Enterprise payment solutions for media buyers and advertisement agencies

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

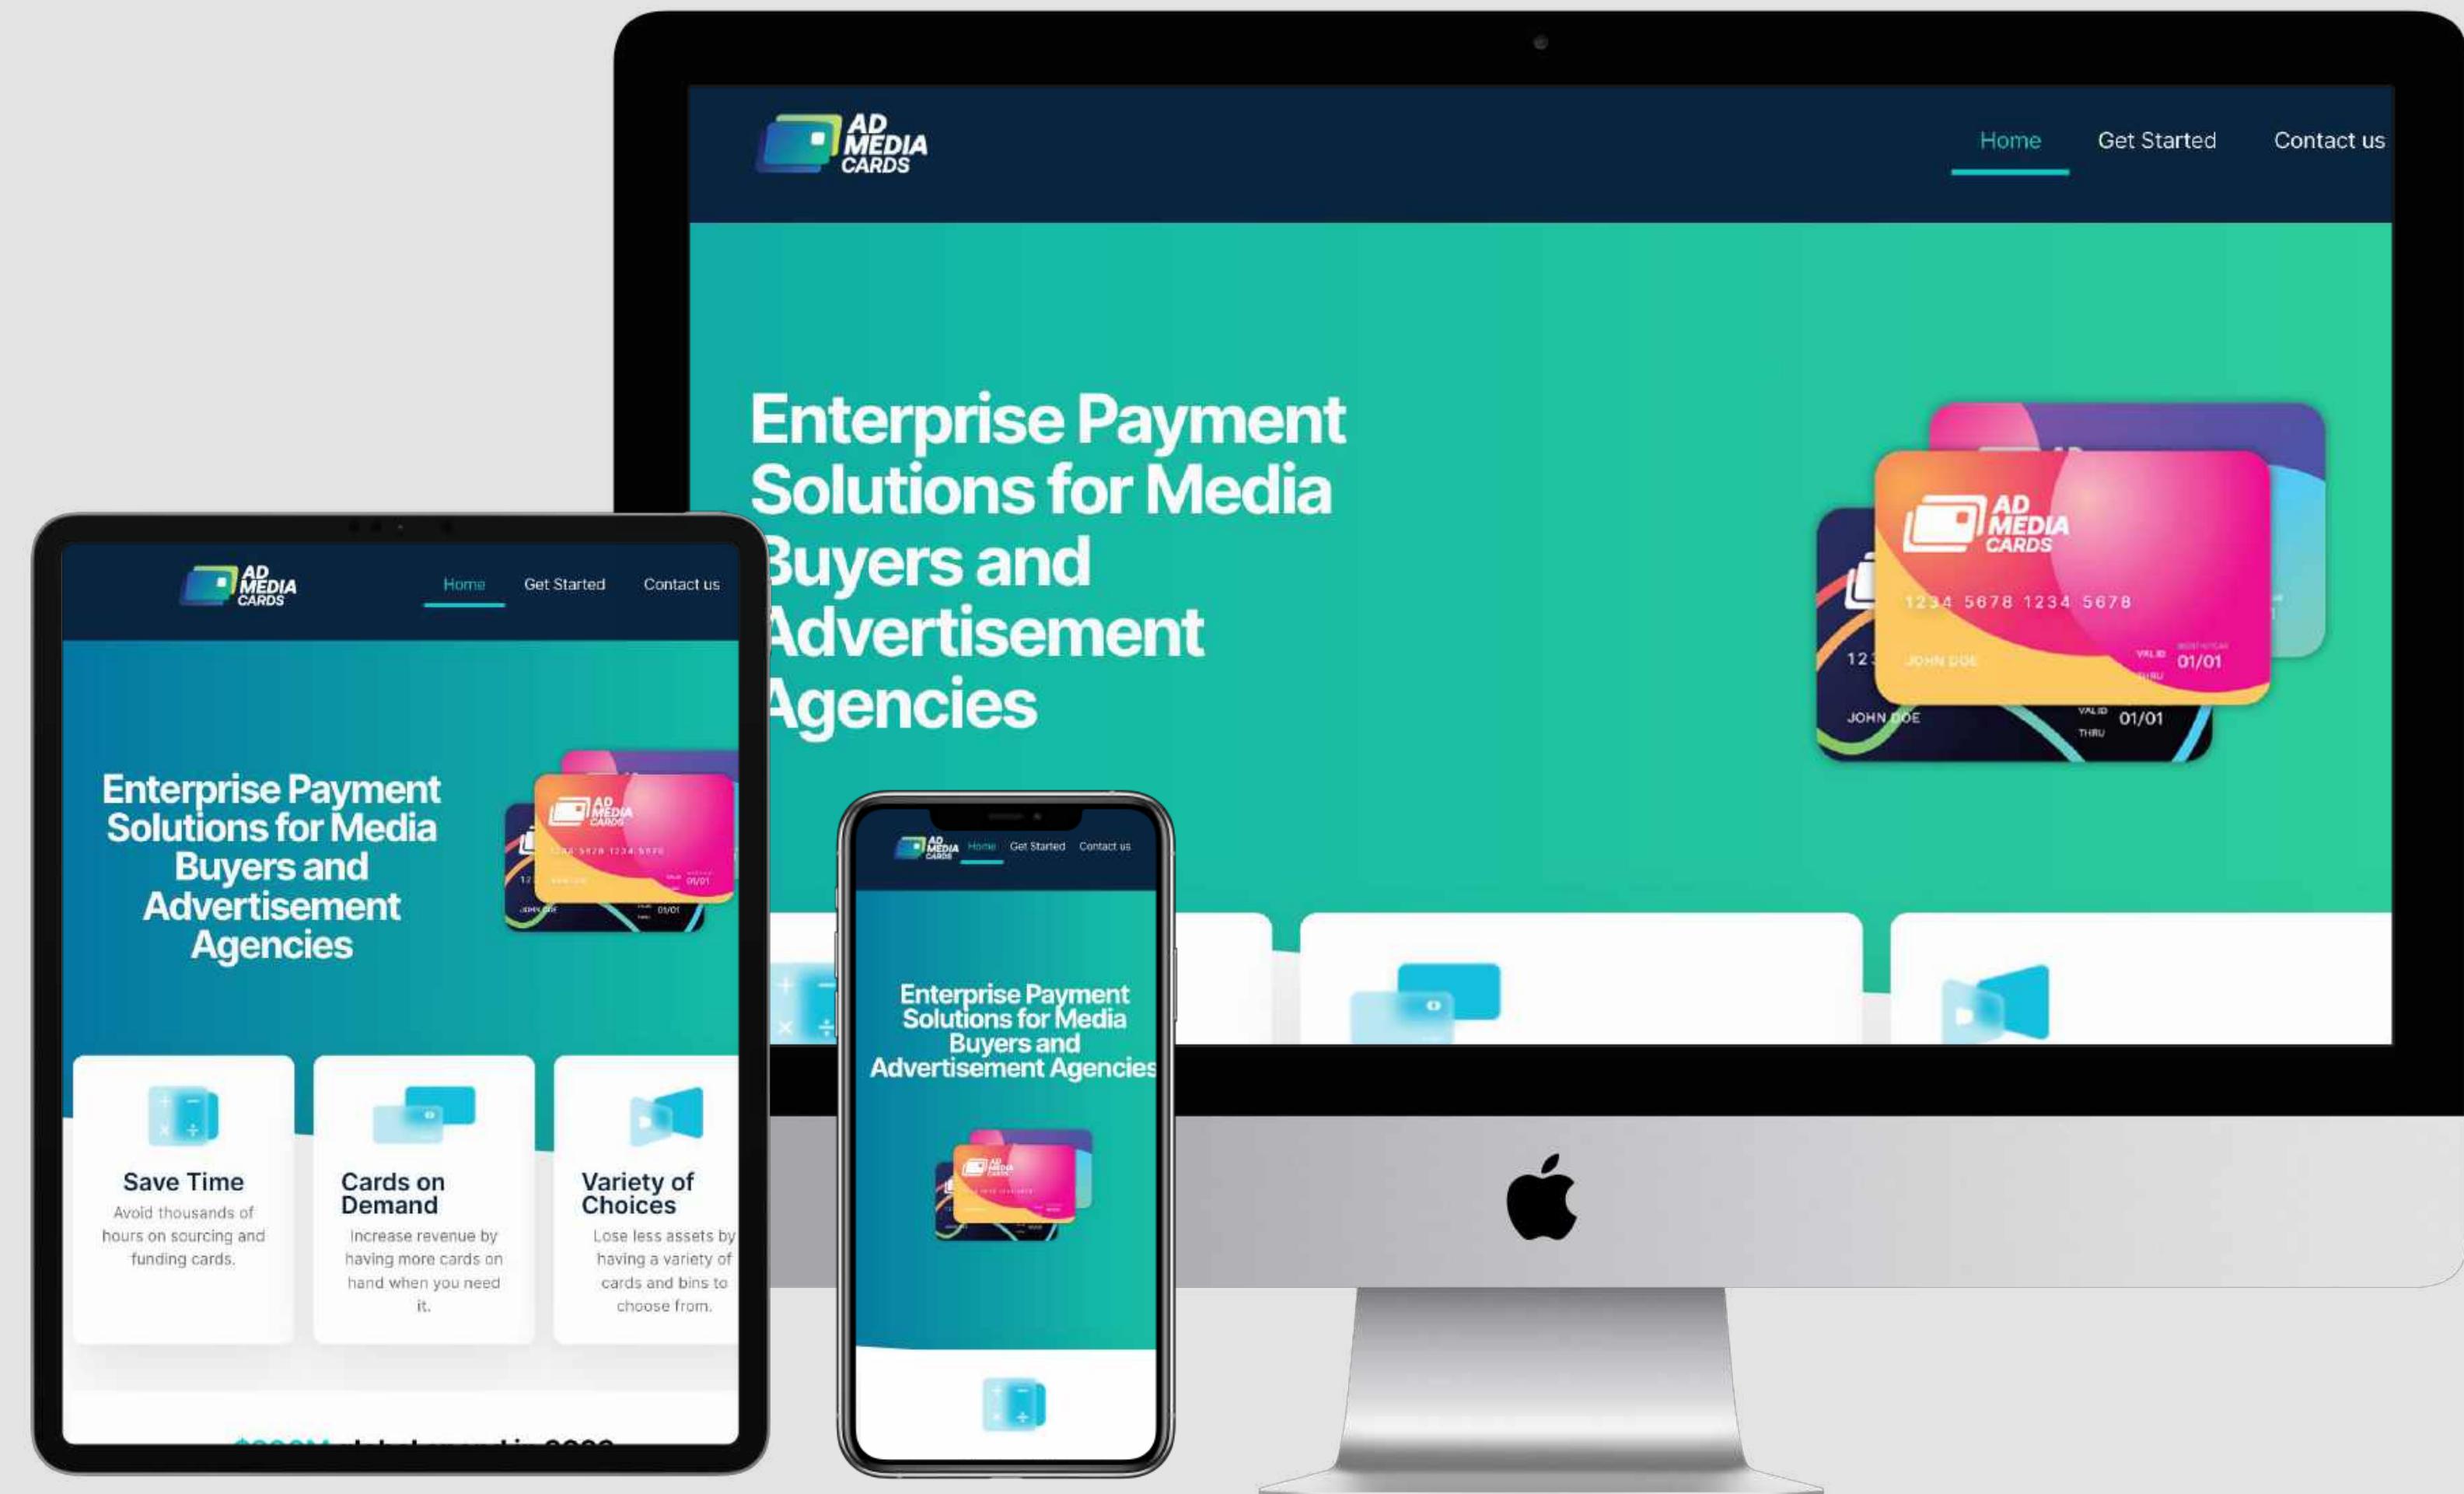

The project revolves around virtual credit cards and their comprehensive management.

There are five repositories, each serving a distinct purpose:

- **Legacy Application Repository.**
 - Description: Manages user-related aspects, including cards, limits, subscriptions, transactions, and user rights.
 - Purpose: Legacy application for fundamental user and card management functionalities.
- **Admin Application on Template Repository.**
 - Description: An administrative interface initially utilizing a new UI template. A few pages were developed but later abandoned in favor of other solutions.
 - Purpose: Admin application with an attempted UI template integration (though not in current use).
- **Admin Application on React Repository.**
 - Description: Admin application with a modern and dynamic interface built using React. It is the up-to-date administrative tool for managing various aspects of the virtual credit card system.
 - Purpose: Real-time, responsive admin interface leveraging the capabilities of React.
- **Client Application Repository.**
 - Description: Primary application for clients, providing functionalities such as virtual card ordering, fund deposits, expense management, and subscription package selection.
 - Purpose: Central application for end-users to interact with and manage their virtual credit cards.
- **Landing Page Repository.**
 - Description: A concise 2-3 page website describing the client application. It serves as the public-facing entry point, providing information about the virtual credit card services offered.
 - Purpose: Presenting an informative snapshot for potential users, encouraging engagement with the client application.

This organizational structure demonstrates a layered approach, separating legacy functions from current, and distinguishing between administrative, client-facing, and promotional elements of the project. The use of React in the admin application signifies a commitment to modern web development practices. Also, our team is working on the refactoring the code and implementing new functionality.

BUSINESS DESCRIPTION

The healthcare project comprises two pivotal components: a cutting-edge desktop application for medical practitioners and a seamlessly integrated mobile app for patients. Within this innovative ecosystem, interactive forms facilitate precise drug selection based on diagnosed conditions, ensuring tailored and accurate prescriptions. Empowering doctors, the desktop app allows them to create personalized treatment plans akin to checklists, optimizing patient care.

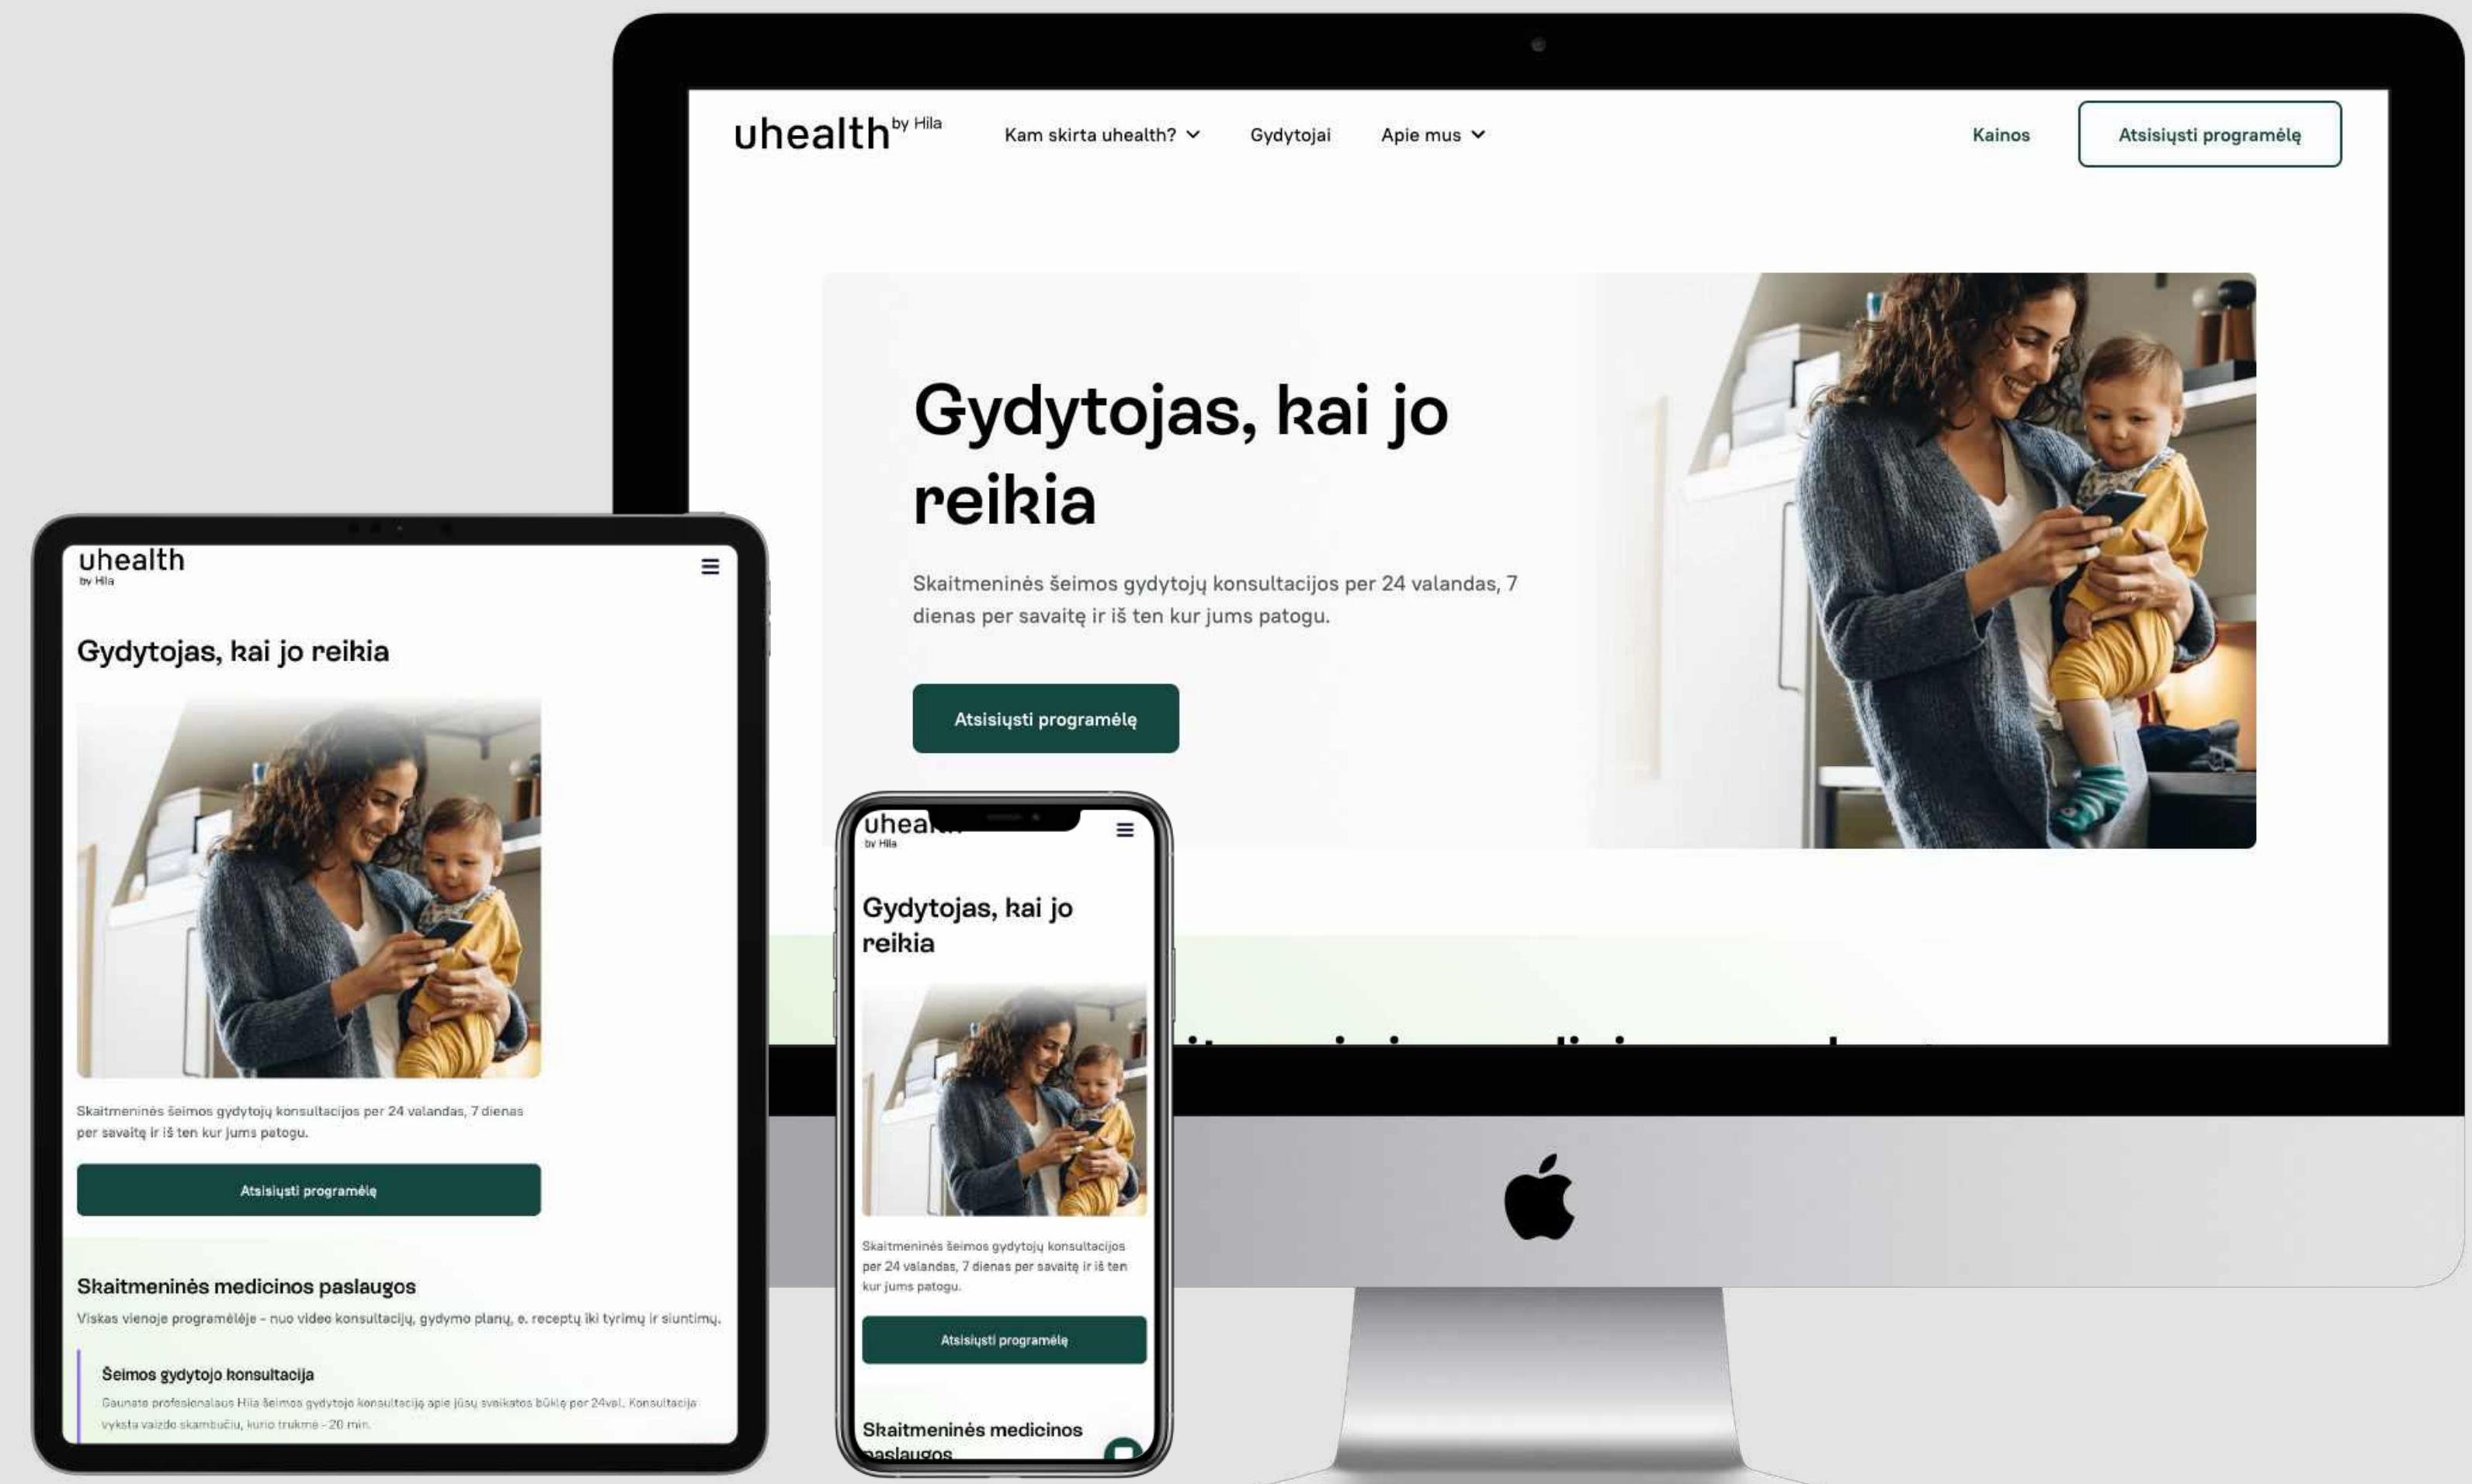

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

In the healthcare sector project, our team successfully developed a robust desktop application using Electron, incorporating cutting-edge technologies to ensure optimal functionality and user experience. Here are the key components of our work:

- Technology Stack. Leveraged Electron framework, enabling the creation of cross-platform desktop applications. Utilized React as the primary frontend library for building user interfaces. React played a pivotal role in designing and rendering various UI elements and components such as forms, buttons, ensuring a seamless and responsive user experience. Integrated Redux Thunk initially for state management and later migrated to Redux Saga for enhanced asynchronous control. Employed Node.js for backend development, synchronizing the UI with files on the server, connecting to the database, and managing the overall server-side functionality.
- Data Management with Firebase. Incorporated Firebase Firestore for efficient and real-time data storage, ensuring seamless communication between the application and the cloud.
- Cloud Functions. Implemented Firebase Cloud Functions, enhancing the application's capabilities by executing server-side logic in response to events.
- Real-time Chat Functionality. Integrated the AGORA SDK to enable real-time chat functionality, facilitating secure and instantaneous communication between doctors and patients.
- Notifications. Implemented native notifications for both desktop and mobile using Firebase Cloud Messaging (FCM), ensuring timely alerts for appointments, messages, and other crucial updates.
- Telehealth Features. Developed features allowing doctors to initiate calls with patients, record notes about their illness, create treatment plans, and schedule follow-up consultations.
- User Interface Design. Ensured a user-friendly interface to optimize the doctor's workflow, making it intuitive for note-taking, treatment planning, and overall patient management. React technology was extensively utilized for crafting and rendering UI components, contributing to a cohesive and visually appealing design.
- Cross-Platform Compatibility. Ensured the application's compatibility across different operating systems, providing flexibility for both doctors and patients.

In summary, our contribution to this healthcare project involved the seamless integration of various technologies and functionalities, ultimately delivering a comprehensive desktop application that significantly improved doctor-patient interactions, medical record-keeping, and telehealth capabilities.

**BUSINESS DESCRIPTION**

The Quicklister Pro platform lets you list your property on the major property sites from anywhere in the UK. Property experts are on hand to support the transaction from start to finish.

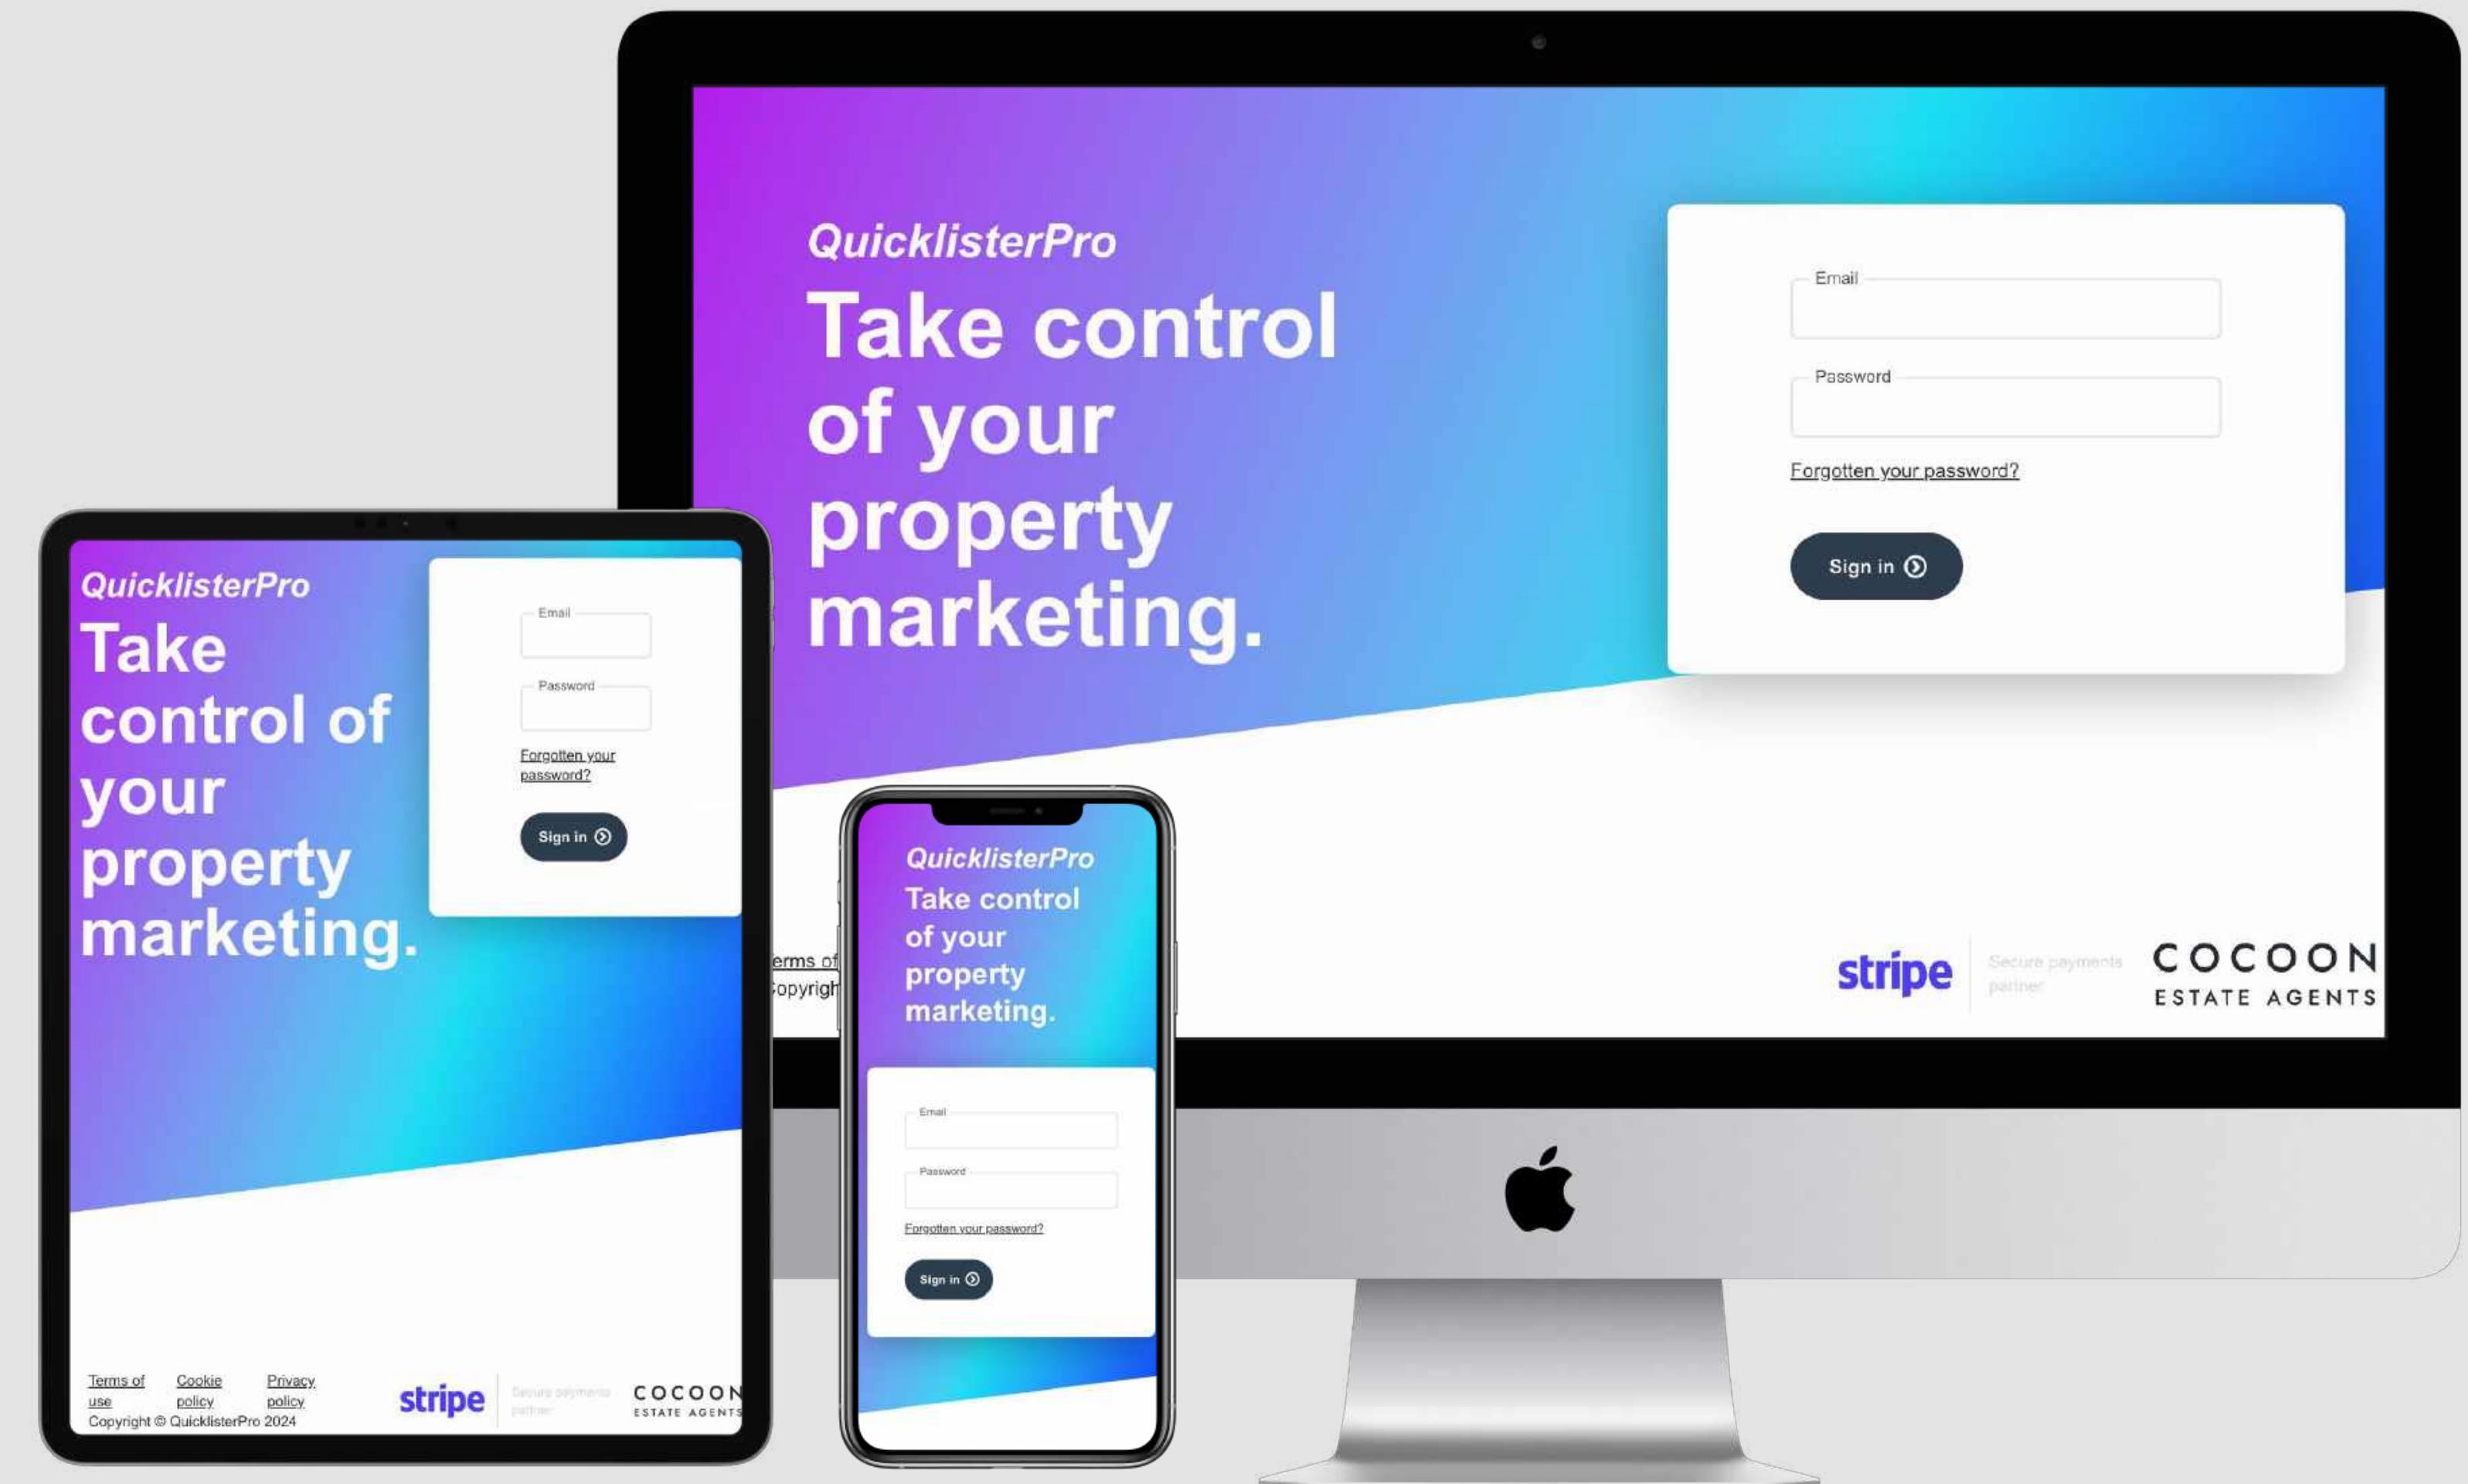

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

Stellar Soft designed and developed Quicklister Pro, a custom platform enabling property listing on major UK property sites. Users can conveniently list properties from anywhere in the UK.

- End-to-end Property Management. Our team crafted a comprehensive real estate platform allowing users to seamlessly log in, create property listings for rent or sale, and push these listings to prominent third-party platforms like Zoopla and Rightmove.
- Engaging User Chat Functionality. The platform includes a custom chat feature, facilitating direct communication between potential renters/buyers and property owners. This streamlined chat functionality aims to simplify the deal-making process.
- Streamlined Payment Process. Our collaboration extended to integrating an advanced payment system, encompassing both internal and external payment methods. Stripe integration enables quick external payments, and users have the flexibility to use external credits for transactions.
- Subscription Model Integration. The Stellar Soft team integrated a subscription model, particularly beneficial for clients managing multiple properties. This feature allows clients to save costs while efficiently listing their properties on third-party platforms.
- Memorandum of Sales Tool. To enhance the deal-closing process, Stellar Soft implemented an easy-to-use Memorandum of Sales tool. This tool gathers crucial data about the property, seller, buyer, and their solicitors. Automated emails are triggered to all stakeholders, ensuring smooth communication throughout the sales process.

The collaborative efforts of Stellar Soft have resulted in a comprehensive real estate platform, offering not only property listing capabilities but also engaging user interactions, streamlined payments, subscription management, and efficient deal-closing tools.

BUSINESS DESCRIPTION

The app offers shipping protection in your cart, purchase coverage for orders any time prior to fulfillment, or set rules to auto-protect orders above a certain value. Coverage starts at just 2% of cart value with a minimum of \$0.98/shipment.

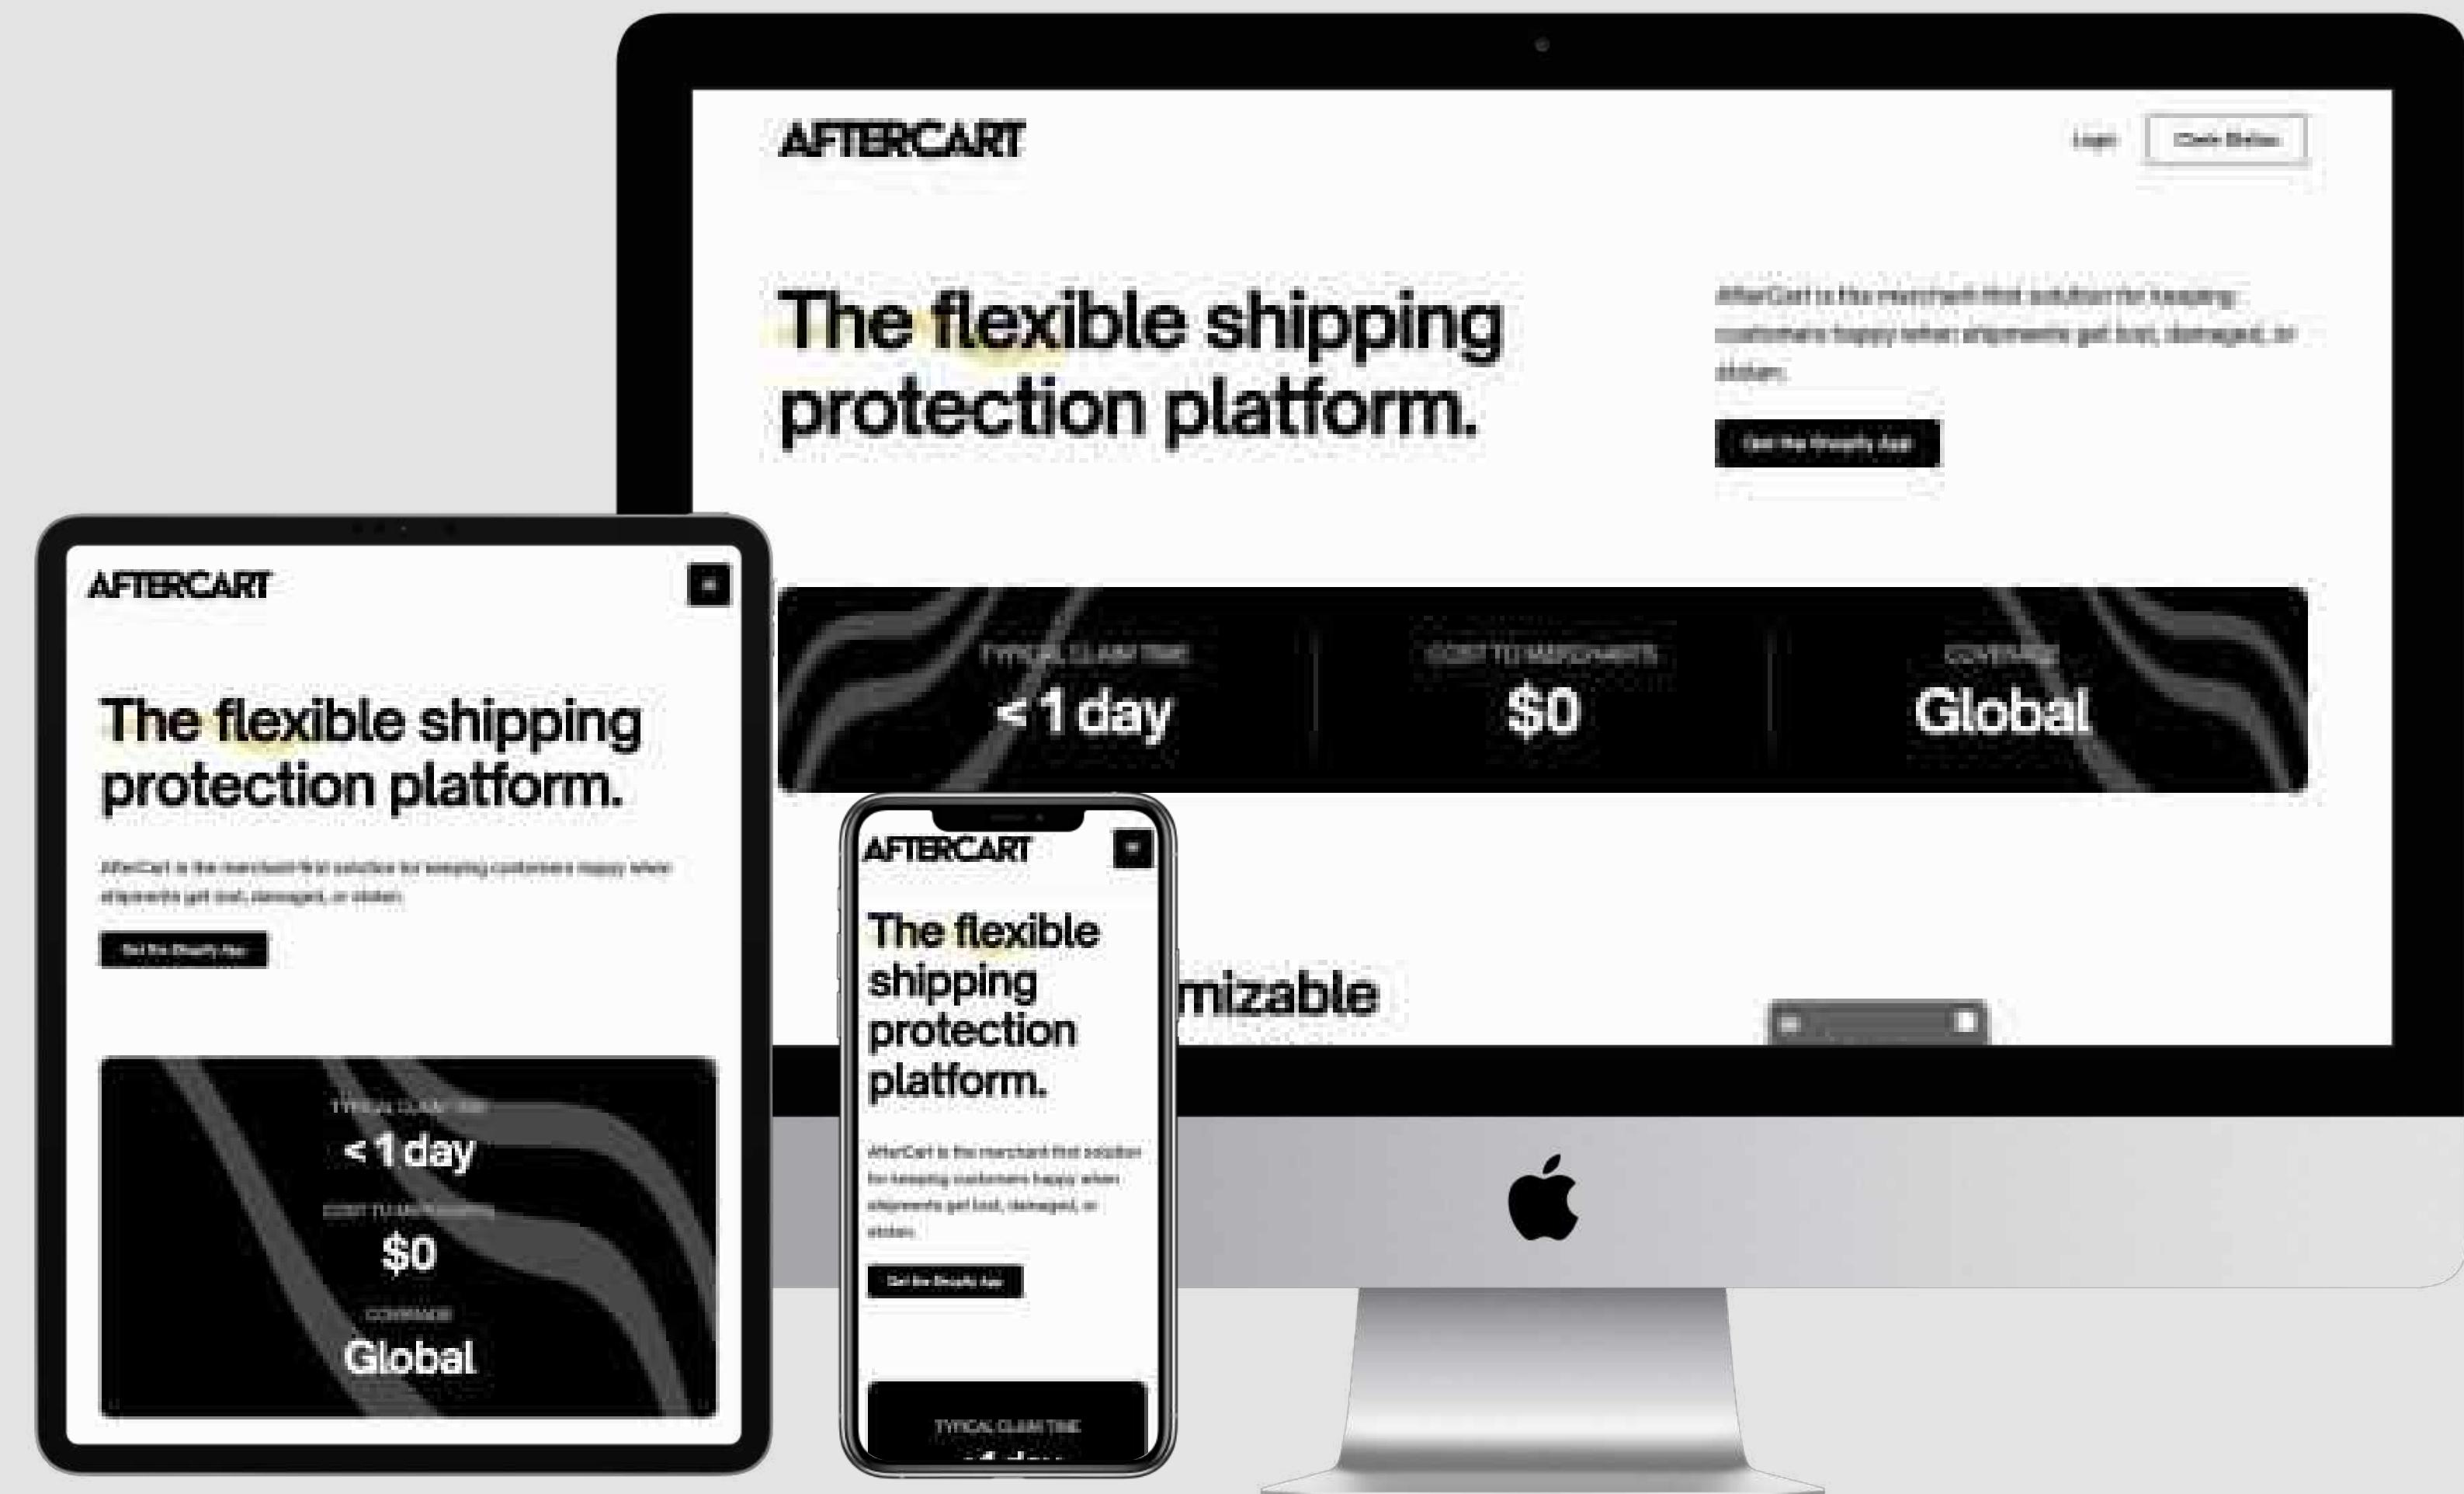

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

The application was already live when our collaboration with the client began, and since then, we have implemented several enhancements:

- **Optimizing Shipping Protection Products.** Modified the system so that each time shipping protection is applied, it generates a new product in Shopify. Addressed an issue where these products were initially created as 'Physical products,' impacting shipping costs. Improved the process to create such products as 'Digital products' by default, ensuring accurate shipping cost calculations.
- **Widget Installation Improvement.** Investigated challenges with the widget installation for some merchants. Identified strict conditions in the logic created by previous developers. Proposed a comprehensive improvement to the client, but due to resource constraints, opted for a manual resolution for affected merchants.
- **Ongoing Frontend Widget Fixes.** Provided tailored fixes for the frontend widget, addressing specific issues for each merchant using the app. Resolved issues related to toggle functionality responsible for applying protection.
- **Upcoming Feature:** Auto Archiving Shipping Protection Products. Planned development of functionality to automatically archive shipping protection products in the merchant's Shopify dashboard with each order.

Our commitment is not just to rectify existing issues but also to proactively enhance the application for an improved user experience and seamless functionality across various merchant scenarios.

BUSINESS DESCRIPTION

GLOCK is a brand of polymer-framed, short recoil-operated, locked-breech semi-automatic pistols designed and produced by Austrian manufacturer Glock Ges.m.b.H. They launched their own line of watches. The GLOCK Watch Collection features highly recognizable designs, making them a must-have for GLOCK enthusiasts. It contains an array of styles that fuse Swiss precision with chronograph mastery for an exceptional timekeeping experience.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

Our team's contributions to the watch store project involved a holistic approach—from innovative design and cutting-edge technology implementation to seamless integrations and a focus on performance and scalability. The result is a modern, efficient, and fully functional online store that meets the client's requirements and sets the foundation for their online business success.

- **Custom and Modern Design.** We collaborated closely with the client to understand their brand identity and target audience. Based on these insights, our team conceptualized a custom and modern design that aligned with the client's vision for the watch store.
- **User-Centric Approach.** The design focused on delivering an optimal user experience, ensuring intuitive navigation, appealing visuals, and a seamless shopping journey.
- **Headless Shopify Development with React JS and Shopify Hydrogen Technology.** We chose the headless architecture to maximize flexibility and performance. By leveraging React JS for the frontend and Shopify Hydrogen tools for the backend, we ensured a modern, scalable, and efficient development process.
- **Responsive and Fast User Interface.** The use of React JS allowed us to build a highly responsive and dynamic user interface, enhancing the overall user experience.
- **Integration of Third-Party Tools;**
 - Klaviyo Integration. We seamlessly integrated Klaviyo for email marketing and automation. This integration enabled the client to effectively engage with customers, track user behavior, and run targeted marketing campaigns based on customer preferences.
 - Store Point Integration. By integrating Store Point, we enhanced the online shopping experience. Store Point likely provided additional features, such as loyalty programs, rewards, or personalized shopping experiences, to create customer loyalty and drive repeat business.
 - Cookies Bar Implementation. We ensured compliance with privacy regulations by implementing a cookies bar. This not only met legal requirements but also demonstrated a commitment to user privacy and transparent data practices.
- **Scalability and Performance.** We focused on optimizing the performance of the online store, considering factors such as page load times, server response times, and overall site speed. This optimization contributes to a positive user experience and can positively impact search engine rankings.
- **User Training and Documentation.** We conducted training sessions to familiarize the client's team with the new platform, ensuring they could efficiently manage and update the online store. Comprehensive documentation was provided, covering aspects such as content management, product updates, and general website maintenance. This documentation serves as a valuable resource for the client's team.
- **Quality Assurance and Testing.** Before the launch, we conducted rigorous quality assurance testing to identify and address any bugs, glitches, or inconsistencies in the functionality of the online store. Testing was performed across various browsers and devices to ensure a consistent and reliable experience for all users.
- **Timely Project Delivery.** We prioritized project timelines and delivered the online store within the agreed-upon schedule. This timely delivery allowed the client to launch the store according to their business plan.

**BUSINESS DESCRIPTION**

The company specializes in the development and sale of modules and plugins designed for E-commerce platforms. Their products enhance and extend the functionality of online stores, providing valuable solutions to optimize and customize the E-commerce experience.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

To achieve success in developing the public application, the Stellar Soft team implemented the following key strategies and actions:

- Comprehensive Integration.** The team focused on creating a robust integration between Shopify and Amazon. This involved developing features that facilitate the smooth sending of products to Amazon and the direct receipt of orders within the Shopify platform.
- Location-Agnostic Product Handling.** The application was designed to handle products irrespective of their assigned location. This flexibility is crucial for businesses dealing with diverse inventory locations.
- Real-Time Updates.** The architecture of the app was carefully crafted to provide real-time updates. This ensures that sales information is communicated promptly to both sellers and customers, contributing to a more efficient and responsive business operation.
- Seamless User Experience.** The team prioritized the development of an intuitive and user-friendly interface. This ensures that both sellers and customers can navigate the application effortlessly, fostering a positive and productive user experience.
- Efficient Order Management.** The direct receipt of orders from Amazon within the Shopify platform streamlines the order management process. Sellers can efficiently handle orders without the need for constant switching between platforms.

By combining technical expertise, a user-centric approach, and effective collaboration, the Stellar Soft team succeeded in developing a powerful public application that seamlessly connects Shopify with Amazon, offering an enhanced experience for both sellers and customers.

BUSINESS DESCRIPTION

Online store: The business specializes in selling luxury jewellery.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

The client has reached out for small functionality to be done but after that, we became the technical partner for them and provide day-to-day support.

- **Integration with EmaiUS.** Seamlessly integrated EmaiUS for efficient and personalized email communication. This integration enhances communication capabilities and allows for targeted messaging.
- **Gift Apps Integration.** Integrated gift apps to provide users with enhanced gifting features. This inclusion aims to improve the overall shopping experience and cater to users looking for gift-related functionalities.
- **Klaviyo Integration.** Successfully integrated Klaviyo, a robust marketing platform, into the project. This integration empowers the company with advanced email marketing capabilities, enabling targeted campaigns and personalized communication.
- **Nosto App for Dynamic Sliders and Analytics.** Implemented the Nosto app to generate dynamic sliders that provide personalized recommendations to customers. The app also includes analytics functionality, collecting valuable data to further refine recommendations and improve user engagement.
- **Product Engraving Feature.** Introduced a product engraving feature, allowing users to personalize their purchased products. This feature adds a layer of customization to the shopping experience, catering to users who seek unique and personalized items.
- **Improving The Code Base.** Since the website wasn't created from scratch by our team, we constantly improving the code base to make the store faster and more user-friendly.

These integrations collectively showcase the company's commitment to providing a comprehensive and personalized user experience, leveraging advanced tools and features to enhance communication, marketing, and product personalization.

BUSINESS DESCRIPTION

Online Store. Derma SPA is the source for premium skincare. They pride themselves on providing personalized service to each and every customer who needs it. They also only stock and carry products they truly believe in and they have seen work for their clients.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

Derma SPA's success depends on having a well-maintained and functional online store. Our team's ongoing support, proactive approach to issue resolution, and collaborative efforts with Derma SPA resulted in a well-maintained, efficient online store that continually adapted to the evolving needs of the business. The creation of new, optimized pages further strengthened Derma SPA's online presence, fostering increased traffic and user engagement.

- **Continuous Support and Issue Resolution.** Offered consistent support to Derma SPA to promptly address any issues that arose on their online store. Ensured the website was well-maintained and functioned smoothly, contributing to a positive user experience.
- **Ongoing Support for Timely Fixes.** Provided ongoing support to address timely fixes and resolve technical glitches on Derma SPA's existing website. Responded promptly to maintain the website's efficiency and performance.
- **Additional Feature Implementation.** Assisted Derma SPA in integrating new functionalities into their online store. Worked on adding features that enhanced the user experience and met the evolving needs of the business.
- **Collaborative Approach to Improvement.** Collaborated with Derma SPA to identify areas for improvement on their online store. Proactively addressed issues and implemented solutions to enhance the overall functionality of the website.
- **Creation of New Pages.** Developed new pages on Derma SPA's website to expand and improve their online presence. Focused on usability and search engine optimization to attract increased traffic and engagement.
- **Usability and SEO Optimization.** Ensured that the new pages were designed with a focus on usability, providing a positive experience for website visitors. Implemented search engine optimization strategies to improve the website's visibility and attract organic traffic.
- **Contributing to Increased Traffic and Engagement.** The development of new pages, coupled with usability and SEO enhancements, contributed to increased website traffic. Improved engagement by creating pages that effectively conveyed information and encouraged interaction.

Revolutionizing dog nutrition. Every dog breed has individual needs and genetic predispositions. Hey Holys have developed a food tailored to the requirements of each breed.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

Our partnership with Hey Holys extends beyond code and design. It's a synergy of purpose – combining their revolutionary approach to dog food with our expertise in Shopify development. The project involved comprehensive enhancements and customizations for an enriched user experience.

- **Full Website Development from Scratch.** Crafted the entire website from scratch, ensuring a tailored and dynamic online experience.
- **Custom Drawer Cart.** Developed a bespoke drawer cart from scratch. Integrated features like a dynamic gift bar, showcasing how much more a user needs to spend for gifts or free shipping. Implemented upselling options and the ability to opt for a more cost-effective product subscription.
- **Custom Logic on PDP.** Implemented custom logic on the Product Display Page (PDP). Enabled dynamic changes to product information based on selected options within a single product page.
- **Custom Filtering on PLP.** Introduced custom filtering on the Product Listing Page (PLP). Achieved dynamic changes to banners and the product list without page reloading when applying filters.
- **Private Referral Program Integration.** Integrated a private referral program with a custom design that aligns with the overall website aesthetics. Implemented field validation and data recording in a spreadsheet. Executed referral email sending through the SendGrid service.
- **Multilingual Website Implementation.** Successfully translated the entire website to cater to diverse audiences.
- **Pet Feed Calculator.** Developed a calculator for customers to determine and select the ideal feed for their pets. Gathered data such as weight, breed, and age for accurate recommendations.

These initiatives collectively contribute to a robust and user-friendly website, addressing various aspects of user interaction and functionality.

BUSINESS DESCRIPTION

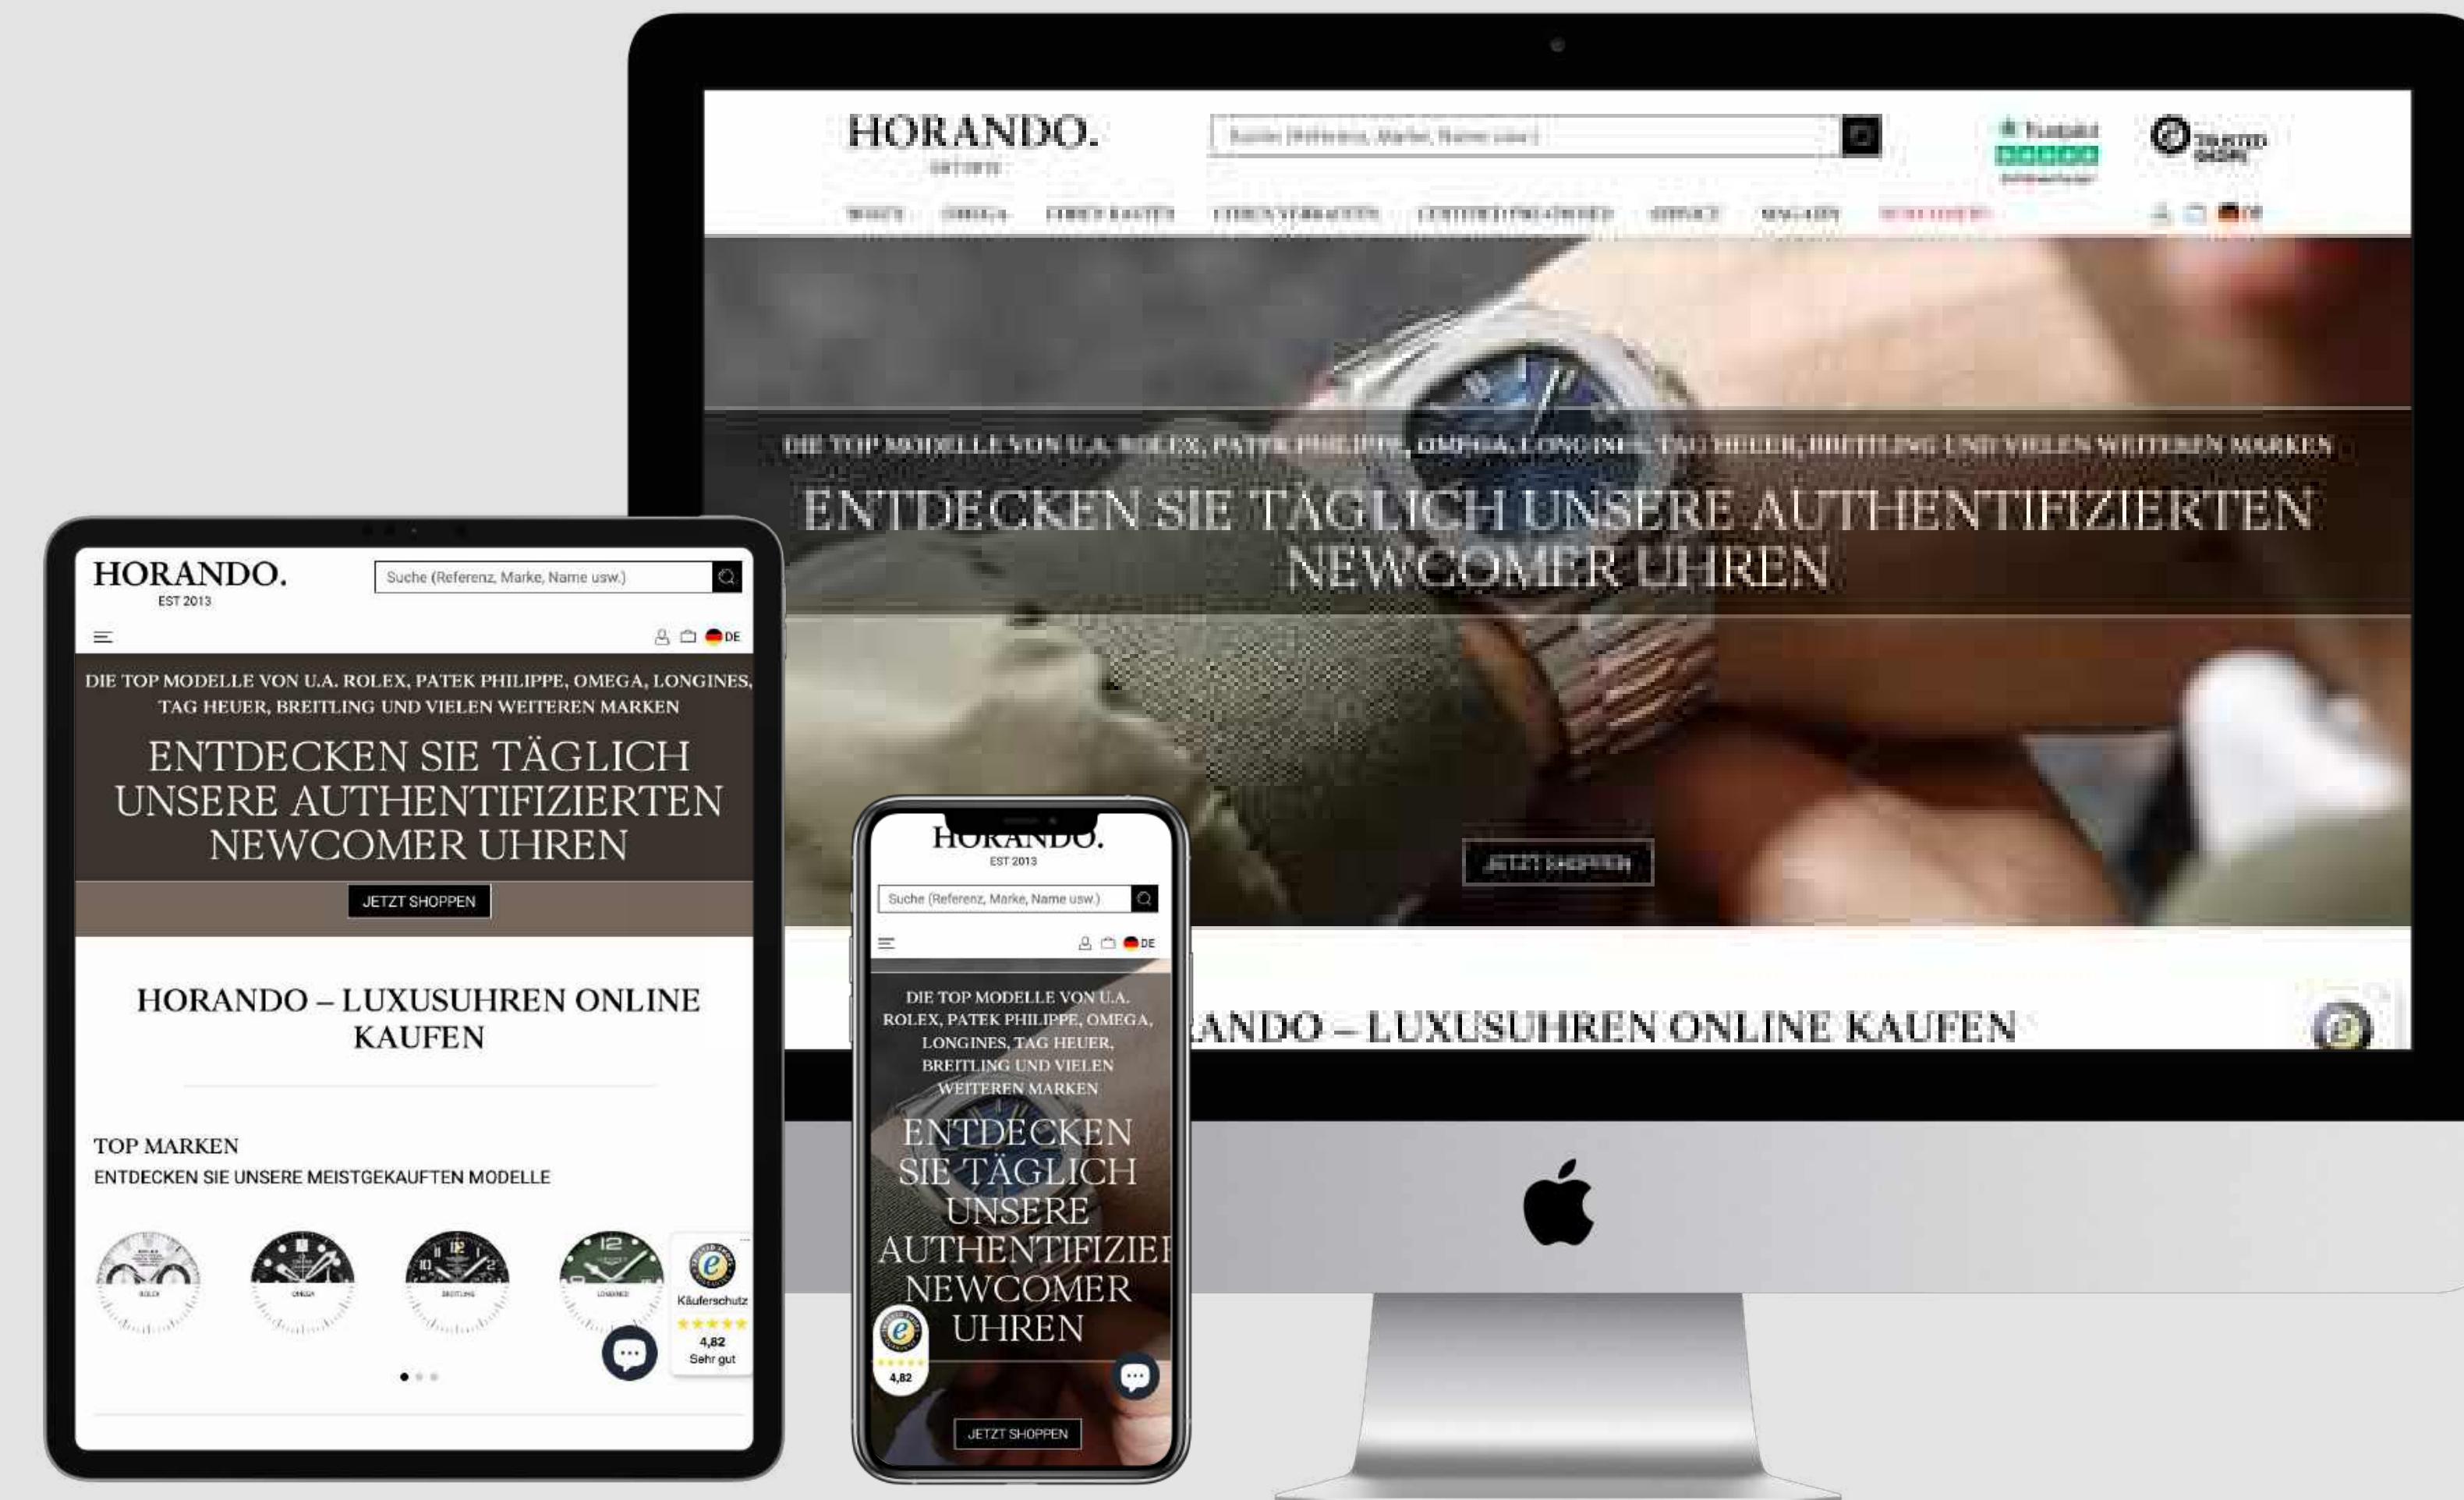

Horando sells watches online including 7,500+ top-brand watches. Globally recognized, they offer unique service and expertise 24/7.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

The client approached us with the goal of not only enhancing the site's visual appeal but also optimizing its functionality to boost the conversion rate.

- **Comprehensive Issue Resolution.**
 - Tackled and rectified existing issues on the live site, including addressing translation errors to ensure a globally accessible interface.
 - Systematically addressed and resolved plugin system crashes to guarantee smooth operation and user experience.
 - Reactivated and fine-tuned APIs and tokens to ensure seamless integration with external services and tools.
 - Filled in the gaps by restoring missing pages and optimizing the site's sorting functionality for a more intuitive navigation experience.
- **Advanced Customer Interaction Features.**
 - Introduced a Sales Consultants feature to provide users with personalized assistance and product recommendations, enhancing the overall shopping experience.
 - Seamlessly integrated a WhatsApp support chat, allowing users to connect with customer support instantly. This real-time interaction capability not only improves customer satisfaction but also serves as a valuable tool for addressing queries and facilitating the purchase decision.
- **Responsive Design Optimization.** Ensured the website's design is not only visually appealing but also responsive across various devices, providing a consistent and enjoyable user experience.

BUSINESS DESCRIPTION

The company specializes in the development and sale of modules and plugins designed for E-commerce platforms. Their products enhance and extend the functionality of online stores, providing valuable solutions to optimize and customize the E-commerce experience.

HOW OUR TEAM HELPED THE CLIENT TO SUCCEED

The team at Stellar Soft successfully developed a module that enhances the PickUp in-store option, extending it seamlessly from Shopify to Amazon. Here are the key aspects of their accomplishment:

- Cross-Platform Integration.** The module allows the activation and expansion of the PickUp in-store option, connecting seamlessly from Shopify to Amazon. This integration enables sellers to send an unlimited number of products for sale on Amazon and manage Amazon orders directly through the Shopify platform.
- Efficient Order Management.** Sellers can efficiently update inventory, fulfill orders, and process refunds directly within the app. This centralized approach simplifies the Click&Collect process, enabling users to manage it effortlessly in one place without additional efforts.
- Real-Time Content Loading.** The team implemented an easy-to-use app architecture that enables the real-time loading of all content. This means that users can see new orders without the need for page reloads, contributing to a smoother and more responsive user experience.
- Code Efficiency.** The code efficiency implemented in the module ensures that all orders come through quickly, and inventory is updated immediately. This efficiency is crucial to avoid overselling and to keep accurate track of product stock.
- Avoiding Overhead.** By managing the Click&Collect process in one place, the module minimizes the overhead associated with order processing and inventory management. This streamlining is beneficial for sellers dealing with a high volume of orders.

Overall, the module developed by Stellar Soft provides a comprehensive solution for sellers looking to integrate and manage the PickUp in-store option seamlessly across Shopify and Amazon. The emphasis on real-time updates, code efficiency, and centralized management contributes to the success of this solution.
