Stellar Soft

Our values

Solution-focused Approach

Our solution-based approach is founded on expertise and curiosity. We employ dedicated requirements and business analytics to provide the best solutions for your business.
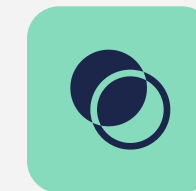

Expertise

Our expertise is the cornerstone of our value to you. We make sure the following is true so that our expertise is top-notch.

Dedicated

At Stellar Soft, dedication means putting your needs at the center of our business.

Transparency

Transparency is at the heart of how we work. We believe that open communication and honesty build trust and drive success.
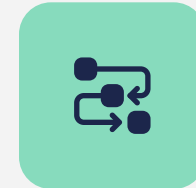

Stellar Soft Organization Departments

Stellar Soft

Business analysis

We identify points of risk and develop informed solutions that save you time and money. You will receive:

- analysis of systems and processes

- analysis and cleaning of product data

- collaboration on design and content strategy

Project management

We implement and consolidate best practices and processes within your project. Our top project managers will provide you with the following deliverables:
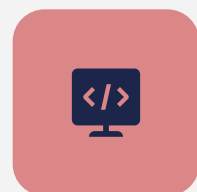

- ensuring the implementation aligns with the project vision

- requirements specification document
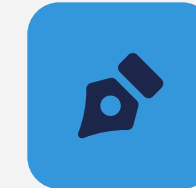

Design

We have a sharp mind for absorbing visual trends and deploying them in fresh and exciting ways. You will see this creativity in your:

- benchmarking analysis report and user flows

- sitemaps and wireframes

- interactive prototypes

Programming and engineering for custom projects

You can rely on us to deliver a quality product on time. Besides your software product you will receive:

- source code repository

- technical documentation

Ecommerce Programming and engineering

We are experts in Magento, Shopify and WordPress with 11+ years of experience. Our deliverables:

- architecture design of your platform

- product catalog management setup
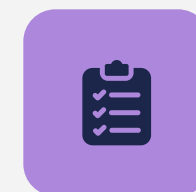

Quality assurance

Our QA specialists apply manual and automated testing to maintain the top quality. They deliver the following documentation:

- test plan

- bug reports and test summary reports
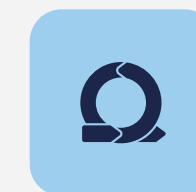

DevOps

We pride ourselves in strong DevOps expertise. You may count on following deliverables:

- infrastructure as code (IaC) scripts

- CI/CD pipeline configuration

- monitoring and logging setup

Stellar Soft

Our Services

Stellar Soft's business strategy centers on delivering high-quality solutions to business challenges. Our solution-first approach to agile development ensures that every project meets required standards, achieves business goals, and drives growth.

Custom software development

Leverage our domain expertise, technology stack, custom SDLC, and constraint management framework to build a solution tailored to your business needs.
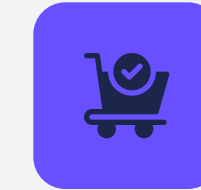

Ecommerce development

Using state-of-the-art technologies like Magento, Shopify, and WordPress, we help retail and wholesale businesses thrive in the competitive B2B and B2C eCommerce markets.
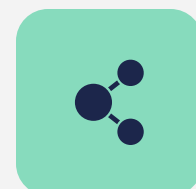

Digital Transformation

Develop and execute a strategic plan to drive digital transformation, adapt to market trends, streamline processes, increase ROI, and surpass competitors.
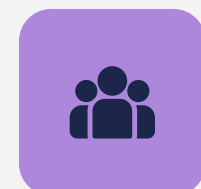

Development team augmentation

Boost your capacity by hiring expert professionals to accelerate project completion, speed up development, and maintain a competitive edge in the digital market.
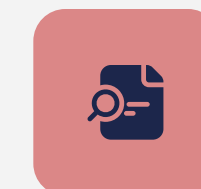

Auditing and consulting

Our expert specialists can audit your platform, identify obstacles to success, and offer tailored advice, creative solutions, and strategic insights to help you achieve your goals.

Engagement Models

As a solution-first company, we focus on finding the best approach to executing your software project. You may choose from the standard options or propose your own.

1

Time and materials

- Long-term project and dynamic requirements
- The scope of work is not fully specified.
- May need to alter the scope and the workload

2

Fixed price

- Clear requirements and strict deadlines
- Project with a limited scope of work
- We manage the entire product development lifecycle.

3

Outstaffing

- Stellar Soft provides experts or full teams with the needed expertise.
- We take responsibility for their performance.
- Our experts follow your values and processes.
- They work as part of your team, under your company's name.

4

Retainer

We ensure seamless integration of your new engineers into your team, culture, and development flow.

- Web and mobile app maintenance and support services
- User experience, quality and security improvements.
- You can choose to order a fixed number of hours per month.

Stellar Soft

Our Clients

Awards, rating and reviews

Stellar soft is constantly included in the lists and ratings depicting the world's best IT service providers, as well as companies demonstrating business growth and technology innovation capabilities.
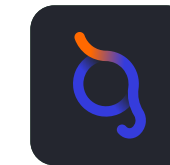

Rebecca Wilson
Director of Marketing at Cooper Mountain Technologies

They have great attitudes and will take the ideas and needs of a job and consider other important items, like SEO and responsiveness for you. They use their knowledge and professional experience to improve upon what your project needs.

Kelwin Fernandes
Owner at NILG.AI & Professor of Technology at ISCIA

We had a shortlist of about five companies that presented adequate approaches to our RFP. Stellar provided a very detailed and transparent plan and pricing strategy. Jack was very clear and provided good insights on how to work on it.

Yousef Jaikat
Shopify & E-commerce Expert, Owner at Digitalebox.de

The company's coding expertise and ability to implement advanced, customized solutions for Shopify are particularly impressive, showcasing their deep technical skills and a strong commitment to delivering high-quality, scalable eCommerce platforms.

Matthew Burleton
Creative Director at Long Story Short

Communication is key with any partnersip. Speed and clarity is cruitical especially during quick deadlines when times are tight and there's a lot on the line. I was impressed with Stellar Soft's process and communication, from the project manager to the director roles. Nothing has ever been above and beyond, which has been really reassuring.
