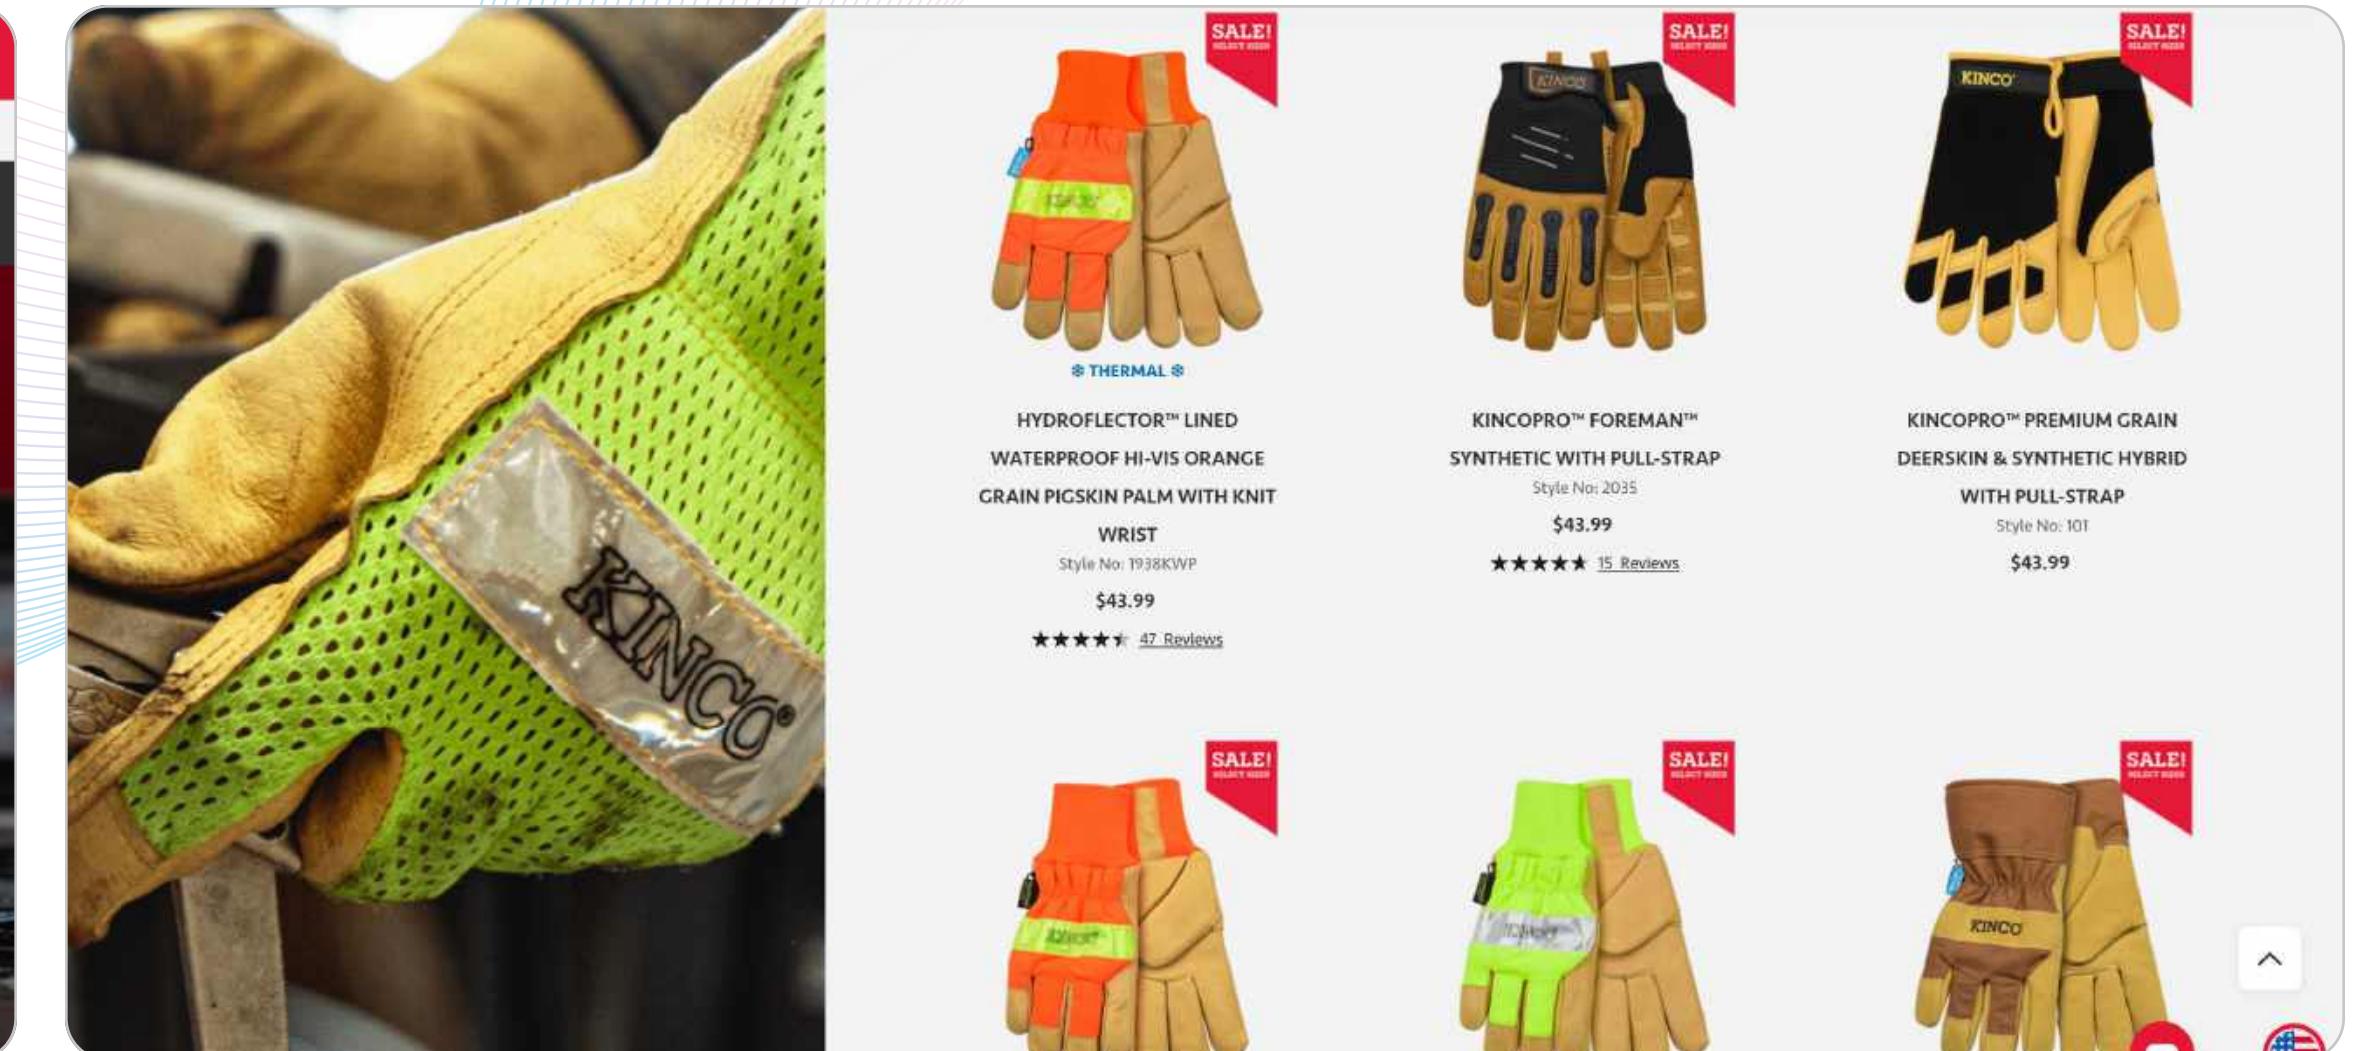

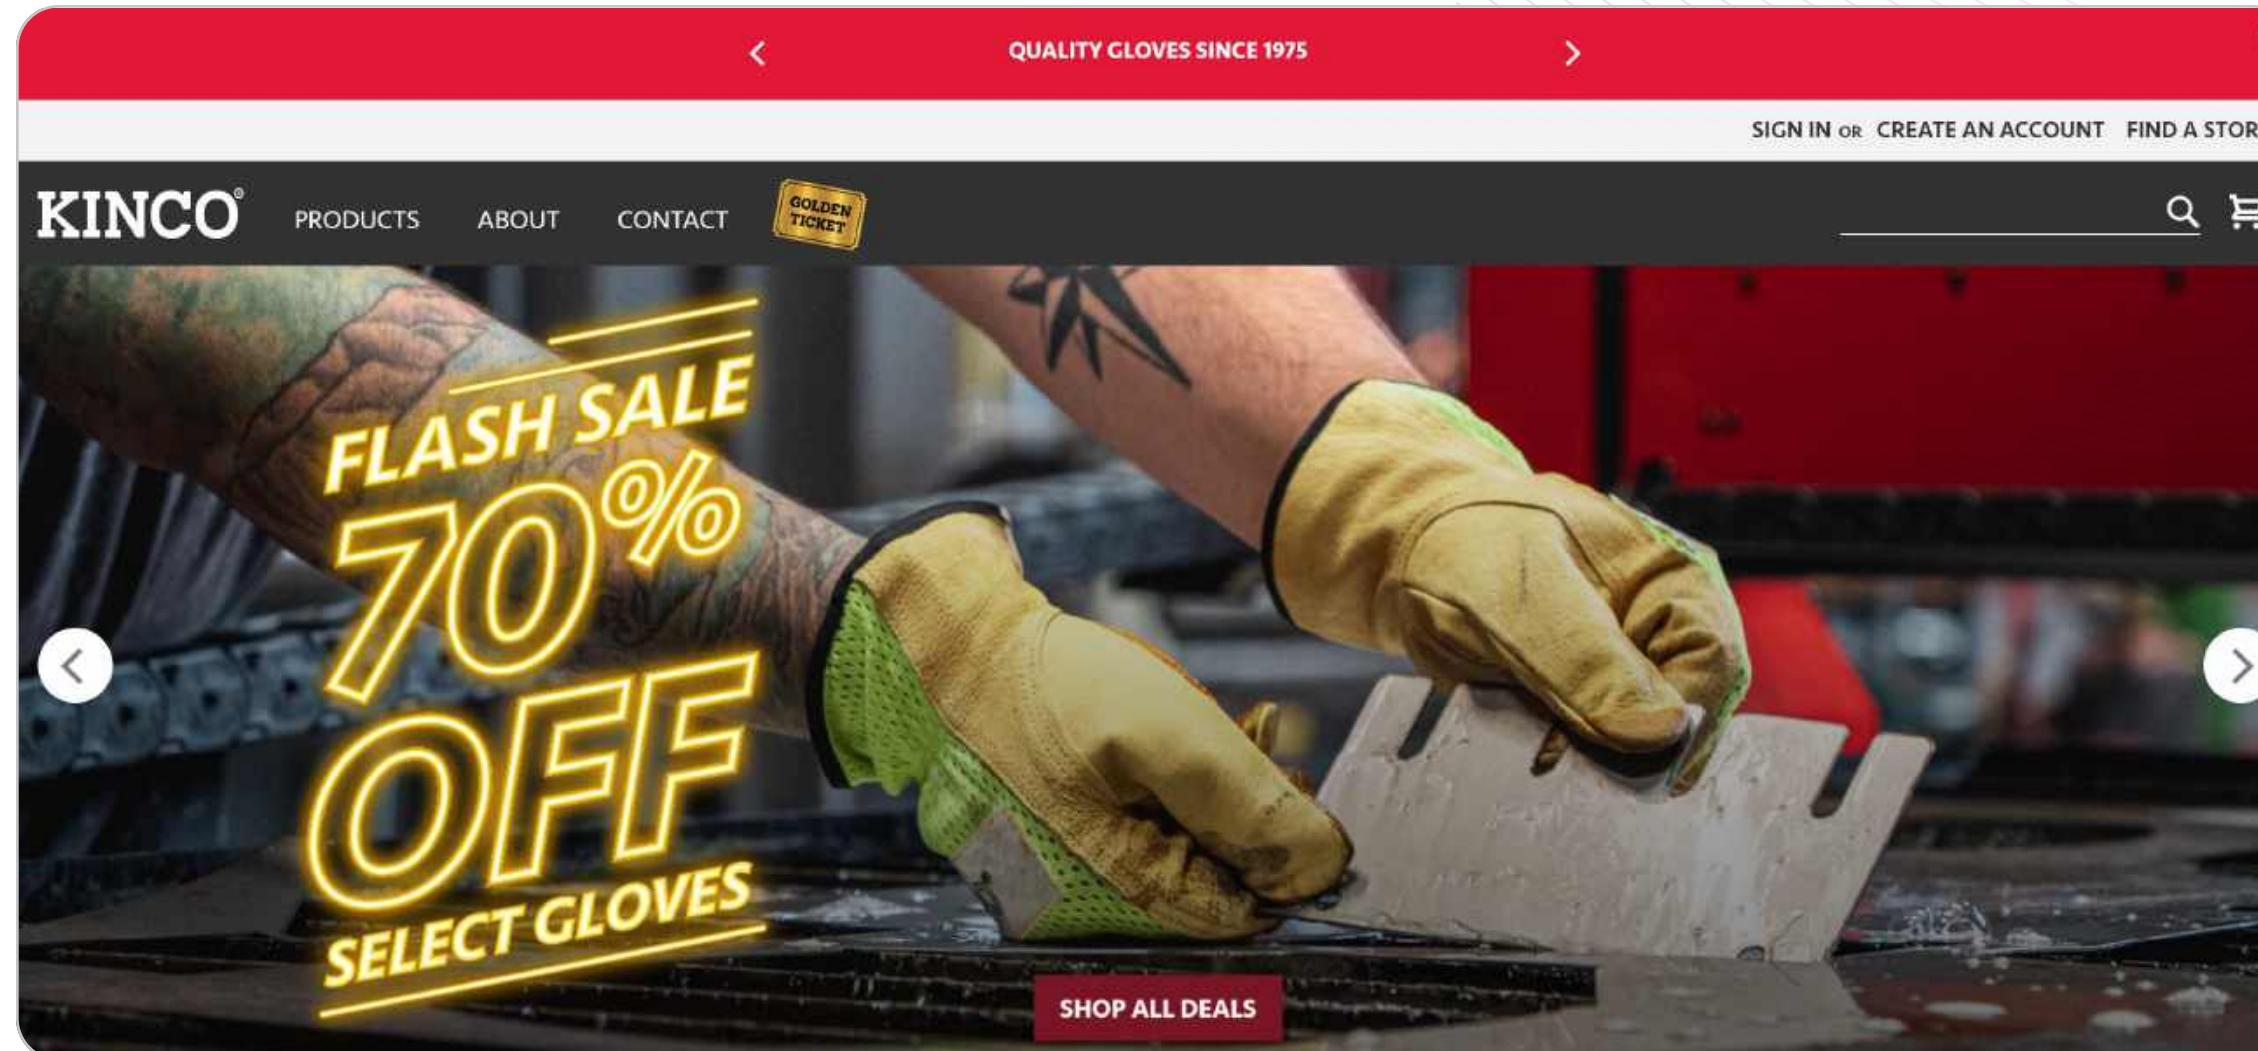

Country: United States

Team size: 5

Collaboration:
Jan 2021 – Present

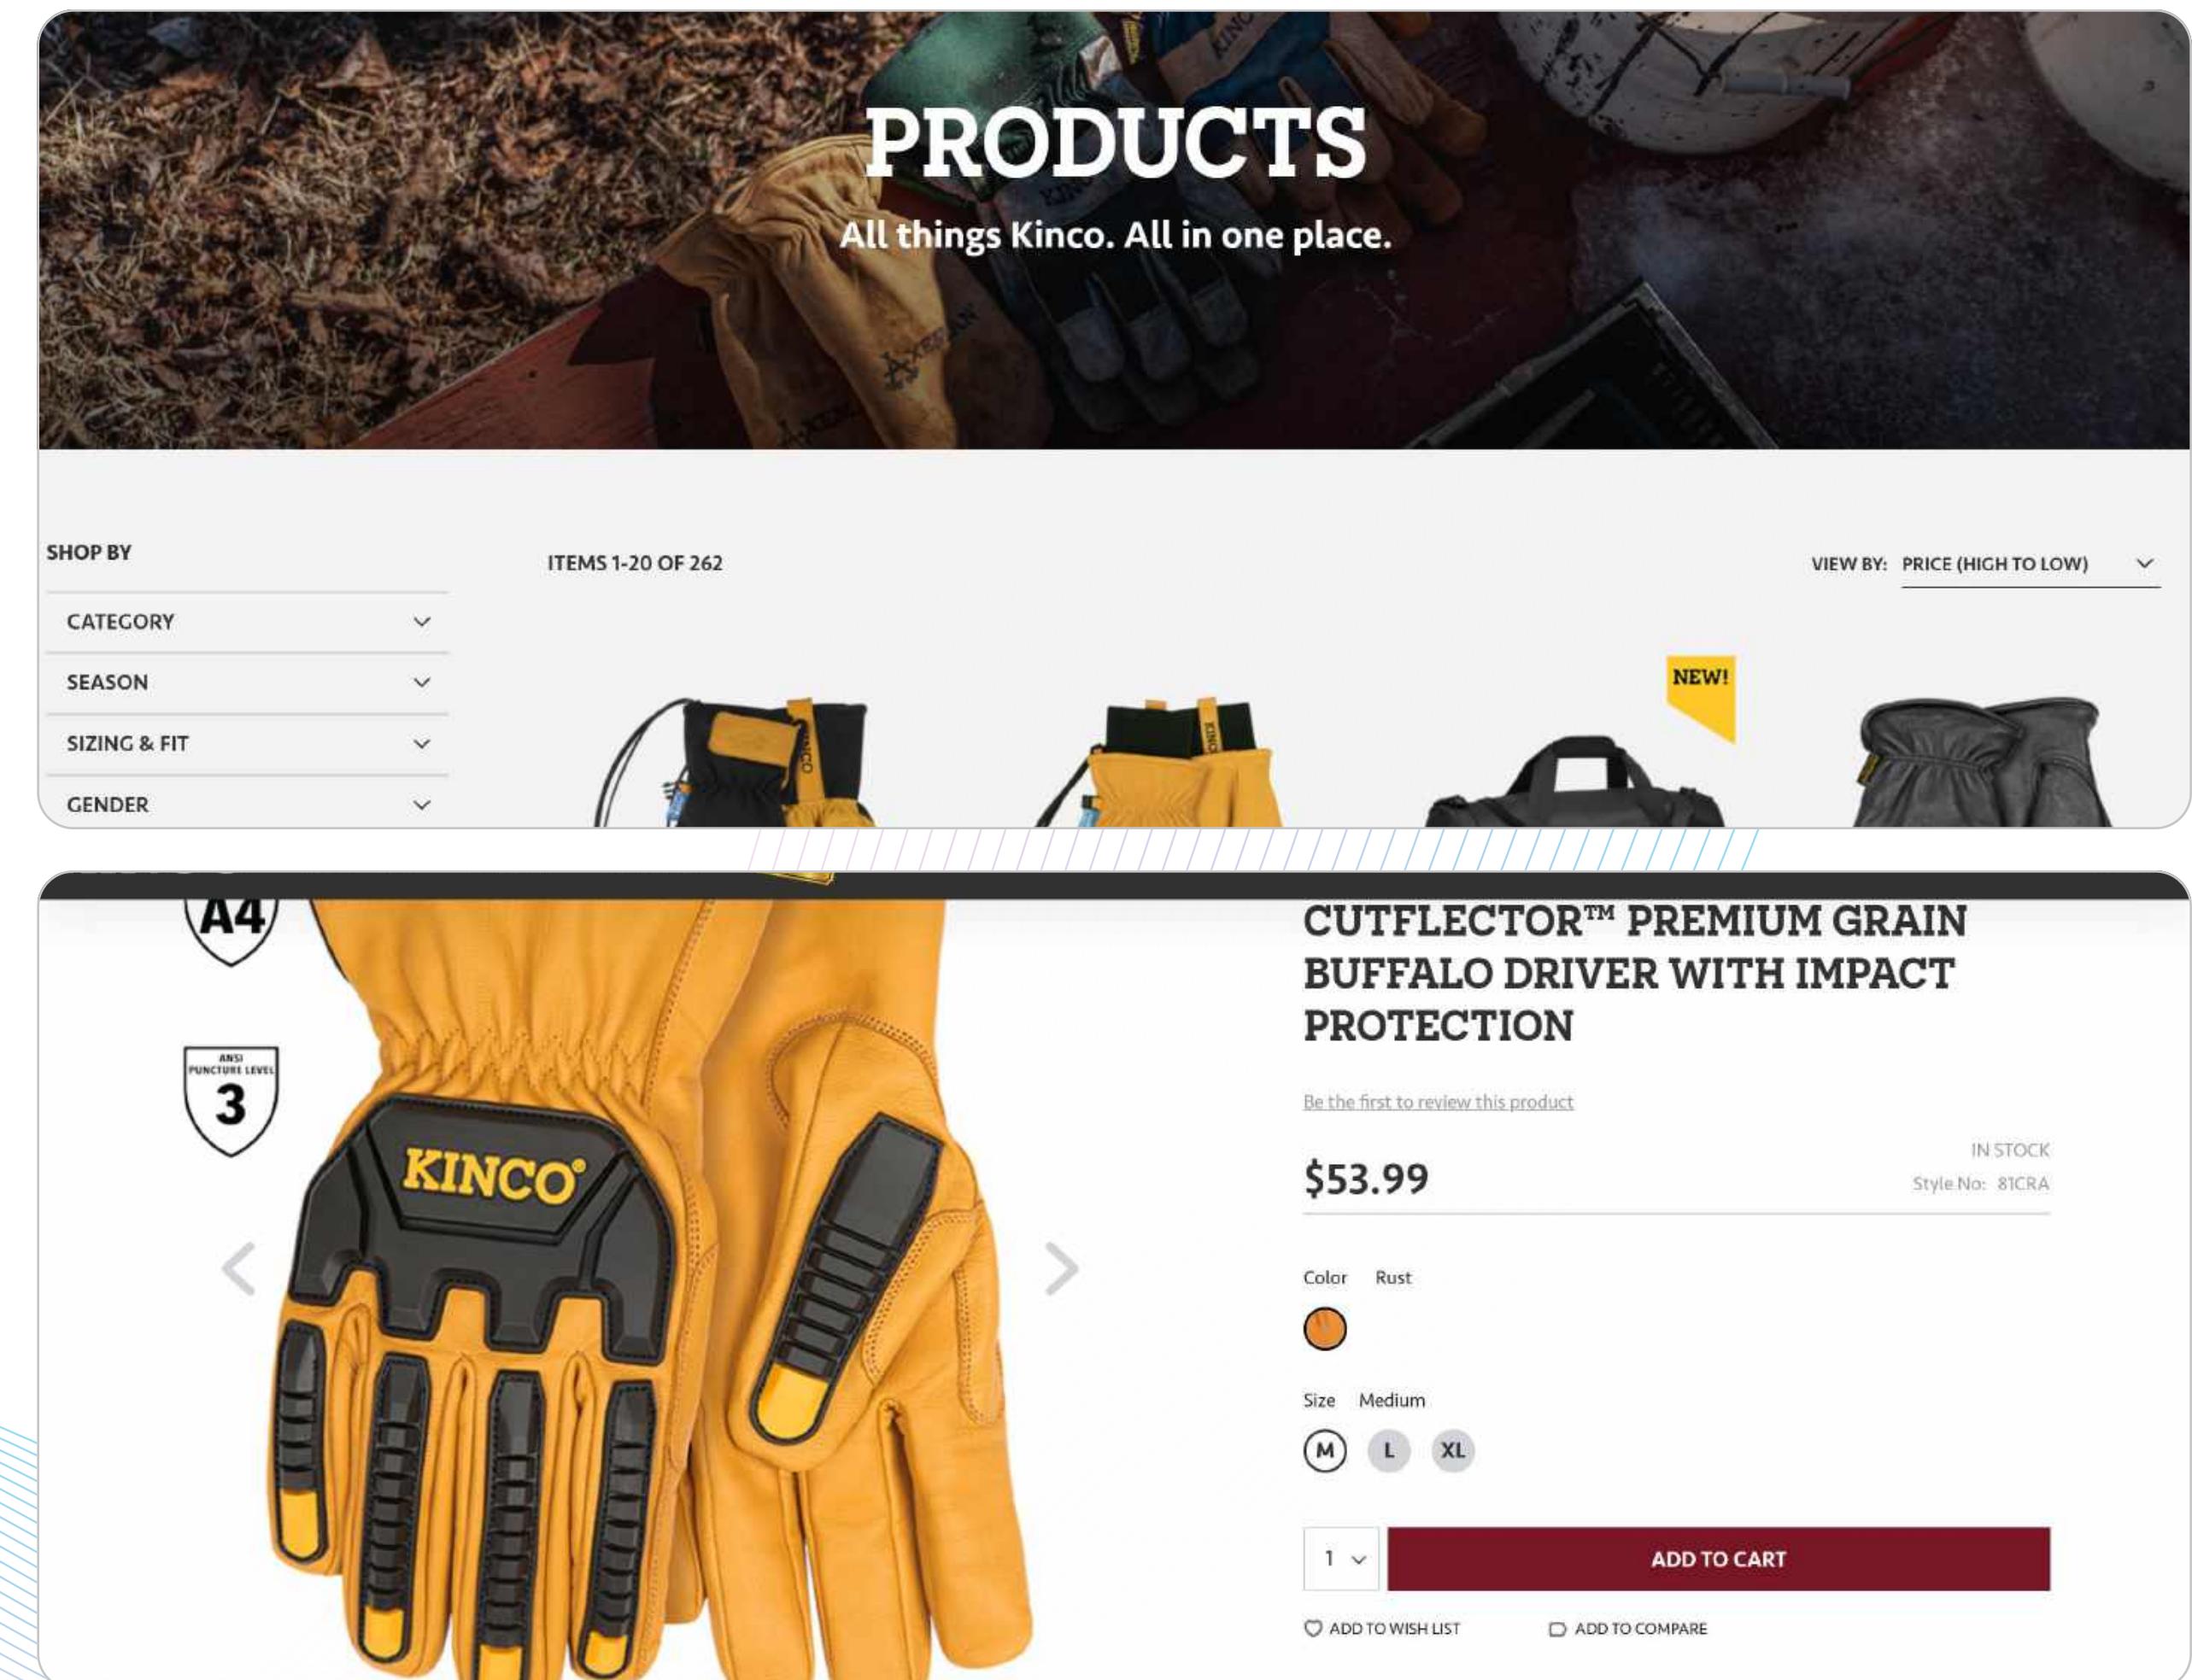

Kinco

Business Context

Kinco was transitioning away from legacy systems and needed a new eCommerce platform capable of supporting custom B2B pricing, complex checkout workflows, and deep ERP integration with Microsoft Dynamics GP. The project required both technical and UX expertise to deliver a site that could cater to industrial buyers and end consumers alike — all while remaining on-brand and fast.

Learn how we partnered with Kinco, a leading glove and workwear manufacturer, to launch a modern, scalable Adobe Commerce Cloud platform from scratch. By combining thoughtful UX/UI design with deep B2B and B2C functionality, complex ERP integrations, and infrastructure optimization, we built a solution ready to serve Kinco's expanding digital commerce needs.

Kinco

Value Delivered

We delivered a full-scale digital transformation on Adobe Commerce Cloud, including:

01 End-to-end delivery

Initial design concepts and user journey mapping to high-fidelity UI/UX prototypes.

02 Integrated systems

Seamless ERP and tax system integration, flexible B2B workflows, and custom product logic.

03 Optimized performance

Advanced infrastructure tuning for a fast, scalable, and user-friendly eCommerce experience.

Kinco

Tech stack

The following technologies were employed to create a robust and scalable e-commerce solution:

Adobe Commerce Cloud (Magento Enterprise)

Microsoft Dynamics GP (ERP Integration)

Avalara (Tax Automation)

Zendesk (Support & Chat)

Blackfire.io for profiling website performance

Fastly (Performance Optimization, cache and optimized images)

PHP, MySQL, JavaScript

Solution Overview

This end-to-end solution allows Kinco to efficiently serve both retail and wholesale customers, support operational growth, and deliver a polished digital experience consistent with their trusted brand.

- **Custom-built Adobe Commerce Cloud site**, designed and developed from scratch;
- **UX/UI design process**, including wireframes, prototypes, and visual design aligned with Kinco's brand;
- **Microsoft Dynamics GP integration** for real-time product, inventory, and pricing sync;
- **Integration with Avalara** for automated tax calculation across regions;
- **Zendesk integration**, including chatbot support and ticketing for customer service;
- **Performance infrastructure setup**, including Blackfire, Fastly, and other optimization tools;
- **Custom B2B features**, including customer-specific pricing, shipping rules, payment methods, and minimum order logic.

Precision Instrumentation Manufacturer

Whitman Controls

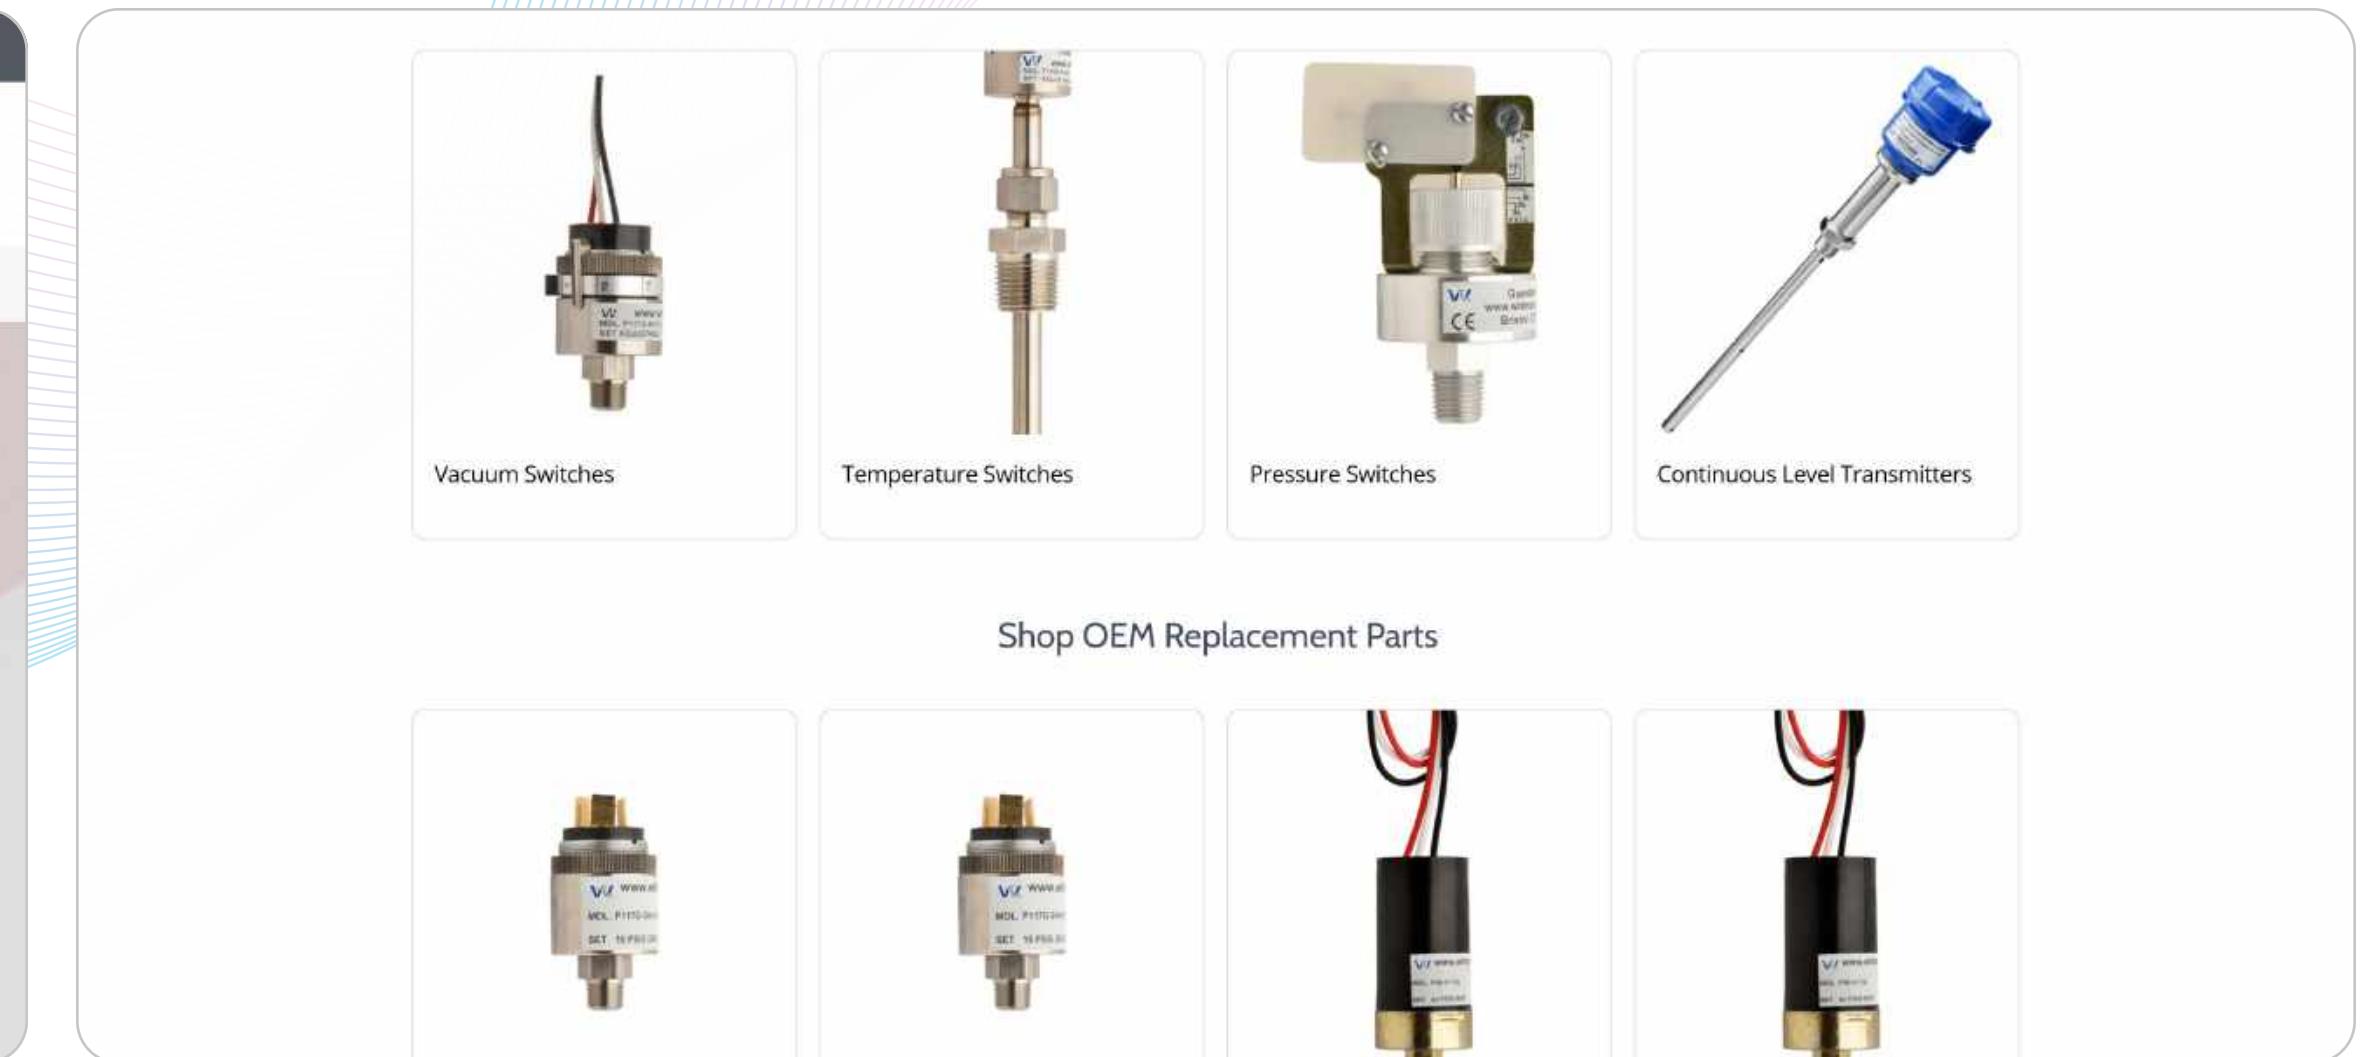

Whitman Controls is a family-owned business based in the US, known for its high-performance pressure, vacuum, and liquid level switches for OEMs and industrial applications. With a history dating back to 1976, the company prides itself on product reliability, customization capabilities, and a deep commitment to customer support.

 **Industry:**
Manufacturing, Industrial B2B

 **Country:** United States

 **Team size:** 2

 **Collaboration:**
Jan 2020 - Mar 2022

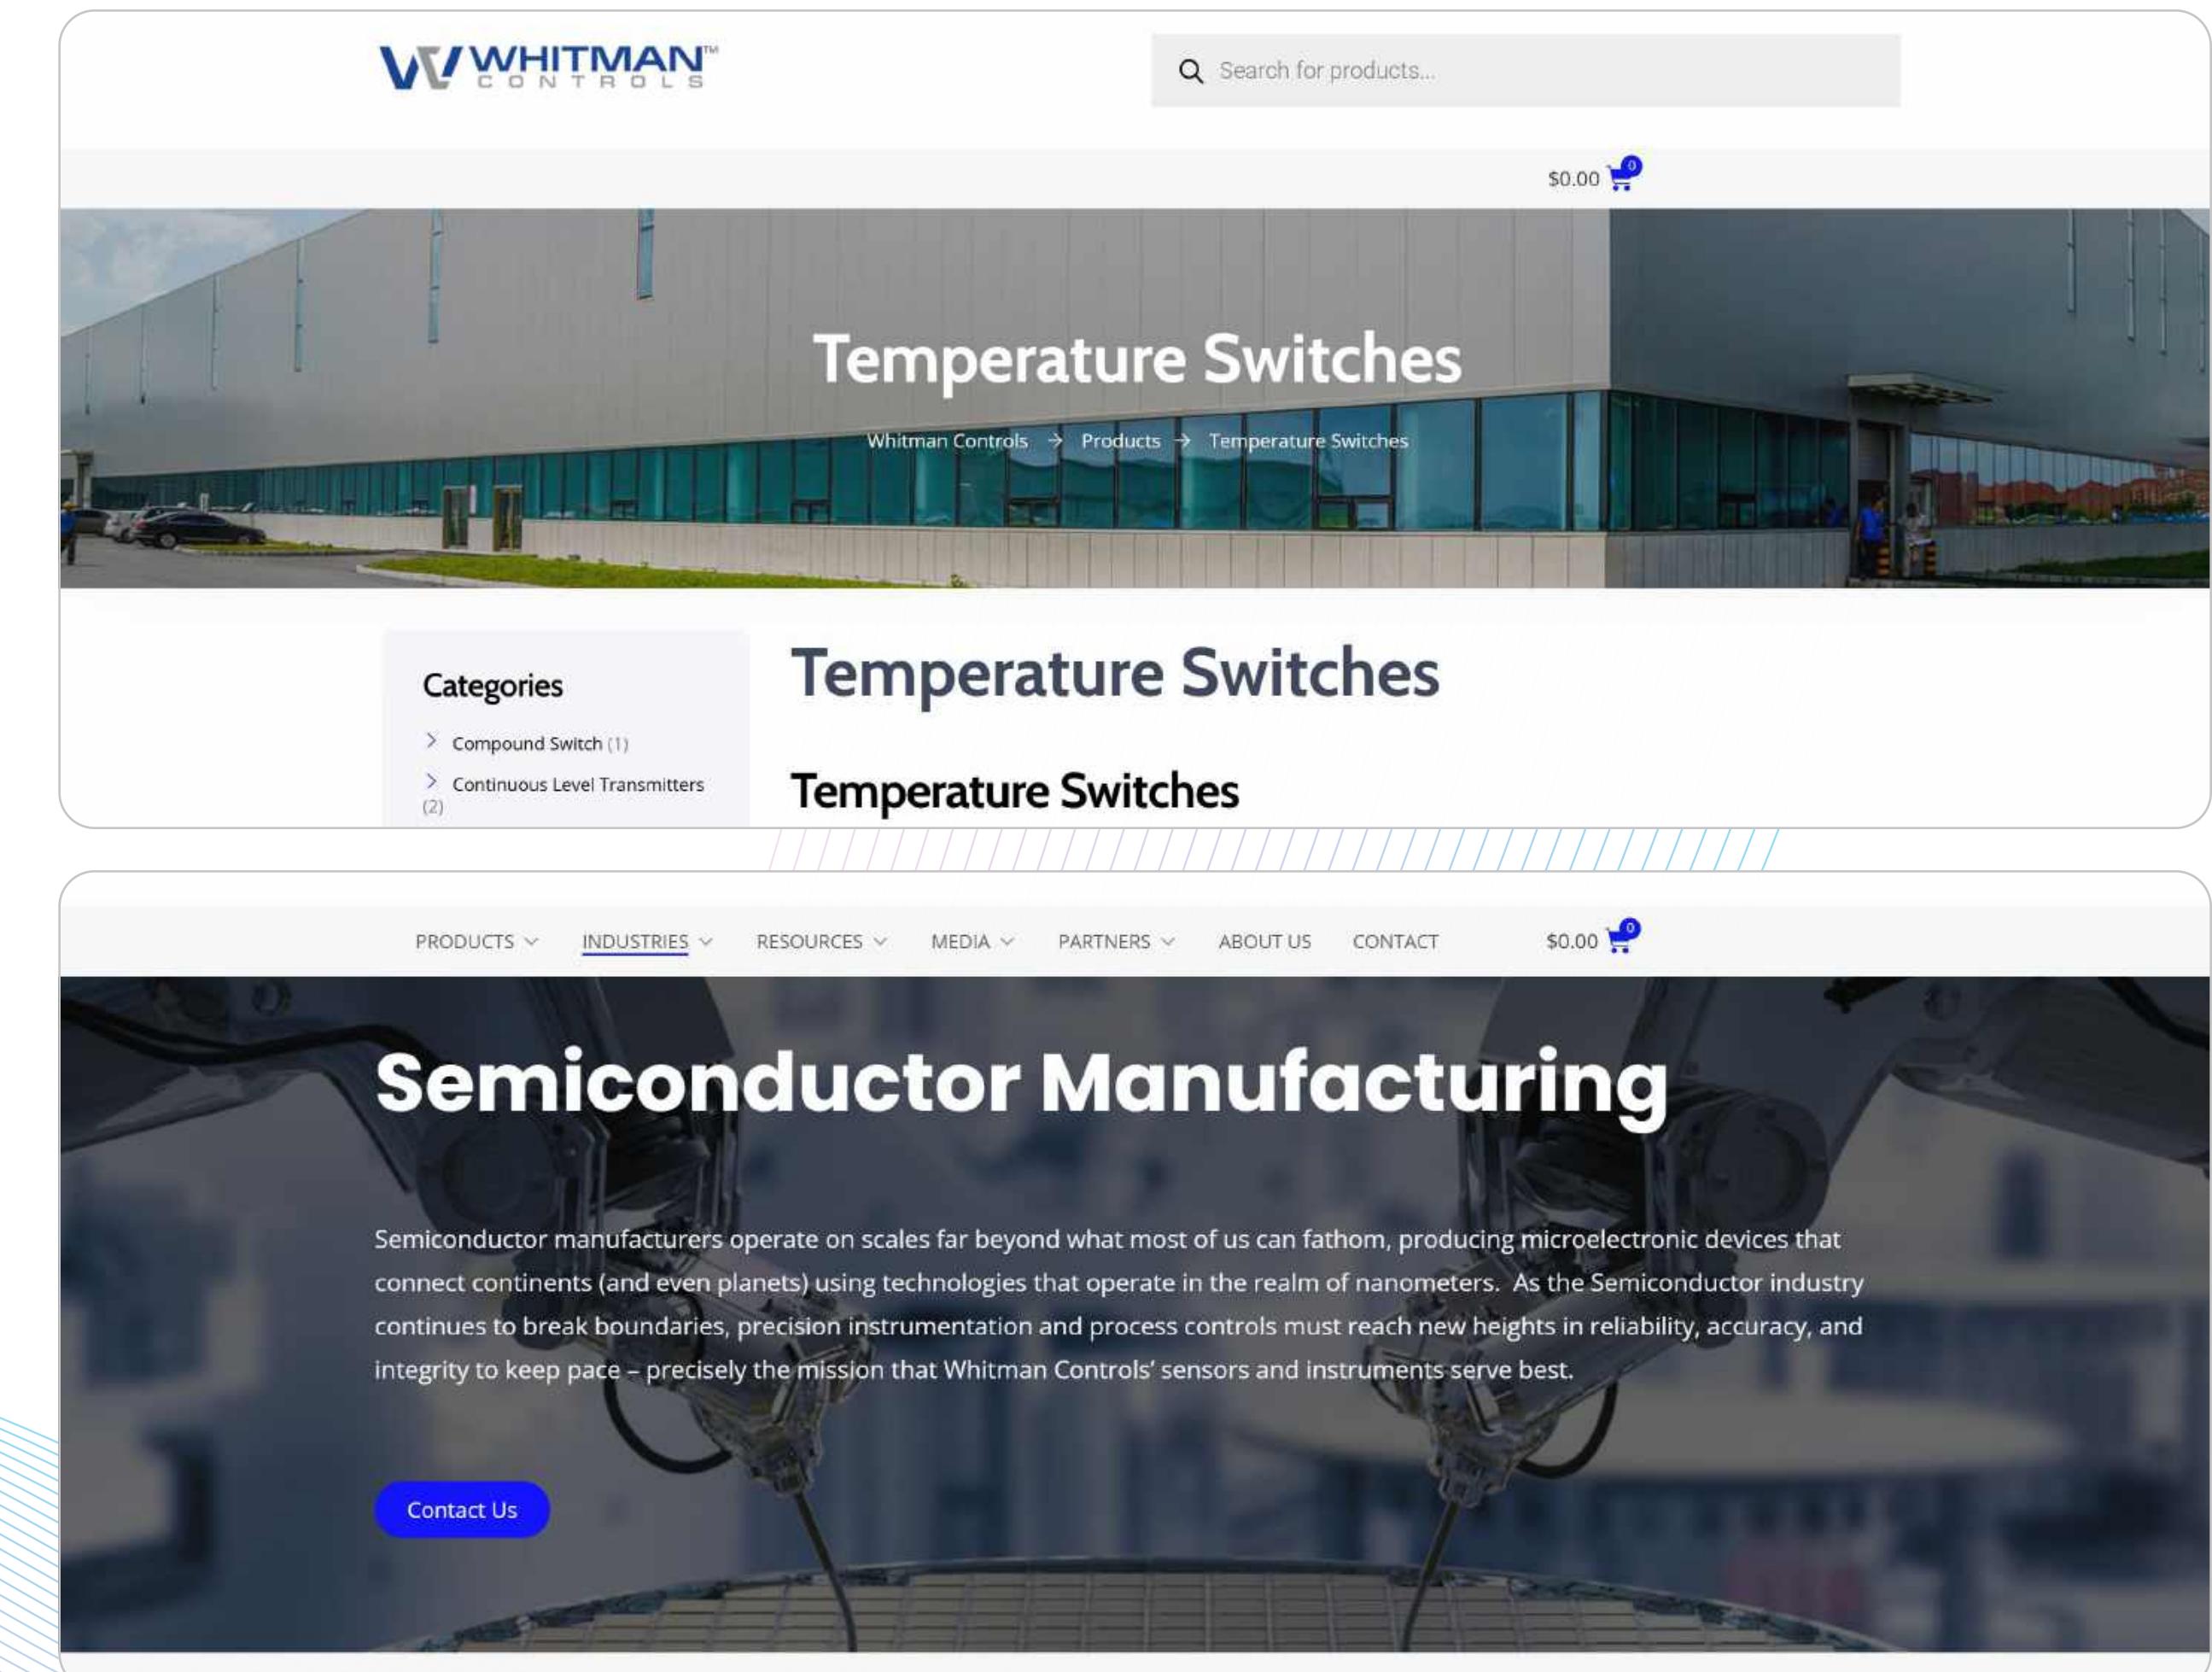

Whitman Controls

Business Context

The client approached us with a clear concern — their existing website lacked a modern B2B identity and failed to effectively communicate the value and technical precision of their product offering. The site was difficult to navigate, unoptimized for lead generation, and didn't meet the expectations of their professional and industrial buyer audience.

Discover how we transformed the digital presence of Whitman Controls, a US-based manufacturer of pressure, vacuum, and liquid level switches, into a modern B2B platform. By redesigning their website from the ground up, integrating custom product logic and checkout flows, and connecting it to Netsuite for item management, we helped establish an eCommerce experience that matches the precision of their products.

Whitman Controls

Value Delivered

01 Strategic B2B UX Overhaul

Delivered a user experience tailored to B2B needs, including custom checkout flows and intuitive navigation.

02 Enhanced Product Experience

Developed in-depth product content and custom category filters to support discovery and decision-making.

03 Business Growth Enablement

Positioned Whitman Controls as an industry leader and boosted lead generation, product education, and online sales.

Whitman Controls

Tech stack

The project utilized a robust and modular tech stack including:

Magento 2 (Open Source) for flexible eCommerce management

PHP & MySQL for backend development

Knockout.js & JavaScript for dynamic UI and customization

Netsuite Integration for streamlined ERP and product management

Custom modules and analytics tools for enhanced functionality and insight

Whitman Controls

Solution Overview

By reimagining Whitman Controls' online platform, we delivered more than a new website — we built a digital sales engine designed for B2B buyers, technical users, and long-term growth. Their team now benefits from a powerful online presence that supports both education and conversion:

- **Conducted a comprehensive discovery phase,** analyzing market competitors and identifying best practices in industrial B2B eCommerce;
- **Created wireframes and high-fidelity designs,** refining them through multiple feedback loops to align with brand goals and user behavior;
- **Developed a fully custom Magento 2 website (Community Edition),** with heavy customization of category pages, product filters, and display logic to support technical buyers;
- **Built a detailed Resources Hub,** allowing customers to explore documentation, case studies, and guides for informed purchasing;
- **Implemented advanced checkout logic tailored to their sales process,** along with custom back-end analytics tools to support business decision-making;
- **Integrated the platform with Netsuite,** ensuring accurate item management and inventory sync across sales channels.

Application Case Study: Level Control in Hydraulic Power Units

Most of us working in industrial fields are endlessly impressed by large scale fluid applications, especially those that seem too complex or massive to comprehend. Intercontinental pipelines, hydroelectric dams, and municipal water treatment plants are just a few examples that come to mind. As impressive as these monstrous systems can be, there's ample reason to be equally inspired by applications on the opposite end of the spectrum, where minuscule amounts of fluids can be pumped accurately down to a fraction of a raindrop in volume.
